PREFACE.

The numerous documents relating to the administration of the government of India by the East-India Company which have been printed, and the still more voluminous correspondence which remains in manuscript, have, from the earliest to the most recent dates, been thickly studded with terms adopted from the vernacular languages of the country, and commonly inserted without any explanation of their purport. Various reasons may be assigned for a practice which, to say the least of it, is attended with considerable perplexity to those who have not studied the languages of India at all, and is not free from embarrassment even to many by whom those languages have been in part only, or imperfectly acquired. In many cases, no doubt, it might be difficult or impossible to discover exact equivalents for the native words in English, and the use of the original term most expressively conveys its meaning to those to whom the occasion of its employment is familiar, although they be not Oriental scholars: *Ryot* and *Ryotwár*, for instance, suggest more precise and positive notions in connexion with the subject of the land revenue in the south of India, than would be conveyed by cultivator, or peasant, or agriculturist, or by an agreement for rent or revenue with the individual members of the agricultural classes: in this and similar instances the employment of the original native term is recommended by the advantages of conciseness and precision.

In the far greater number of cases, however, the practice cannot be vindicated by an equally cogent plea, and must be ascribed to other considerations. It may sometimes, perhaps, be assigned to a pedantic affectation of conversancy with the native languages, but it may more frequently be attributed to indolence—to a reluctance to take the trouble of ascertaining the proper sense of the word, and of seeking for a suitable equivalent, even where such an equivalent is at hand, and where the original term denotes nothing peculiar or technical. It is scarcely necessary, for example, to introduce the word *Midde* in its native dress, when it signifies only "an Upper-storied house;" and "Widow" is quite as much to the purpose as *Avírá*, especially when the latter is barbarously transmuted to *Obeera*. It is very obvious, however, that whatever may be the familiarity acquired in some instances with the spoken language of the Courts of Justice and Revenue, that familiarity is restricted to a few of the dialects, and that a critical acquaintance, even with those that are understood, is far from common. This is very evident when, as is sometimes the case, an attempt has been made by officers of unquestioned efficiency in other respects, to analyse etymologically the terms they employ, particularly in regard to the languages of the south of India. Thus it is said by a functionary of more than ordinary merit, and one who was specially selected for his knowledge of the languages, that the last syllable of *Dessaye* is a Canarese term for "mother," when it is nothing more than the abridgment of *adhi*, "over—one who is placed in authority over a district." The same functionary explains *Desmukh*, literally the head or chief (*mukhya*) of a country (*des*), as meaning "ten blows," confounding evidently the Sanscrit *des*, "a country," with the Hindí *das*, "ten," and *mukha*, "face," with the Hindustani *muth*, "a fist."—East-India Selections, iv. 798. In fact, the whole linguistic stock of the major portion of the Civil Service was for many years a little Hindustani and less Persian; and it is only recently that attempts have been made to extend the range of attainment, and place it upon a sound and comprehensive basis.

Whatever the acquirements, however, of those with whom Indian official documents originate, it is undeniable that many of those to whom they are addressed, or for whose information they are designed, members of the Court of Proprietors, of the Court of Directors, of the Board of Controul, the Houses of

Parliament, the British public, pretend to no acquaintance with the languages of India, and to them an interpretation of the native words which come before them is indispensable. A few may have become almost naturalized by repetition, but by far the greater number remain unintelligible. Even of the meaning of those however which have been longest and most extensively current, precise ideas are not always entertained; and it may be doubted if there are many persons, of those who have not been in India, or who have no knowledge of Hindustani, who possess a ready and correct conception of the purport of such frequently recurring terms, as *Âdálat* and *Zamindár*.

But besides the great proportion of those who may feel it their duty to consult the records of the Indian governments for information, without pretending to any conversancy with the Indian languages, many even of those who have been educated for the service of the Company will be occasionally perplexed by the appearance of native terms with which they are unacquainted. The Company's servants at the different Presidencies are not expected to be proficients in the languages spoken in the territories of other Presidencies than their own, and yet they must find it of material benefit to be able to consult their records; while even in their own branch of the service, they will not unfrequently be crossed by unusual designations. The Persian or Hindustani scholar will not, therefore, always be competent to appreciate the value of the Sanskrit and Arabic vocables which constitute the language of Hindu and Mohammadan law. Those languages will but imperfectly prepare the Bengal civilian for Hindí, Bengalí, and Panjabí: they will be of equally little avail in the peninsula for the interpretation of terms pertaining to Tamil, Telugu, Karnáta, and Malayalim; and they will but lamely help the Bombay servant over the intricacies of Marațhí and Guzerațhí, to say nothing of Sindhí and Marwárí. Even with the scale of acquirements extended as far as may be reasonably expected, the great variety of the prevailing forms of speech in India renders it impossible, perhaps, that even all those which would be of service may be so mastered, that words derived from them will always convey the meanings they bear independently of such explanation as is to be looked for from a Glossary or a Lexicon.

Supposing, indeed, that a much more comprehensive and critical acquaintance with the languages of India existed than that which usually prevails, such knowledge will still not be always sufficient to enable its possessor to recognise a native word, however familiar to him in its original characters, in the unusual and often preposterous form in which it appears when represented by the English alphabet. Of course, English documents cannot admit Oriental letters; and Indian words, when transferred from their native garb to an English dress, are often so strangely disguised, that it is always difficult, sometimes impossible, to identify them. The causes of their transfiguration are easily understood: they may have been written down by the European functionary from native enunciation, agreeably to his conception of the sound, without advertence to the original characters, the only guides entitled to reliance: the ear is far from accurate, particularly the English ear, which is unaccustomed to a definite system of pronunciation in its own alphabet, especially as regards the vowel sounds. The consequences are, an entire misrepresentation of the original spelling, and a total want of consistency, the very same word being written in every possible variety of orthography. Another source of error is the employmont of a native amanuensis, who knows a little English, to write the word, and in all likelihood, he will diverge still farther from accuracy than his European superior. The term thus incorrectly and blunderingly set down has to be transcribed repeatedly by native copyists for transmission to higher authority, and eventually, perhaps, to England; and every time that it is re-written there is a renewed probability of error. In this state it comes home, and is here re-copied by English clerks, who are, of course, unable to correct the most palpable mistakes, and are fully qualified to commit more. In the last place, it has to be transferred to the press, the correction of which is entrusted to incompetent revision, and by which fresh blunders are copiously grafted on the already abundant crop. Many printed documents, of the first importance as to their subjects, and upon which very great expense has been incurred by the Company, have been rendered almost useless by the innumerable inaccuracies which disfigure almost every page. The collection, for example, known as Selections from the Judicial and Revenue Records, in four folio volumes, containing many most important and valuable documents, is all but spoiled by the perpetual recurrence of such errors as *Lokar* and *Sokar* for *Lohar; Sale* for *Lal; Derk* and *Desh* for *Derh; Pottar* for *Pot-dár; Swinjammy* for *Sarinjami; Kadarnaibh* for *Kadárambam*. Such as these admit of correction: others are more puzzling, but may be corrected conjecturally: *Bazar-heetick*, is no doubt intended for *Bazar-baithak; Mohcuddum Quaz* appears from the context to be designed for *Mukaddam-karz*;

and *Ooleim kaley* and *Muddum kaley* are intended for *Uttama káli* and *Madhyama káli.* Others, again, baffle conjecture. It passes my ingenuity to propose probable substitutes for *Barhee Mutputti, Herymut desa,* or *Quaeem seodi jumma.* The Selections are not singular in this respect, and strange perversions find their way into official reports, even when printed in India, where competent revision is more plentiful than it should be in this country. In the reports of the judicial proceedings in the Zila Courts we have *Jummee,* and even *Jemmy* for *Janmí,* "one who holds a birthright;" and *Halfan,* "by or upon oath," is metamorphosed to *Hul Fun.* Documents emanating from the highest authority are not exempt from such disfigurement. In the Instructions to the Settlement Officers from the Governor of the North-west Provinces we have *Dhurkast* for *Durkhast;* and in the Decisions of the *Sadr Âdálat* we find *Tun-khaw* for *Tankhwáh,* and *Joonmoohoostee* for *Junum-moohoortee,* "the hour of nativity." Now, whether these be blunders of transcription or typography, they are calculated to perplex even Oriental scholars, and are grave blemishes in documents emanating from authority, and intended to communicate information on which implicit reliance may be placed.

The deficiencies in this respect, of the published and unpublished documents relating to India, as well as the want of a more comprehensive key to the numerous native terms employed than any previously compiled, having been brought to the attention of the Court of Directors in August 1842, it was resolved to adopt measures for forming a Glossary of words in current use in various parts of India, relating to the administration of public business in every department, the want of which had long been found a source of much inconvenience. Under an impression that this could not be effected without the co-operation of the Company's servants locally employed in all parts of India, instructions were given to the Supreme Government of India to call upon the functionaries at the several Presidencies for their assistance. In order to serve as a guide for their proceedings, a rough Glossary, alphabetically arranged, was compiled in the India-House, taken chiefly from a list of words collected by the late Mr. Warden during his residence at Bombay, and from sundry printed collections; and a sufficient number of printed copies were transmitted to India for distribution to the several officers. In this Glossary the words were inserted purposely as they were met with, without any attempt to correct them, or to reduce their spelling to a uniform system; as, in the absence of the native characters, any attempt to represent the words in those of Europe might only have multiplied the obvious inaccuracies of the original collection: their correction was left to the Indian authorities, by whom the proper native orthography could be most readily ascertained, and they were instructed to return the lists in an accurate form, and accompanied by the native characters of the district in which the words were current. The authorities were also directed to add to the collection the many words that were known to be wanting, and to subjoin full, careful, and accurate explanations of their meaning. The copies were printed in such a shape as to admit of the insertion of the requisite additions and emendations, and several hundreds were sent out from time to time, with an expectation expressed that they would be returned in six months from the time of their distribution. The final arrangement of the whole work was to be committed to the compiler of the present publication.

After a much more protracted interval than that of six months, the rough Glossaries found their way back from Bengal and partially from Madras: from Bombay none returned. The latter default was not much to be regretted, for however judicious the design, its execution at the other Presidencies proved almost an entire failure. Many of the lists came back blank; of several the leaves had not been cut; in the far greater number, a mere pretence of doing something was displayed by the insertion of a few terms neither novel nor important; a few afforded some serviceable materials, especially when, as was frequently the case, the task had been transferred to the subordinate officers, Munsiffs, Amíns, Sadr-amíns, and Deputy-collectors, the uncovenanted servants of the Company. Some of these did furnish lists of native terms, of a useful description, written in both the English and native characters. Several of the native officers, however, misapprehended the object of the collection, and admitted a copious infusion of words which had no peculiarly official significations. More than one, indeed, in Upper India, turned to Shakespear's Hindustani Dictionary, and deliberately covered the blank pages of the Glossary with words taken at random from the Lexicon. The practice was too glaringly obvious to be doubted; but it was confessed to me by one of the perpetrators, Mir Shahamat Ali, whom I taxed with it when in England. He was an individual eminently qualified to have responded to the intentions of the Court as an efficient public officer, a scholar, and a man of ability; but so little interest was felt in India in the subject, such was the unwillingness to devote any time or trouble to the task, that even he evaded its performance. The same feelings pervaded the service in Bengal. At Madras, matters

were not much better. The returns were collected by the Persian and Telugu translator to the Government, Mr. C. P. Brown, and embodied in one compilation. The character which he gives of those returns shews that they were equally meagre and insufficient as those of Bengal. He has since printed them, enlarged with additions of his own, under the denomination of a *Zillah Dictionary*, the utility of which is somewhat impaired by the erroneous explanations derived from the documents with which he had been furnished. From his aggregate collection in manuscript, some useful terms, however, have been obtained, although their accuracy has been rendered occasionally questionable by the observations of the Board of Revenue on the printed form which was not received in time to be made much use of. From Madras, also, came two serviceable lists supplied by the Residents at Mysore and Hyderabad, Generals Cubbon and Fraser. From Bombay, as already observed, not a single list has been returned. The fate which has attended a measure so judiciously conceived, and so well calculated to have brought together a large body of valuable information of the most authentic character, is far from creditable to the public zeal and philological proficiency of the East-India Company's Civil Service.

One honourable exception must, however, be acknowledged. "Observing with regret that the call for information had not been responded to, except to a very limited extent, by any of the officers under the control of the Board of Revenue of the North-western Provinces," of which he was then a member, the late Sir Henry Elliot—whose early death has deprived the Bengal Civil Service of a most zealous and accomplished Oriental scholar, and an enlightened and efficient public officer—undertook to supply the deficiency, and to put together the information he had collected respecting the tribes, the customs, and the fiscal and agricultural terms current in Upper India. The collection was printed under the modest designation of a Supplement to the Glossary, and contains a number of local terms of the most useful and authentic description, arranged alphabetically according to the order of the English alphabet, but accompanied by the native characters, both Arabic and Sanksrit, and expressed according to the modified system of spelling devised by Dr. Gilchrist, as well as that of Sir William Jones. The greater portion of the contents of this collection are embodied in the present, but some, especially the articles relating to the different Hindu clans and tribes, have been necessarily abbreviated or omitted, as assuming a higher character than that of the mere items of a Glossary, being, in fact, memoirs subservient to the History of India. The north-west provinces of Hindustan limit the extent of the compilation of course to Hindí and Urdu terms, and unfortunately, also, the compilation stops with the letter J. As far, however, as the Supplement goes, it is a contribution to the compilation contemplated by the Court, of which the value and merit cannot be too highly estimated.

The first returns of the blank Glossaries from India having proved that little aid was to be expected from that quarter, it became necessary to look round for other sources of information; and in the first instance, at least, to make use of such as were in print. Of this class were Gladwin's Dictionary of Mohammadan Law and Revenue Terms, Rousseau's Vocabulary of Persian Words in common use in India, and the Indian Vocabulary of Lieutenant Robertson. For the south of India there were the technical terms attached to Morris's Telugu Selections, Brown's Gentoo Vocabulary, and Robertson's Glossary in Tamil and English of words used chiefly in the business of the Courts. There were also, for general reference, the Indices of the Regulations, whether attached to them separately, or as collectively formed by Dale, Fenwick, and Small, the Glossary of the Fifth Report, and, above all, the Dictionaries of all the principal languages, in which a great number of technical terms are necessarily comprised, although the explanations are not always as full and particular as could be wished. The most comprehensive of them in this respect are Major Molesworth's Maraṭhí Dictionary, Reeves's Karnáta Dictionary, and Mohammad Kasim's Dictionary of Guzaraṭhí. The Bengalí Dictionaries of Carey and Houghton are singularly defective in technical and colloquial words. Steele's Summary of the law and custom of Hindu castes in the Presidency of Bombay affords a mass of very valuable information respecting the west of Iudia, although sadly disfigured by an uncouth and unsystematic representation of the original words. These were, in the first instance, available: manuscript materials were at first less abundant, and the only collections in the India House were a Glossary of Maraṭhí terms of some extent and authenticity, compiled for the use of the Bombay Government, and a collection of Malayalim words compiled by the late Mr. Græme. The stock of manuscript materials was, however, speedily and importantly augmented.

A collection of Indian technical terms had been for some time in progress, made by my friend Richard Clarke, Esq., whose connexion with the Privy Council in the matter of Indian appeals had impressed him with the necessity of a general compilation of this description, and whose high position when in India as a judicial servant of the Madras Government, and whose attainments as a Tamil scholar, fully qualified him to

supply the want. He had accordingly been diligently engaged in the collection and arrangement of materials for such a work, and had accumulated a large quantity of the most useful words selected from the Regulations, from the Reports of the Committees of Parliament at different dates, from the Selections from the Records, from the early Reports of cases decided in the Ṣadr Âdálat of Calcutta, from Harington's Analysis of the Regulations, Ellis's Mirasi Tenures, Malcolm's Central India, Buchanan's Travels and Eastern India, and various other standard authorities. He had also formed lists of Mohammadan law terms, extracted from the Hidáya, Macnaghten's Mohammadan Law, and Baillie's Digest, and of Hindu law terms from Colebrooke's Digest and Law of Inheritance, Macnaghten's Hindu Law, and my Sanskrit Dictionary. There were also MS. collections of words in the languages of the south of India, accompanied, in some instances, by the native characters. These materials had been classed and arranged alphabetically, and constituted an aggregate of about six or seven thousand terms. They were written according to the system of Sir William Jones, but not accompanied by the native characters. The whole of these materials were most liberally placed at my disposal by Mr. Clarke, when he learned that I was occupied in a similar task; and the greater portion of them, all those which came within the plan of the present compilation, have been incorporated with it, after verifying them by reference to the authorities whence they were taken, and supplying, wherever practicable, the original native letters.

Copious as were the materials furnished by these different sources, it was very soon evident that the supply was far from exhausted, and that a great number of words employed in official documents still remained to be collected and explained. Public documents respecting the judicial and revenue and other departments of the administration of India have of late years been communicated to the public through the press with a liberality which, although no doubt in many respects of great public utility, might perhaps be now curtailed with advantage, as the voluminous extent of the publications may appal some who would wish to consult them, and deter them from availing themselves of the information. Thus we have in print Monthly Reports of Cases decided in the Ṣadr Courts of Appeal at Calcutta, Agra, Madras, and Bombay; Monthly Reports of the Cases decided in the Zila and subordinate Courts of Bengal, the North-west Provinces, and Madras, which have come latterly to average about 500 pages each, or 6000 pages per annum, or, altogether, 18,000 octavo pages annually. Besides these, the Settlement Reports of the Revenue Officers of the North-west Provinces have been printed, and, at all the Presidencies, Extracts from the Records for many years past have been published, or are in course of publication. All these documents abound more or less with native terms, which, if not in all instances strictly technical, are treated as officially current, and are therefore in need of interpretation. All these have been gone over for several years past, from 1846 to 1853, and such words as were not previously included have been added to the compilation.

Still, these, however ample, are not the only authorities which it has been thought advisable to refer to. Various other public documents are in print, calculated to supply additional materials, such as the Circular Orders of the Ṣadr Diwání Âdálat; Instructions to Settlement Officers emanating from the Government of the North-west Provinces; the particulars of the Settlement Miṣl, or Collection of Official Forms; and other similar Documents. Others, originating with private intelligence, have been also found of service, such as Smyth's Bengal Zamíndárí Accounts; the clever Tract in Urdu and Hindi, termed *Khet-karm*, or Field Business; the amusing and instructive "Revelations of an Orderly;" and a host of contributions to the Asiatic Researches, the Transactions of the Bombay Literary Society, the Transactions and Journal of the Royal Asiatic Society, and the Journals of the Asiatic Society and Agricultural Society of Bengal, of the Literary Society of Madras, and of the Branch Asiatic Society of Bombay. The great extent of these several authorities renders it impossible to have bestowed upon them more than a cursory examination, and there are, no doubt, still abundant materials to be gathered from them; but they have been consulted with more or less care, and from these and other works incidentally referred to, the collection has been carried far beyond the limit which was anticipated when the task was undertaken. The Index of the Glossary exhibits an aggregate of more than 26,000 words; and although many of them are mere varieties of spelling, yet the far greater proportion are leading terms, in their correct orthography, agreeably to the system which has been followed in representing Indian words by the letters of the Roman alphabet.

The only trustworthy representation of an Indian word is its native costume: it can never be thoroughly nationalised in any other: but as it has to take a place in English documents, and is addressed to those to whom it would otherwise be illegible, it is the especial object of the present compilation to give it as faithful an equivalent as the difference in the values of letters and the peculiarities of national enunciation will permit,

attaching to it at the same time, as a check upon the copy, the original delineation of the word in the letters of its own alphabet, wherever verifiable, for the use of those who are qualified to make the comparison. To be able to appreciate, however, the intention of the copy, and to make use of it with advantage, it is necessary that the principles upon which it has been developed should be properly understood.

The extreme and contradictory variety which prevails in the spelling of Oriental words has been often made the subject of remark, and not unfrequently of censure. The latter may not be always undeserved; yet those who condemn are not always qualified to judge, and they often exhibit in themselves a most perverse determination not to be set right. Above a century ago the most unexceptionable authorities established by their example how *Mohammed* should be spelled, or nearly so, but to so little purpose that it still is most common to write it *Mahommed*, and even *Mahomet* is still far from unfrequent. As long as this disregard of exactitude is so universal it little imports what animadversions may be passed upon the want of it by incompetent judges; but those who should know better, those who are acquainted with the original languages, are inexcusable when they write the native words without reference to their proper form, and without any consistent or systematic mode of expressing them, each individual writing it as he hears, or thinks he hears it articulated, and without paying any attention to its original alphabetical structure. It is undoubtedly true that many of those who are in the habit of hearing and uttering native words in the course of official duty are unfamiliar with their written forms, and will not take the trouble to acquire a knowledge of their alphabet. Even, however, when acquainted with the characters, they will not be at the pains of acquiring a systematic plan of representing them, but write them according to the fancy of the moment, and with a total indifference to consistency which produces the most needless and incompatible misrepresentations of one and the same word, to an extent that would scarcely be thought possible if it were not substantiated by daily experience, even in the most ordinary and simple words. It would, for instance, be thought impossible to represent *Lakhiraj* (from *la*, "without," and *khiraj*, "tax,") by any other letters, and the disciples of the two chief propounders of schemes of Oriental orthography, Sir William Jones and Dr. Gilchrist, would unhesitatingly concur in the representation; yet notwithstanding the concurrence of the two systems, and the simplicity of the original word, we meet with *Lakhiraj* under the monstrous disguises of *Lakerage*, *Luckeradge*, *Lackiraz*, *Lackerage*, *Laqueerauz*, and *Leeakeerazee*. It is high time that such monstrosities should no longer be perpetrated or tolerated, and that the only remedy of which it admits should be applied—the authoritative enforcement of a uniform system for the representation of the original letters by those of the English alphabet. For this purpose a system must be devised, and then it must be learned. The cause of the confusion is, chiefly, neglect of the latter. We have systems, good enough in their respective ways, but few or none will take the trouble to study and apply them.

The representation of Oriental words by Roman characters has not now for the first time to be considered: the question was most ably discussed nearly seventy years ago by Sir William Jones, and was placed upon its right footing in his Memoir, which judiciously prefaces the Researches of the Asiatic Society of Bengal, and commences the first volume, printed in 1788. There are but two principles involved in the adaptation of one alphabet to another: 1. an analogous classification of the *letters themselves*, according to their original arrangement; or, 2. the representation of *their sounds* in equivalents of similar enunciation; in other words, the one principle is analogy, the other, pronunciation. Sir William Jones adopts the former as the more simple, universal, consistent, and scientific, and as exempt from the anomalies and contradictions which the English alphabet presents, in which, as he ingeniously pointed out, every vowel and a diphthong may be used to articulate one and the same sound, as in the sentence "a mother bird flutters over her young," in which every vowel of the alphabet and the combination *ou* has the sound of *u* in *but*. He also instances, in the quotation from Malherbe, the absurd results that would follow an attempt to transcribe the original French passage according to even its French pronunciation,—an absurdity which we commonly, though not invariably, avoid in ordinary life by writing foreign names, not according to their pronunciation, but their original spelling. No one would think of writing *Paris* "Paree," *Rousseau* "Roosso;" nor, except in a conundrum, *Toulon* and *Toulouse*, "Too long" and "Too loose;" and it would be a sorry jest that should convert *Grisi* into "Greasy." We do not, therefore, follow sound alone in the Anglicising of European foreign words; and the principle is, if possible, still less applicable to the languages of the East.

Not very long, however, after the system of Sir William Jones had been adopted by the Asiatic Society of Bengal, the principle of pronunciation was taken up by Dr. Gilchrist, with relation especially to the

Hindustani language as written in the Arabic and Persian alphabet; and with great ingenuity he devised a scheme for expressing the letters of one alphabet by the other, according to their prevailing sounds. This plan he advocated with an earnestness which savoured something of extravagance; but his scheme, as finally developed as his Hindee-Roman Orthoepical Ultimatum, was, with one or two exceptions, exceedingly well adapted to its object, that of expressing with uniformity and consistency the Oriental characters in English letters, in such a manner that English readers, unacquainted with the former, would be enabled to articulate the words with a very near approach to their correct pronunciation. Here, then, is all that is wanted—two ingenious systems, one based on analogy, one on pronunciation; and it is only requisite that a person proposing to write Oriental words in Roman letters should make himself familiar with one or the other. It has been more congenial, however, to the natural indolence and self-sufficiency of writers on Indian subjects to study neither, but to blunder on without any previous preparation, to put down words at random, and mystify the public with all sorts of incongruous creations.

Although fully adequate to the determination of the principles on which the mutual adjustment of the Oriental and Roman alphabets ought to be grounded, yet some of the details of the two systems have been thought to admit of improvement, and different modifications of both have been from time to time proposed. The system of Sir William Jones was scrupulously adhered to by Mr. Colebrooke, and prevails in the Asiatic Researches, and in the Journals of the Asiatic Society of Bengal and of the Royal Asiatic Society; it was used, somewhat modified, by Sir Charles Wilkins, in his edition of Richardson's Persian Dictionary, and in Shakespear's Hindustani Dictionary; nearly unaltered in Rottler's Tamil, Campbell's Telugu, and Bailey's Malayalam Dictionaries; and, in a mixed form, in Reeves's Karnáta Dictionary. Major Molesworth, in his Maráṭhí Dictionary, follows generally Dr. Gilchrist's system. The public authorities in Bengal also usually observe a modification of Gilchrist's spelling, when they follow any system at all; but there is little uniformity in this respect. In 1834, a vigorous effort was made in Bengal to establish what was termed the Romanizing system, or the substitution of the Roman letters for the characters of the country, in all printed books, and the project is still in operation to a limited extent. Competent scholars from different Missions, Dr. Duff, and Messrs. Pearce, Yates, and Thomas; and distinguished Members of the Company's Service, Mr. H. T. Prinsep, the late Mr. J. Prinsep, Mr. John Tytler, and Mr., now Sir Charles Trevelyan, took part in the discussion, and their several communications were collected and printed at Serampore. The different modes of writing the Oriental words in Roman letters were then fully and fairly considered, and a system nearly identical with that of Sir William Jones was adopted. Again, in 1845, an intelligent and ingenious treatise on the mode of writing Oriental words, having especial reference to the present Glossary, by Mr. Crow, Deputy Collector, was published in Calcutta, who was wrong only in supposing that the crude spelling of the Draft Glossary was final. Still more recently, the subject has been taken up by the Missionaries of England and America, and some eminent German Oriental scholars and philologers; and several conferences were held, under the auspices of Chevalier Bunsen, for the purpose of fixing a standard in Roman characters for the expression of foreign forms of speech, whether possessed of alphabets or without them. Proposals for a Missionary alphabet founded on these discussions, have been published by my friend Maximilian Müller, Professor of Modern Languages in the University of Oxford. There is no lack, therefore, of careful and competent investigation of the subject; and although uniformity of practice has not been, and probably will not be, the result, yet an approximation has been made to it, and the principle of analogy, where alphabets exist, is recognised as preferable to that of pronunciation. Where the language is unwritten, sound must be more or less the guide; but with such forms of speech we have no concern, all the languages of the civilised races of India being provided with alphabets.

In the following pages the principle of analogy has been preferred, and the system of Sir William Jones has been pursued, with some modifications of detail, which will be particularised in the remarks on the table of equivalents, which will presently be given. Their object will be rendered more obvious by prefacing a few general rules for the conversion of one set of characters into another, and the observations which they suggest. The rules are in general harmony with those acknowledged as the basis of the Missionary alphabet. The observations have also reference to the propositions for its development.

I. The same letter should be invariably used to represent the same letter or the same sound: if *a* be chosen as the representative of the short vowel, it should never be allowed to alternate with *e* or *u*, *o* or *æ*.

II. The same letter should never be used to express two different letters or sounds.

On this account I object to the proposal to represent both *k* and *ch* by *k*, although etymologically there may be an affinity between them, as pointed out half a century ago by Dr. Gilchrist, in his recognition of the identity of *kirk* and *church*. Etymology, however, is admitted to be a somewhat unsafe guide; and I would restrict *k* to its guttural duties, on the same principle as, inconsistent with this rule, I conceive it objectionable to give a double office to *g*, although it has such a duality in English, as in *gin* and *gun*. It is proposed, indeed, to distinguish both the *k* and the *g* by printing them in italics when palatals, but the distinction is insufficient, as it is one of form, not of value, and is both uncouth and likely to be overlooked. My friend Müller's "*G*agatai *K*ingis khan" will be much more consistently and correctly written "Jagatai Chingis khan," *i. e. ch* and *k* each having but one power.

III. Simple letters should, as far as possible, be used for simple letters.

On this ground, objections may be taken to the use of *ch*; but although written as two letters, it has in English the power of but one: and although the nations of the Continent express it by combinations of a rather uncouth appearance, yet, as symbols have to be devised for sounds which are foreign to an individual alphabet, there is no good reason why one should not borrow of another. *Ch*, as a novelty, is not more novel than *k* as *ch;* and the one has an existence, which the other has not. On this, and on the use of aspirates as simple letters, we shall have further occasion to animadvert.

It is sufficiently obvious, that if an alphabet of twenty-four letters is to express one of fifty or more, some contrivance must be had recourse to, to extend the elasticity of the former. If the sounds are wholly and radically strange, new symbols must be invented; but if, as is most usual, they are only qualifications of sounds, of which, in the unmodified form, symbols exist, the latter may be adapted to these expressions conformably to the following:—

IV. Diacritical signs, lines, accents, or dots, are to be attached to the Roman letters, in order to enable them to represent modifications of the symbols or sounds which they themselves express.

The choice of these diacritical or distinguishing marks is matter of taste, or, more correctly speaking, of convenience. Sir William Jones objected to the ordinary modes of characterising long and short vowels as properly belonging to prosodial distinctions; and as the use of accents was familiar to some of the European languages, he preferred their employment, and distinguished the long vowels by the acute accent in the middle of words, and by the grave accent in the last syllable: he also characterised the cerebral consonants by the accent. Dr. Gilchrist's representation of the vowels proceeded on a different plan altogether, and he expressed them by special equivalents. In his earliest scheme he distinguished peculiar consonants by small circles above them, as *t̊*, *d̊*, &c.; but in his final alphabet he substituted dots underneath *ṭ*, *ḍ*, *ṣ*, *ẓ*, *z̤*, and the like. Mr. Shakespear, in his Hindustani Dictionary, uses both, lines above or below, and dots underneath, as *ā*, *ī*, *k͟h*, *ṣ*, *s̤*, &c.; and Mr. Crow proposes, in various instances, a line, or a line and dot, below the letter, as *a̱*, *i̱*, *ḵ*, *ḵ̣*. It seems inexpedient, however, to diversify the diacritical marks beyond the distinction of vowels and consonants, and the acute accent may be reserved for the long vowel, and dots underneath for the peculiar consonants: the latter have the advantage of being typographically more convenient, of being unobtrusive to the eye, and of being easily multiplied with any number of modifications of the original sound, as will be hereafter shewn.

V. The vowels are to have the powers which they enjoy in most languages except English, and especially in Italian; and, as in Latin, quantity is not to be represented by a difference in the letter, the long and short vowel being held to be one and the same letter, the former being distinguished by the acute accent in whatever part of the word it may occur, as *a*, *á*, *i*, *í*, *u*, *ú*.

It is in this respect that Dr. Gilchrist's system differs radically from that of Sir William Jones, and violates the rule with which we set out, as well as the preceding, in representing one vowel, varying only in the accident of quantity, by two or more, as the short *a* by *u*, the long by *a*, the short *i* by *i*, the long by *ee*, the short *u* by a new character, which he proposed to be *ꝏ*, and the long *u* by *oo*. There is no doubt that these equivalents represent to an English eye and ear the sounds of the original vowels more readily than the unaccented *a* or the accented *í* and *ú*; but they do not represent the original letters, and destroy all alphabetical identity. A vowel is the same letter, whether it be long or short, and in most languages, except our own, is so written. To represent the long vowel by one symbol and the short by another is to create a distinction where none exists, and to disjoin words which are closely connected. To change the short *a* to *u*, and leave *a* to represent the long, divides words which are essentially identical, and places one at the head and the other at the tail of a dictionary. *Dabee*, for instance, and *dubea*, are radically the same word: the

latter occurs in Sir Henry Elliot's Supplement at an interval of forty pages from the former; in the present compilation, as *Dábi* and *Dabiá*, they come as they should do together. However accommodating, therefore, to national peculiarities, the Gilchrist vowel system will never be universally adopted; and accordingly it does not form an element in any of the schemes proposed for the Missionary alphabet. We shall have further occasion to advert to this part of the subject.

VI. Consonants of the same elementary sound, modified only by pronunciation, but expressed by different symbols, are to be expressed by one and the same symbol, distinguishing it as the equivalent of the original sign by dots underneath the letter, multiplying them according to the multiplied variety of the original sounds.

The multiplied modifications of sounds may be expressed by separate signs in the same alphabet, or they may occur in different alphabets with their respective representations. Thus we have five or six nasals in the Hindu alphabets, and five modifications of *z* in the Semitic alphabets, each of which it is necessary to represent separately, both with regard to the appropriation of the word to the language to which it belongs, and to discriminate between words of very different significations, although very nearly similar forms. Thus, in Arabic, *kul* means "all;" in Karnáta, *kuḷ* is a payer of government revenue: they are not the same word, however, even in form: the final *l* of the Karnáta word being peculiar to its alphabet in figure, and slightly, perhaps, in pronunciation: it is therefore distinguished from the ordinary *l* which the same alphabet also possesses by a dot underneath. *Pát*, in Hindi, is "a leaf;" *Páṭ*, in Maráṭhí, is "a plank:" the difference is in the *t*, which, in the latter, is the cerebral, in the former, the dental letter: the cerebral then is to be distinguished by the dot. *Tár*, Persian, is "a wire;" *Táṛ*, Hindi, "a palm-tree:" the hard *ṛ* indicated by the dot marks an essential difference. In the mouth of a native there is no doubt a different enunication of these apparently identical words, but the distinction is not easily caught by the European ear; and as the general articulation is the same, it does not require to be represented by any other than a modified symbol. In proportion as these varieties increase, the diacritical dots may be multiplied to any required extent without becoming obtrusive or uncouth, as would be the case with accents; *ṇ̤*, for instance, is typographically less offensive than *n̄̈*. In some cases the marks may be dispensed with, as in that of the nasals, the value of which is commonly determined by the following letter, and *n* before *k* or *g* would be necessarily the guttural nasal, and *n* before *ch* and *j* the palatal letter; and, except for the sake of systematic consistency, would not need to be distinguished as *ṇ*, *ṇ̤*. It has been proposed in the scheme for the Missionary alphabet to represent peculiar consonantal symbols by italics, or the cerebrals of the Nágarí alphabet for instance, t, d, by *t*, *d*; but, besides that the presence of an oblique italic letter amongst the upright broad-faced Roman letters were offensive to the eye, the contrivance would be able to represent only a single modification. It could not, in the case of *t* be extended to the Arabic *to* (ط), and it could not be possible to repeat an italic *z* three times over to represent the Semitic letter *zo* (ظ), although that may be easily typographed as *ẓ̤*. The argument in favour of the italic letter is, that all founts are already provided with *them*, and not with dotted letters: the latter can, however, be provided with equal facility, if required.

VII. The aspirates of the original letters must be represented in European alphabets by a double letter, or the proper equivalents with the addition of *h*, as *kh*, *gh*, &c., considering the composite as representing a single sound.

We have here some slight difficulty as regards the English alphabet in the forms and powers of *ch*, *th*, *sh*: these, to be consistent, should be treated as aspirates, which they are not; and they therefore constitute exceptions to the rule, that a single consonant with *h* added is to be regarded as a single aspirated letter. In order to avoid the dilemma, Sir William Jones proposed to distinguish the aspirates by an apostrophe, separating the aspiration above, as in *aswatt'ha*; Dr. Gilchrist, by a comma below, as *b,h*, *k,h*, &c.; but these distinctions are inconvenient and scarcely necessary. There can be no misconception as to *ch* and *sh*, which in English and in Russian, as well as in the Indian alphabets, are simple sounds. *Th* with the sound of *theta* is not of frequent occurrence, and, if it be thought expedient, may be distinguished by a diacritical mark as a line underneath it, *t̲h̲*, or even the Greek letter Θ might be borrowed, as it would harmonise well enough with the Latin characters. So, if it be considered indispensable that a single symbol should be always employed for a single unaspirated sound, the Russian *ch* (ч) and *sh* (ш) might be pressed into the service.

VII. When it is necessary, as it is in the monosyllabic languages, and in some of those of barbarous nations, to express intonations, these may be designated by conventional marks or figures placed above or

below the letters, as has been proposed in the Journal of the American Oriental Society, Vol. IV. No. 2, by the Hon. C.W. Bradley, late Consul at Amoy; but we have no concern with these at present in the languages of the people subject to the government of British India.

In conformity to the tenor of the rules thus laid down, I have adopted for the representation of the Oriental words that occur in the subsequent pages the system of equivalents described in the following Table, in which it will be observed that the characters of the English alphabet have been enabled to represent letters, in nine alphabets of thirteen Indian languages, without the introduction of a single new character. I may not be found invariably to have adhered to the scheme as it appears in the Table, partly from my not having definitively determined all the equivalents when the compilation was commenced, partly from occasional inattention or forgetfulness, and partly for special considerations strongly recommending a departure from uniformity. These deviations are, however, only occasional, and the Table may be accepted as embodying the plan which I have conclusively adopted, and which I think will be found to provide for the representation of all the alphabetical symbols hitherto known in India. The progress of events may bring other alphabets within the range of similar representation, and to them the principles of the scheme will admit, it may be expected, of its adaptation.

REMARKS.

A a represents the short *A* of the Indian alphabets; it is found in English plentifully as an initial, as in "adore, amend, above." It occurs also as a medial in "woman," and as initial and final in "America," in all which it has the dull sound of the common English *u* in "bud, but." It is the equivalent proposed by Sir William Jones, although he allows its alternating with *E,* a licence incompatible with our Rule I. The *A* has had the concurrence of Sir Charles Trevelyan, of the Calcutta Missionaries, Mr. Shakespear, Mr. Crow, and has been most usually adopted in the Transactions and Journals of the several Asiatic Societies. The proposed Missionary alphabet suggests for the short vowel *œ, ĕ,* or *ŏ*; but these are not necessary, and would be inconsistent with Rule I. The same objection applies to Dr. Gilchrist's representation of *a* short, by *u,* however more congenial that may be to the practice of our own language, and although the *a* as representing the short vowel, constitutes a stumbling block in the way of English articulation, which, it must be admitted, it is almost impossible to overcome. It is very difficult, almost impossible, to induce an English reader to pronounce *Man* as *Mun, Pan* as *Pun, Sab, Sub, Thag, Thug,* and the like; but the difficulty may be surmounted with a little perseverance, and the spelling must be adhered to if consistency is to be observed. In conformity, however, to the prevailing prejudice, I have frequently inserted, in leading Hindustani words especially, the Gilchrist reading, as in *Man, Mun, Thal, Thul,* as parallel with the more correct form. Since, in the Index the letter *U,* either as an initial or medial, occurs twice over, the words that first come being identical with those having an initial or medial *A,* those that succeed having the proper vowel or Italian *U,* they are separated by a short line, thus, *Bhuda, Bhudahur,* equivalent to *Bhada, Bhadahar,* and the like, precede and are distinct from *Bhu, Bhuband;* and *Bubool, Buboor,* precede and are distinct from *Bú, Buá, Bubu,* and the like. Leading words commencing with *U* as *A*, or as the vowel proper, are also separately classed.

The short *A* of the other Indian alphabets is pronounced commonly in Bengálí as *O,* but it is not so written, the Bengálí being essentially the same as the Nágarí alphabet, and the value thus given to the vowel is merely provincial, and, in some degree, a vulgarism. I have not, therefore, altered the spelling, as the object of all the above equivalents is not the sound but the symbol, the letter as it stands in its own alphabet, and not as it may happen to be enunciated.

Á á is our letter in "far, ear," expanded sometimes, in the pronunciation of Arabic and Persian words into a broader sound, as in "ball, fall, water." It is admitted by all the systems as representing the long vowel. In the table it is distinguished, after Sir William Jones, by the acute accent. Dr. Gilchrist uses it unaccented, as he does not need to distinguish it from the short *A;* Mr. Shakespear marks it by the prosodial mark, a line above the letter; Mr. Crow would designate it by a similar line underneath; but there does not seem to be any reasonable objection to the accent.

The Arabic letter ع has always constituted a difficulty, owing not only to its peculiar articulation, but to its combining with the different vowel-sounds of *a, i* and *u.* Hence Meninski proposed to retain it unaltered, in which he has been followed by Richardson, Sir Charles Wilkins, and Mr. Johnson, and, in an abbreviated form, by Mr. Shakespear. Sir William Jones adopted this modification in his Grammar, but proposed in his Memoir to distinguish it by a circumflex, as *â, î, û,* which plan has been here adopted; the appearance of the character itself in the midst of English letters being anomalous, and, to persons not acquainted with the Arabic alphabet, unintelligible, as for *Duâát, Du*ع*át,* or for *Âhd,* ع*ahd,* for *Rabâ, Rab*ع, for *Khilât, Khilâ't:* Sir Charles Trevelyan agrees with Dr. Gilchrist in expressing it by a dot uuder the vowels: Mr. Crow would employ two dots; but as the letter is a peculiar one, it is perhaps best distinguished by a peculiar diacritical mark of its own. Its representation by *'h* in the proposed Missionary alphabet would be wholly inadequate to its verification, as in *Âmlah, Îlm, Ûmr,* and the like.

The diphthong *Ai* occurs in the word "aisle." For *Au* we have only, in English, the representative sound of *ou,* as in "hour," but the compound is $a+u$, not $o+u$; and the above therefore follows Sir William Jones's plan, which is generally concurred in. Dr. Gilchrist proposed to express them by *ue* and *uo,* but few even of his disciples have followed him. Mr. Elliot generally writes them *ei* and *ou,* as in *Beis* for *Bais, Gour* for *Gaur.*

B is uniformly rendered, as in "beat, bad." The aspirate *Bh,* as Gilchrist observes, may be represented in "abhor" dropping the initial; but it may be doubted if we have any exact equivalents in English for these

aspirated letters other than by the addition of the *h*, which, with the unaspirated letter, is to be regarded, as it is in the Oriental alphabets, a simple sound.

The scantiness of the Tamil alphabet, comprising but eighteen consonants, has compelled the assignment of multiplied powers to certain of the letters, to enable them to express the Sanskrit words with which the language is copiously infused: hence the equivalent of *B* ப is also that of *Bh*, and is more especially the representative of *P* and *Ph:* the differences of value depend, in this case and in the analogous instances of *K* and *T*, upon the position of the letter. As an initial, the ப represents *P*, and so it does when double in the middle of the word; but when single as a medial it represents either *B* or *Bh*. Thus, *Mahábhárata* is written in Tamil letters *Makápárata*, but it is pronounced by native scholars correctly according to its Nágarí valuation. Some difficulty occasionally occurs with regard to the reduplication of these letters as medials. According to Beschi, the reduplication has only the effect of preserving for the letter its proper sound, as *pagaippán* is nothing more than *pagaipán*. Rhenius, however, says that both are to be pronounced hard, as in *iruppu*, not as Beschi would make it, merely *irupu*. The preservation or rejection of the duplicate can only be determined by practice, the only essential point being the retainment of what may be considered the especial value of *P*, *K*, and *T*, as a medial when repeated.

C, except in the combination *Ch*, does not occur in the above scheme. Sir William Jones employed it to represent the *K* of the Nágarí alphabet, retaining the *K* for the harsher Arabic guttural; but in that case we employ two letters to represent but one, for the Arabic is only a modification of the guttural, not a distinct power. *C*, in English also, is an inconsistent letter, having, in fact, no power of its own but that of *K* before *a* and *o*, and of *S* before *e* and *i:* its use is therefore apt to mislead. It took me some time to read Sir William Jones's *Cocila*, not as *Kosila*, but *Kokila*, as it should be: so in a word in common use, *Circar*, we have one letter for two sounds, and two sounds for one letter, a breach of all system. *C* is therefore altogether discarded, except in the form of *Ch*, which, although written with two letters, is as much a simple sound in English as it is in Sanskrit. Mr. Crow proposes to represent it by *C*, but all other English orientalists retain the combination. The sound is peculiar in some degree to English and Russian, although the Italians have it in *ce* and *cio;* and its representation as *tch* or *tsch* in French and German is no doubt somewhat uncouth. For this reason, as well as to distinguish it from the guttural *ch*, as in *macht*, *nicht*, the German orientalists have latterly represented it by ĸ with an asterisk, as ĸ', and in the proposed Missionary alphabet the italic *K* is suggested. To this I have already objected, as employing one letter to represent two different letters, and therefore a violation of an important principle. There seems no reason for the non-adoption of the English form: in either case the equivalent is conventional: ĸ' or *K*, with the sound of *Ch*, is quite as much an innovation as would be the graft of *Ch* itself on the German alphabet. The power it possesses must be explained and agreed upon in either case equally, and its being confounded with the guttural *ch* might be obviated by a diacritical point or *ch̦*. If, however, a single symbol that could not be mistaken for any thing else were thought indispensable, it would be preferable to borrow the Russian ч. For English uses, however, it will be far the most convenient to preserve the combination. The aspirate of *Ch* or *Chh* is to be considered as a single sound.

Here, again, we have a case of the assignment of more than one power to one symbol in the Tamil alphabet, and *Ch* can only be expressed by ச, which has to do duty also for *J*, for *S*, and for *Sh*. It has the power of *Ch* when double, as a medial following certain letters or *ḷ*, or when single following *ṭ*, as in *kániyáṭchi*. In Telugu, *Ch* before certain vowels has the sound of *Ts*, as *J* has that of *Dz*, but these are dialectical peculiarities, and do not alter the identity of the letter.

D and *Dh*, as dentals, require no comment: they are the same in all systems. But we have another *D* and *Dh* which are cerebrals, and are pronounced harder than the dentals, the *d* especially often becoming in pronunciation like a rough *r*, as *ghoḍa* is pronounced *ghoṛa*. The letters, however, are the same. We have only to deal with modifications of sound, and these may be distinguished in all the consonants by a dot or dots underneath. Sir William Jones distinguished them by accents; but besides the advantage of confining the accent to the vowels, the form of the *d* renders an accent over it, as *d̄*, typographically inconvenient. Dr. Gilchrist's final use of the dot, concurred in by Mr. Shakespear and Sir C. Trevelyan, has been adopted.

The representation of *D* in the English alphabet by the same letter in the Oriental alphabets has one exception, and we have nothing for it in Tamil, as observed above, but *T*, which has the power of *T*, *Th*, *D*, or *Dh*, according to its position: it is *T* as an initial, or as a medial when double; it is *Th* or *D* when medial and single.

E has the power of the vowel in French or Italian rather than in English, but we have it in the word "there." In Sanskrit, it is always a long vowel, but in some of the languages of the south of India a more prolonged sound is sometimes given to it, and different symbols are employed for it. Sir William Jones and Dr. Gilchrist both represent it by one symbol, *E:* the former accents it, as in *Véda;* but I have thought it better to retain the accent for the more prolonged sound. The proposed Missionary alphabet suggests the italic *E* for the long letter.

F occurs with the same power in the Semitic alphabets. In the Indian dialects it has no representative, but the aspirated *P* or *Ph* takes its place, as *Faisala, Phaisala.*

G is the English letter in "go, gun," *Gh* in "ghost." In the two leading systems *Gh* is written *g'h* and *g,h*, but Mr. Shakespear and Sir Charles Trevelyan are satisfied with *gh.* The harsh Arabic guttural is a mere modification of the same sound, and is therefore indicated by *Ġh.* Jones and Gilchrist rendered it simply by *gh.* Shakespear underlines it *g̲h̲.*

For reasons already urged—the inconsistency of representing two different symbols by one, although in this case sanctioned by the practice of our own alphabet—I must object to the use of *G* with the power of *J*, as in "gin, general," as adopted by the German orientalists in the form of G', or as in the proposed Missionary alphabet in that of the italic letter *G.*

H occurs in various modifications in the Oriental alphabets, but they are mere modifications of the simple breathing, and may therefore be easily discriminated by dots: the two that are derived from the Arabic alphabet are not very nicely distinguished in Indian pronunciation. One may be something harsher than the other, and so far agrees with the strong Sanskrit aspirate, whilst the softer breathing of the Nágarí alphabet, the Visarga, or sign of the nominative case, may be regarded as peculiar. Sir William Jones distinguishes the harsher forms by an accent, as *Aḱmed.* Gilchrist and Shakespear distinguish it by a dot underneath it. I have transferred the dot to the softer Arabic aspirate, as otherwise it would have been applied to two letters instead of one, which would be typographically less convenient. I am afraid, however, I have not always observed or rightly applied the diacritical mark, having for some time hesitated as to its preferable application. The representation of the unmodified flatus by an apostrophe, in the proposed Missionary alphabet, as *ve'ement* for "vehement," is too uncongenial to European habits to be readily concurred in.

I short is as familiar to English as to the Continental languages, as in "kin, king." *Í* long is less familiar, but we have it in "police, pique, ravine." The accent is according to Sir William Jones. Gilchrist, as observed above, represents it by *ee*, which is objectionable on principle.

J in English, as in "just, join," corresponds exactly with the same letter in the Oriental alphabets. Foreign alphabets have it not, and, as has been observed, German writers propose to render it by G' or by the italic *G;* but this has been already objected to, as using one letter to represent two sounds; and, as of *Ch*, it may be said there seems no good reason why so convenient a symbol should not be borrowed from the English alphabet. The objection as relates to German is its present power in that language of *Y;* but as G' for *J* is equally strange to that alphabet, there is no ground for preferring one conventional sign to another, especially when the one is a fact as regards English, the other a fiction as regards both English and German. The aspirate *Jh* will follow the general analogy.

K is generally employed with its simple guttural power, as in "keep, king." The strong choking guttural of the Arabic alphabet is only a modified sound, which may be expressed by a dot underneath, as *Ḳ.* Sir William Jones, as above stated, reserved the *K* for the Arabic letter, and employed *C* for the simpler guttural. Gilchrist employed for the former, *Q*, without its usual qualification *Qu*, as in *Qazi*, in which he is followed by Sir C. Trevelyan. Shakespear marks it, as here proposed, by a dot underneath, which seems the simplest and most consistent mode of distinguishing it. To the use of K' or the italic *K* as the representative of *Ch*, I have already objected. The aspirate *Kh* is analogous to the preceding aspirates, and is to be regarded as a simple sound. There is also a minor aspiration as a final in Hindustání, arising from the omission of the following short vowel in the original, as *Bhukh* for *Bhukha.* This may be distinguished by a dot under the *h*, as *ḥ Bhukḥ;* but it is not perhaps material. Mr. Shakespear distinguishes it by a double dot under the *h*, as *kh̤.*

L, as in "Lord," needs no remark; but there are two other modifications of this semivowel which require to be distinguished. One of them, the *L* of the Vedas, is used in Maráṭhí, and in several of the languages of the south, being a rather harsher sound: this I have denoted as *Ḷ.* The other is peculiar to Tamil. Beschi says it is an *L* "quod crassiori sono reflexa omnino ad interiorem palati partem linguâ pronunciatur. Anderson calls it a cerebral *r* when medial, a cerebral *l* when final. Rhenius directs it to be pronounced

as *lr;* but the late Mr. Ellis represented it by *zh*, and he is followed by Mr. Clarke. As, however, there is sufficient authority for its being a modification of *L*, I have preferred adhering to that letter, marking it by two dots, as *ḷ*. The enunciation is singularly obscure, and cannot be precisely represented by any written characters.

M, as in "mouth, mother," is the same labial in the Oriental languages as in English. In Hindustani it is often represented before a labial by *n*, as in *Bambu*, sometimes written *Banbu*.

N offers a greater variety of symbols. There are four in the Nágari alphabet, all which exist in English, although not distinguished by separate letters, the distinction not being in the letter itself so much as in the influence exercised upon it by the letter that follows it, as a guttural, palatal, cerebral, or dental, as in the words "sink, change, ant, end," as I have shewn in my Sanskrit Grammar, p. 5. Hence it is, perhaps, scarcely necessary to provide the symbols severally with diacritical points, but they are added for the sake of consistency, as *n*, *ṅ*, *ṉ*, *ṇ*. There is another *n* which is peculiar to the Tamil alphabet, although little different from the dental nasal in sound: this I have marked as *ṉ*. Again, in Hindustání, and still more in Guzeráṭhí and Maráṭhí, there is a nasal, usually a final, though sometimes a medial, which is scarcely sounded, although it gives a sort of nasality to a preceding vowel, like the *n* in the French *bon, soins:* this it is proposed to denote by a small circle below the letter *n̥*. These marks, however, have not been very rigorously retained in the following pages.

O, like *E*, is in Sanskrit always long, but in the southern dialects there is a still more prolated quantity of it, which has been therefore marked by the accent. Perhaps it were more correct to treat the former letter as a short *e* or short *o;* but they are scarcely as short as our *e* and *o* in "bed" or "gone." They hold more of a middle place, and are as often as not of Sanskrit derivation.

P requires no remark: it is the English letter in "parent, pair." *Ph* is to be treated as a simple aspirate, as in "up-hill," not as an *F*, although, as there is no equivalent for it in the Indian languages, *Ph* is always used for such Arabic words as begin with *F*, as *Fakír, Phakír* The use of the Tamil *P* (ப) to represent *ph* as well as *b* and *bh* has already been pointed out.

Q is discarded from our system. Its employment for the Arabic *K*, as proposed by Dr. Gilchrist, has been noticed.

R offers various modifications. The usual semivowel has the sound of the letter in our "round, ruin." We have next a rougher *ṛ*, and its aspirate *ṛh*, which, in Hindustani, alternate with the cerebral letters *ḍ*, *ḍh*. Gilchrist, considering it as a nominal deviation from *ḍ*, did not think it necessary to assign it a separate symbol; but Mr. Shakespear discriminates it as here done, by a dot underneath. The alphabets of the south, Telugu, Karnáta, and Tamil, have a second and harsher *r*, which is similarly distinguished as *ṛ*. As, however, it is not, like the Hindustání letter, an alternation of *ḍ;* and as it offers some peculiar changes, it would have been better to have given it its peculiar mark, and written it with two dots, or *r̤*. In that case the third *r* of the Malayálam alphabet should be distinguished by three dots, not by two, as has been done in the following pages. The *r̤* of the Tamil and the *r̤* of the Malayálam are also, in some respects, identical, as, when doubled, they have the power of a double *ṭṭ;* thus *Ar̤r̤i* becomes *Aṭṭi*, in which form it appears in the Glossary, this being one of the cases in which a departure from systematic uniformity could scarcely be avoided.

In connexion with *R* we have further to provide for the vowel-sounds of Sanskrit *ri* and *rí*, modified in the southern dialects as *ru* and *rú*. A dot under the *ṛ*, as proposed by Dr. Gilchrist, is a sufficient distinction, *ṛi*, *ṛí*, *ṛu*, *ṛú*.

The modifications of the sibilant, as occurring in the same, or in different alphabets, require diacritical designations. The simple sibilant of the European and Indian alphabets, whether of Arabic or Sanskrit origin, is expressed by *S*, as in "sun, sound." The palatal *S* of the Nágarí alphabet has no exact equivalent in English, but may be indicated by *ṣ*, as by Shakespear: it is the *ś* of Sir William Jones. In the dialects it is commonly pronounced, in words of Sanskrit origin, as *sh* somewhat softened, and it is so represented by Molesworth, Stevenson, Reeve, and others. The main objection to this is its being confounded with the more genuine representation of *sh* in the Sanskrit cerebral, and in our "shore, shun;" and it is not exactly *sh*, although a thickened sound of the *s*. However, in conformity to a practice so general, I have given, in many instances of leading words, both forms, as *ṣ* and *sh*. The Arabic alphabet has another form of *s*, that called *ṣád* or *ṣwád*, which, in India at least, is a simple sibilant, although among the Arabs it may have a modified sound; by Erpenius it is called *Dad*, and by De Sacy, *Dhad*, making it a dental, but this is

not observed in India: to distinguish it from the Persian *sin* and Sanskrit *s* and *ṣ*, two dots are subjoined, as *s̤*. A third modification of *S*, agreeably to Indian pronunciation, occurs in what is more properly the English lisping sound of *th*, as "thin, then;" so that *thulth* becomes in India undistinguishable from *suls*. In order to denote the difference it is written in the scheme with three dots below, as *s̤̣*. In the Niskh alphabet it is termed *thai muthalatha*, or the trebly doted *th*, the dots being above, as ث. The *sh* of the Nágarí alphabet finds an exact representation in the English *sh*, which is not to be considered as an aspirate. It is a continental difficulty; but there seems no great reason why it should not be borrowed from the English alphabet, unless the Russian form be preferred, which has the advantage of being a single symbol.

T, the simple dental, has the same power in both families of languages as in English "tune, time." It occurs also as the cerebral letter in the English "ten, trumpet," and the Italian *tutto*. Its representation of *d* in Tamil has been explained above. In some of the dialects of the west and south, the dental *T* is pronounced almost like the English *th* in "thin;" but this is provincial, and the alphabetical character is merely *T*. *Th* and *Ṭh*, dental or cerebral, are to be regarded as simple aspirates, and never as the English *Th* in "think." If ever necessary to represent this sound, it might be done by placing the dot under *h*, as *Tḥ*, or by the use of the Greek Theta. The Arabic *to* (ط) has, in that language, its peculiar articulation, but it is still only a modified *T*, and in India no difference is made. It is sufficient to distinguish it by a double dot as *T̤*, as is done by Mr. Shakespear.

Although, as a principle, the representation of pronunciation is not attempted in the present scheme, yet occasional departure from the rule is not always to be avoided, as has been instanced in the case of the double *ṛ* of the Tamil and Malayálam becoming double *tt*. So, in the latter language, the cerebral *ṭ*, although correctly written, is with a singular perversity, so constantly pronounced as a cerebral *ḍ*, and that in words of constant recurrence, that to have adhered to the proper form would have tended to produce greater perplexity than a breach of the rule; thus *kuḍi*, and its derivatives *kuḍián*, &c., are properly written *kuṭi*, and *nád* is written *nát*; but they would not be recognisable under the correct spelling, and in these cases *ḍ* has been substituted for *ṭ*.

The vowels *U* and *Ú* have the Italian sounds proposed by Sir William Jones, and concurred in by Sir Charles Trevelyan, Mr. Shakespear, and the majority of authorities: we have the sounds as well as symbols in "full" and "rule." Shakespear marks the long vowel by the prosodial mark *ū*; Mr. Crow by the same under the letter *u̱*. Dr. Gilchrist adopts *oo* for the long *u*, and suggested a new combination, *ꝏ*, for the short. His disciples, however, have abandoned this form, and are content to write both the vowels in the same manner, as in the English words, "foot, fool." The proposed Missionary alphabet distinguishes the long vowel by the italic letter *u*

V has the same sound in Sanskrit as in English; but in Bengálí and Uriya it is always changed to *B*, in symbol as well as in sound; as *bári* for *vári*, *barsha* for *varsha*. The same change is not unfrequent in Hindí, as *baras* for *varsha*, *sambat* for *samvat*, whilst, in Guzaráthí, if we may trust the Dictionary, there is a curious propensity to reverse this arrangement, and write *v* for *b*, as *vígha* for *bíghá*, *vímo* for *bímá*. In all the dialects, also, there is a perpetual tendency to approximate the sound of *v* to that of *w*, or to substitute the latter altogether. Even in Tamil, in which the pure pronunciation of *v* is preserved according to Anderson and Rhenius, the change is not uncommon, and *váram* is most frequently written *wáram*. According to Mirza Ibrahim, the *wau* of Persian should be pronounced *vau*, yet in Hindustání words derived from Arabic and Persian it is quite as often *w* as *v*, as *wakíl*, *vakíl*, *wazír*, *vazír*. In Maráthí, according to Stevenson, we have both sounds, but for the same letter, व, the one exactly *w*, the other more like *v*, especially when before *i*, *í*, and *e*, and combined with *ṛi* or *r*. In Malayálam, Spring says it is *v*, and only *w* in composition, as *Swarga*. Peel and Bailey make it *w*; but the fact is that which is intimated by Mr. Clarkson, in his Guzaráthí Grammar, the uneducated approximate the sound to *w*, the educated to *v*. The use of *w* for *v* is, in fact, a sort of Indian Cockneyism, but as it is very prevalent, I have admitted the *w* to be the representative in various words of the Sanskrit *v*. As a final letter, *v* in the dialects often assumes the power of *u*, as in Guz. *pav* is pronounced *pau*.

It has been sometimes the practice to represent the Sanskrit *ksh* by the letter *x*, and there is no great objection to the equivalent; but *ksh* is an acknowedged compound of *k* and *sh*, and its representation, therefore, by a single letter would be unsystematic, neither is it necessary; and I have therefore, in the Glossary, always retained the compound form.

The semivowel *Y* finds unequivocal representatives in both classes of alphabets, as in "yoke, young." In Bengálí, when uncompounded, its power is that of *j*, a curious contrast to the German, which gives to *j* the power of *y*. The proposed Missionary alphabet retains *y*.

It is quite a characteristic distinction between the Sanskritic and Semitic dialects of India, that the former are utterly destitute of the symbol and the sound of *Z*, whilst in the latter we have no fewer than five modifications. In the original Arabic these letters have individual powers, but with the exception of *zh*, the sound which were best represented by the French *j* in "jour," no difference of pronunciation is made in India. As it is, nevertheless, necessary to preserve the distinctions of the form, for the sake of identifying the Roman with the Arabic orthography, this is effected by the same method that is followed in the case of other multiplied modifications by the number of dots, and the several symbols occur, as *z*, *ẓ*, *z̤*, *ż̤*; *zh* requires no mark, but it is to be regarded as representing a single letter.

By these simple arrangements, then, which do not pretend to the merit of originality, but are derived from the practice of those Orientalists who have devoted the most careful consideration to the subject, the various characters of nine alphabets current in India, amounting to sixty-four, have been, without any difficulty, represented by the twenty-four letters of the English or Roman alphabet. It is no part of the present inquiry to extend the application of the scheme more widely, but the principle could no doubt admit of its extension to all the modifications of those sounds which the similar conformation of the organs of speech in all the races of man establishes in all spoken and written languages. There may be occasional novelties, but the greater portion of articulate sounds must be the same in all languages, and their modifications do not change their identity. The Tamil *ḻ* or *lr* is still an *l*, and the Arabic *ḳáf* is a *k*; and they may, therefore be expressed by those letters, indicating their modified enunciation and use by diacritical signs. Of course, for the purpose of expressing such signs, special characters must be added to the types now employed in English alone; but the use once established, there would be no more difficulty in furnishing the Roman type intended for printing any foreign tongue, than there is now in equipping a fount with italic letters and the marks of punctuation.

This supposes a systematic plan for the representation of foreign tongues and Roman letters, but without insisting upon a very rigorous observance of the laws of such a system, it is obvious that it is very possible to introduce a scheme of equivalents which will advantageously displace the arbitrary, unphilosophical, and conflicting modes of writing Oriental terms, by which most publications regarding British India have hitherto been disfigured.

Any representation of the words of a language by other than its own characters will, however, be more or less unsatisfactory, and will fail to inspire implicit reliance, unless checked by a comparison with the original letters. I have therefore endeavoured to ascertain the original forms of the words in their respective characters, and place them in contiguity with their English representatives. As the Oriental characters are not given in the official documents, their verification has been effected only by a laborious search through Dictionaries and original authorities. In a very few cases I have been unable to verify the original spelling, and in that case, if the authority was questionable, have omitted the word: when, however, there was reason to believe it genuine, I have inserted the term with a mark of interrogation, as "Máö-Mawása (?) H." In some cases, the doubt has extended to the language, as in the case of "Hari, Haria," where the interrogation takes the place of the initial representing the language. In the case of the slang of the Thags, the words are taken from Colonel Sleeman's Vocabularies, which do not contain the native characters, and rest entirely upon his authority, the English spelling which, in his lists, follows the system of Dr. Gilchrist, having been adapted to that used in the Glossary. The names of the servile tribes, as given in the various public reports on the subject, are also unaccompanied by native characters; and, in general, sad havoc has been made with their orthography. In some cases they have been traced to their originals, and the names of others have been verified, by which, also, a source of much misapprehension, occasioned by looseness of language, has been corrected; as where it is said, in the Bengal Reports, that the slaves are termed *kaits*, *kumars*, *chasas*, *kaibartts*, and the like. They are no such thing: these are the names of castes who, for the greater part, are free and independent, but who furnish domestic or prædial slaves, their children being sometimes sold to slavery, or they become bond slaves themselves. There are, no doubt, slaves of these castes, but not by virtue of the caste, which is not necessarily servile.

The original alphabets amount to nine, the Arabic or Niskh character being applicable to Arabic, Persian, and Hindustání, and the Devanágarí to Sanskrit, Hindí, and Maráṭhí; the others have their respective individual alphabets. The preparation of so many unusual characters has been a matter of much cost, time, and trouble; but it is due to Mr. Watts, the printer of the Glossary, to acknowledge the invariable readiness with which he has supplied the requisite founts, constituting, with other Oriental types in his possession, a richness of Oriental typography which no other press in this country can boast, and which is rivalled only by the Imperial Press of Vienna.

Composition in such diversified and uncommon characters has unavoidably led to some inaccuracies, to the correction of which I have not been myself always sufficiently attentive. My friend, Professor Johnson, has supplied me with some errata, chiefly in Arabic and Persian, and it is probable that other Oriental scholars will discover more. In Tamil I have had the benefit, for the most part, of the revision of Mr. Clarke. But when all the circumstances are considered, the comparative infrequency of Oriental printing in this country, and the impossibility of obtaining qualified assistance in the correction of the press, it will not be thought, perhaps, that the errors are very serious, or exceed a limit that might reasonably be expected.

Some mistakes will, no doubt, be observable, which may be ascribed to an imperfect knowledge of the several languages from which the terms are taken, amounting to thirteen—Sanskrit, Hindí, Bengálí, Uriya, Maráṭhí, Guzaráṭhí, Tamil, Telugu, Karnáta, Malayálam, Arabic, Persian, and Hindustání, besides a few from other dialects. Of course I do not pretend to be conversant with all these tongues. Of some of them I may have acquired more or less knowledge, but of the greater number I have little more than the letters and the most elementary rudiments, sufficient to enable me to consult a grammar and a dictionary. The interpretation of the terms collected, however, it must be remembered, does not usually rest upon my responsibility. Their application, and, in some instances, their explanation also, lies with the authors of the documents whence they have been extracted; and there is evidence that the words are not always consistently used or accurately defined. In general, however, the sense of the words may be made out from the context, and their use is not so much characterised by the want of correctness as by insufficiency of detail and absence of precision. Errors of explanation, however, do occur, as in one report, where *Be-dánistagi* is explained "knowingly," when it implies exactly the reverse: it is possibly, however, a typographical error for *bá-dánistagí*, which would have the meaning of "with knowledge." Difference of interpretation, however, may occur, without any mistakes being committed, as the word possibly bears a different sense in different places. *Ahar*, for instance, usually implies a small pond, but in some places it means a continuous embankment. *Chatwar* is explained in one place "the land between the houses of a village and its arable land," and in another, "the homestead or ground adjacent to a house." Perhaps this is rather want of exactitude than a different meaning. In a recent document, *Foras* is explained "waste land adjacent to cultivated land, and granted tō the cultivators of the latter at a quit rent:" this is not wrong; but a subsequently printed report on the *Foras* lands of Bombay shews that it is not sufficiently comprehensive, the *Foras* lands forming an extensive part of the Island of Bombay reclaimed from the sea, which the inhabitants were encouraged to bring into cultivation by a low rate of rent. These are imperfections which the multiplication of authentic documents will gradually amend.

Even variations of spelling are not always to be regarded as originating in error: they may be local, arising from dialectic peculiarities, and the inability of one alphabet to express the letters of another. *Jamín* for *Zamín*, *Jamíndár*, or even *Jamídár*, for *Zamíndár*, are not wrong: they are the necessary forms which the Arabic words must take in the Hindí, Bengálí, and other Hindu characters, &c.; *Taâlluka* necessarily becomes *Táluk* in its Hindu version; and *Máphi* and *Mámlá* represent what are originally *Muâáfi* and *Muâámlat*.

In the arrangement of the contents of the Glossary I have thought it advisable to bring compound and derivative forms under their general parent, as likely to give a more definite notion of their purport. This classification has recommended the occasional introduction of words that may be regarded as not at all technical. *Áb*, "water," for example, is an ordinary Dictionary term, but I have inserted it at the head of its compounds, such as *Ábdár*, *Ábi*, *Ábistání*, which have a special or technical application, the force of which will be better appreciated when the meaning of *Áb* is referred to. I have, however, been chary of this extension, and many such general words will not be met with.

As a consequence of arranging compounds and derivatives under their respective primitives and radicals, a strictly alphabetical order has been departed from, and this has imposed the necessity of adding an

Alphabetieal Index. Sueh an addition was also indispensable, for another reason, eonstituting the main usefulness of the compilation. The forms under whieh native words occur in publie doeuments are mueh more frequently wrong than right—eorrupt and blundering misrepresentations of the original. Yet it is of them especially that the uninitiated reader requires to know the signifieation; and in order to provide him with this assistance, whatever eorruptions have been met with have been inserted. There are probably still more to be found, for it is impossible to affix limits to earelessness and ignoranee; but most of those whieh are most frequent have been, it is believed, included. In order to avoid repetition, as well as to shew what the words ought to be, the eorruptions are grouped round the eorrect form; as, *Kabúlíyat*, eorruptly *Cabooleat, Kabooleat, Cubalyt, Quobooleut, Coobooleat, Kubooleeat, Kaboolet, Caboolyat*; and the reader meeting with either of these has to turn to *Kabúlíyat* only, for its signifieation; but of eourse, without a previous knowledge of the eorreet form, he will be unable to recur to it, and the Glossary would be an instrument of whieh he eould only imperfeetly avail himself. This diffieulty is obviated by the Index, whieh is invariably alphabetieal, and in whieh, it is hoped, will be found whatever term may be desiderated, whether correet or corrupt. The referenees to page and column will not be attended with any material embarrassment: that whieh is made to the line of eaeh eolumn may be less readily effeeted from the omission of the figures whieh should have been inserted at least in fives or tens in the margin; but the advantage of sueh addition did not oecur to me until far advanced in the work; a little praetice, however, will soon render this referenee also suffieiently easy, especially as every eolumn contains the same number of lines, or forty-five. The preparation of this Index, the work of my own hand alone, has been attended with some labour and still greater delay, and has retarded the publication. It is, however, at last eompleted, and will, it is hoped, be found of use to the servants of the Company, and to all who, in England or in India, may wish to understand the objects and implements of the civil administration of the latter eountry.

Although these preliminary observations have perhaps rather exceeded the limits of an Introduetion, it will probably be expeeted that some aeeount should be given of the several languages from whieh the words of the following compilation are derived, espeeially for the benefit of those by whom the diversity of tongues that prevails in the territories of British India may be imperfectly appreeiated. This unaequaintanee with the polyglot nature of the eurrent speeeh of India is not eonfined to individuals who have had no opportunity of personal observation, but may sometimes be evinced by those from whom more aeeurate information might be antieipated. A distinguished public eharaeter, for instanee, a member of the late Committee of the Commons for the affairs of India, and long known to be eonversant with its interests, observed to me, when I had oecasion to mention Malayálam, that it was a language he had never heard of before; yet it is an aneient and eultivated form of speeeh eurrent through an extensive and well-known traet of eountry, and the vernaeular language of numerous suitors in several of the Judicial Courts and Revenue Collectorates under the Madras Presidency.

The languages of British India resolve themselves into two elasses, although in somewhat unequal proportions; the speeeh that has grown up from an admixture of the original languages of the Mohammadan eonquerors with those of the Hindus, Urdú or Hindustání, eonstituting one elass, the other being formed of the different dialeets of the Hindus. The former may be considered as perhaps more than equal in extent to any single form of the latter, but it is loosely spread, and at eonsiderable intervals, over the surface. It is eoneentrated only at the still subsisting Mohammadan eourts, as Delhi, Lueknow, Hyderabad. It is elsewhere restrieted, in a great measure, to the Mohammadans, by whom, in many parts of India, espeeially in Bengal, it is greatly eorrupted. It is very commonly in use among the native offieers of our eourts, espeeially in eommunieation with their European superiors; and it is extensively, although not always accurately, understood by the eommereial and trading elasses. It is understood, after a fashion, by the Sipáhís of the Gangetic provinees, but the agrieultural population are little, or not at all, aequainted with it, even in Upper India. In the South it is, of eourse, wholly unknown to them, and is very little understood by the other elasses. When the College of Fort William was first organised, liberal encouragement was held out to native Hindustání seholars to beeome instruetors, and many of the early teaehers were men of high literary distinetion among their eountrymen. Several of them, under the guidanee of Dr. Gilehrist, eomposed useful books, whieh were printed, and are still in use. Well-known Grammars and Dietionaries have also been eompiled by different European seholars, and ample materials, therefore, are provided for faeilitating the acquirement of the language. The Bengal eivilian is required to master it as one condition of his employment in the

Lower Provinces; for although Bengálí be the language of the people in most of the districts, yet, besides the use of the Hindustání in the Sadr Courts and in Calcutta, it prevails, in greater or lesser approximation to Hindí in the Zilas of Bahár, Purnea, Tirhut, Sáran, Bhágalpur, and Sháhábád, and is therefore indispensable even in the Presidency of Bengal.

Under the Mohammadan Government the language of judicial and revenue proceedings was Persian, borrowing lavishly from Arabic, in which the principal legal authorities are written; and until within a comparatively recent period, the English Courts followed the example of their Mohammadan predecessors, and all the proceedings were recorded in Persian. Although this is no longer the case, yet the employment of that language, and of terms derived through it from Arabic for centuries, could not fail to influence the spoken languages of the country; and Hindustání comprises a large proportion, perhaps a third, of Arabic and Persian words. They are not wanting in Hindí; and even the purer Hindu dialects of the South, Tamil and Telugu, are copiously interlarded with technical terms borrowed from this source, and more or less modified to suit the vernacular pronunciation.

As, besides the extensive use of official terms of Persian and Arabic origin, the latter is the language of the authorities of Mohammadan law, it has of course been necessary to comprehend it as well as Persian in a vocabulary of the judicial and fiscal nomenclature of India, as far as it owes its origin to them. A full and authentic description of the principal authorities on Mohammadan law, accessible in India by Mohammadans and Europeans, is to be found in the Introduction to Morley's Analytical Digest.

Although the Sanskrit has not supplied the administration of India with technicalities to the same extent as Arabic, yet, being the language of the laws of the Hindus, it furnishes, in its unadulterated form, a copious vocabulary of words relating to caste, to contracts, to inheritance, to marriage, and to a variety of the incidents of Hindu life; and it still more abundantly pervades the different Indian dialects, supplying them with the ordinary designations of trades and occupations, the terms of agriculture, the names of plants and animals, the affinities of relationship, and an infinity of words connected with the social circumstances of the people in all parts of India which come within the scope of the present compilation. Combined with Arabic, therefore, it forms the great groundwork of the official language of law, of revenue, and of manners and customs throughout British India. The absence of a competent knowledge of it is painfully displayed in most of the official documents, although the works of Colebrooke, Ellis, Sutherland, and Macnaghten, besides sufficient elementary works, render a conversancy with its technology at least of comparatively easy attainment. A like copious and learned account of Sanskrit authorities on Hindu law as that of the authorities of Mohammadan law is given in the same valuable work.

As the most direct offset from Sanskrit, we may begin, amongst the vernacular tongues, with the Hindí, although the term is rather indefinite, being scarcely applicable to any single modification of the language spoken by the thirty millions of the Hindus of Hindustan. Each province may be said to have its own form of Hindí; and in Bahar, Bhojpur, Benares, Bindraban, Delhi, various shades of it are known under the appellations of Mágadhí, the dialect of Magadha or South Behar; Maithilí, that of North Bahar or Purnea and Tirhut; Bhojpurí, that of Bhojpur; Púrbí, Eastern, Braj Bhákhá, or the speech of Braj, and others.

There is, however, a sufficient concordance to render any one form of comparatively easy acquirement to one who, in addition to a competent knowledge of Hindustání, possesses a stock of Sanskrit vocables; for the grammar of Hindí is, in the main, the same as that of Hindustání, whilst nine-tenths of its words are Sanskrit. There is, however, a great want of the necessary helps to its acquirement. The peculiarities of the Hindí dialects have never been investigated, and we have a grammar of only one of them, the Braj, which is somewhat meagre. There is nothing that deserves the name of a Dictionary. The books usually read, the Baitál Pachísi and Sinhásan Battísí, are little else than Hindustání disguised in Nágarí letters; and the Premságar is the only work that is an authority of any value. There is, however, a Hindí Literature of some extent, from which serviceable extracts might be made, particularly from the Rámáyana of Tulsi Dás, and the Mahábhárata of Gokulnáth, both of which have been printed, although little known in Europe. From these and other available sources, and from personal investigation, it would be very possible to analyse the specialties of each provincial dialect of Hindí, and thus render an important service to the philology of Gangetic India.

The next immediate offset from the Sanskrit is the language of those provinces of the Bengal Presidency in which Bengálí is current. The Presidency, as already observed, includes districts to which that language

is foreign, and in those in which it prevails, there are, no doubt, important local modifications. The Bengálí of Midnapur is probably somewhat different from that of Chittagong; I say probably, for, if possible, we know less of the dialects of Bengálí than of Hindí. Little was known of the language when the College of Fort William was founded. According to my late friend, Ram Komol Sen, in the Introduction to his English and Bengálí Dictionary, there were no adequate means of knowing much about it from the almost total absence of any literature. With the College came into existence the books at present in use: they were necessarily the work of Pandits, and they were consequently little else than Sanskrit compositions with a Bengálí grammatical structure. Of late years, elementary as well as other works have rapidly multiplied; and a list compiled by the Rev. Mr. Long shews a series of fifteen hundred publications in Bengálí from the presses of Calcutta alone. It is doubtful, however, if sufficient use is made of this opportunity of selection, and the publications in question are liable, for the most part, to the original defect: they are not the language of the people. This character applies especially to the best dictionaries yet published, those of Dr. Carey and Professor Haughton, both learned and laborious works, but works in which one may look in vain for a large proportion, perhaps the largest, of the spoken Bengálí. Here, again, is an ample field for investigation, the successful exploring of which would be not only of philological but administrative benefit. A real knowledge of the speech of another thirty millions of people should not be an object of indifference to their rulers; nor should the materials for its acquirement be suffered to remain imperfect, even if no loftier aim were entertained than that proficiency in Bengálí, which is required as a condition of public employment from the junior civilian.

Conterminous with Bengálí on the south-west is the province of Cuttak, in which the Uriya language, or that of Orisa, is current. It is framed from the Sanskrit stem, and of near affinity to Bengálí; but it has its own alphabet, grammar, and vocabulary. We have a useful grammar and dictionary of Uriya by Mr. Sutton, but the latter is scarcely sufficiently comprehensive. Of the languages of the barbarous tribes inhabiting the hills and forests of the western portion of the district, the Khonds and Gonds, very little is yet known: the population of the province is estimated at four millions and a half.

Of the direct descendants of Sanskrit, which are current in Central and Western India, Bundelkhand, Malwa, and the Rajput States, nothing is known beyond their general connection with the Hindí family: no attempt has ever been made, except in the Serampur translations of the Scriptures, to obtain any conversancy with them, or convey a knowledge of them to others; yet it is evident, from the quotations made by the late Colonel Tod from the great record of Rájputána, the Prithí Raï Raisa, that the dialects have national peculiarities, which must be acquired before a free intercourse can be maintained with the people. The same may be said of Panjábí, of which, at present, little or nothing is known, except as to its being one of the great Sanskrit family. Since, however, the province has been "annexed," we may hope to become acquainted with its speech, and elementary works are beginning to make their appearance, although on a limited and inadequate scale. A well-digested and comprehensive dictionary should be set about without delay, especially as in the Sikh books there are copious materials for such a compilation, not forgetting, however, as has been too often the case, the spoken language of the people.

Proceeding westward and to the south, we come to two important languages, which are those of the Courts and Collectorates of the Presidency of Bombay—Guzaráthí and Maráthí, both members of the Sanskrit stock. Little has yet been done for the first of these, and for many years we had nothing to apply to but the very elementary work of Drummond, the Rudiments of Guzeráthí and Maráthí, published in 1808. In 1829 a more copious grammar, by Mr. Forbes, of the Civil Service, was lithographed at Bombay, and a second edition was printed in 1845: since then other useful grammars have been published. We have also a dictionary by Mirza Mohammad Kasim, which, although of limited extent, is very serviceable as far as it goes. The population of the country is somewhat uncertain, but it is estimated at about three millions. The Zila Courts in which the language is chiefly required are those of Ahmadabad, Baroch, and Surat.

The language of the Maráthas is still more important, as spoken by a still more numerous body of people, and more diligently cultivated both by natives and Europeans. It has a copious literature of its own, and this has been enriched by translations from English works of literature and science, as Duff's History and De Morgan's Algebra. The Missionaries have also published a great number of tracts and translations. We have several useful grammars and the very best dictionaries of any native tongue in Molesworth's Maráthí and English Dictionary, an improved edition of which is in progress, and Molesworth

and Candy's Dictionary, English and Maráthí. In these works we have what is so much missed in other similar compilations—the language of the people as well as the language of the books. Still, however, something has to be effected, particularly with respect to the dialects of the Maráthí. That spoken in the Konkan, for instance, differs so much from that which is current on the east of the Ghats, that the Serampur Missionaries translated the New Testament into it as if it had been a distinct form of speech, which brought upon them the scarcely deserved severity of the late Colonel Vans Kennedy's criticism. Very possibly there are other modifications of which a knowledge would be of service. The population by whom, in one or other form, Maráthí is spoken, is rated at about eight millions. The Zila Courts in which it is principally current are Ahmadnagar, Ratnagiri, Khandesh, Puna, Konkan, and Sholapur. At Dharwar it is mixed with Karnáta. Formerly, a knowledge of either Maráthí or Guzeráthí was required as a condition of public service by the Bombay Government, but either was made secondary to proficiency in Hindustání; and as it was the practice to attach the young civilian to the Court of a Judge or Collector before his proficiency had been tested, it commonly happened that no test was ever applied, especially with regard to a second language, and the latter was left to independent and voluntary exertion: of course the acquirement was rare. Very recently, however, more stringent measures have been announced, and the Bombay civilian is expected to qualify, in either Maráthí or Guzeráthí, in nine months at furthest, under penalty of removal from the service: the term allowed is something of the shortest.

The Presidency of Madras embraces a greater variety of distinct divisions and of languages than that of Bombay; and here we also lose that direct descent of the native languages from the Sanskrit which is so unmistakeably evident in the Hindu languages of Central and Northern India. Modern philology traces those of the South of India to the Ugrian, Tatar, or Mongolian stock, difficult as it is to comprehend how or when the population of the Dakhin immigrated from the steppes of Central Asia. Whatever the origin, however, of these languages, they are dependent upon Sanskrit, in a greater or less degree, for their literature, and for the language of their religion, their institutions, and their government. Although they are all nearly connected, yet there are obviously two main divisions, one comprehending Telugu and Karnáta, the other Tamil and Malayálam; and we shall proceed to offer a few notices of them in that order, derived especially from the remarks of the late Mr. Ellis, the most accomplished oriental scholar that has done credit to the civil service of Madras.

The Telugu, as stated in Mr. Ellis's memoir, forming part of the Introduction to Campbell's Telugu Grammar, is the vernacular language of the Hindus on the coast of Coromandel, extending from the Dutch settlement of Pulicat on the south, just above Madras, northwards through the Northern Sarkárs to Chikakol, and spreading westwards from the coast to the frontiers of Maisur on the south, and on the north through part of Berar and the territories of the Nizam; meeting on the north with Uriya, on the west with Maráthí and Karnáta, and on the south with Tamil. It is consequently the language of the Zila Courts and Collectorates of Belari, Gantur, Nellur, Rajamahendrí, Chikakol, Kadapa and Masulipatam, as well as the non-regulation districts of Ganjam and Vizagapatam, and is current, according to estimate, amongst nine millions of people. There are good practical grammars of the language by Messrs. Campbell and Brown, of the Madras Civil Service; and to the former we owe a dictionary, Telugu and English, of which the only defect is its want of comprehensiveness. Reversed dictionaries of English and Telugu have been published by Messrs Morris and Brown, and the same gentlemen have supplied very useful selections for study. There is a considerable body of literature in Telugu, principally consisting of translations from Sanskrit, which enters extensively into the body of the language. A knowledge of Telugu is required of the civil servant of Madras before he is capable of public employment.

The Karnáta, or, less accurately, the Canarese language, has an alphabet scarcely differing from that in which Telugu is written, and the radicals of the two languages are essentially the same: a large proportion of the words are also the same, whether indigenous or Sanskrit, modified by slight variations of inflexion and peculiarities of pronunciation. There is a literature partly original, but, in a still greater degree, translated from Sanskrit; but no Karnáta works had been printed until lately, when encouragement has been given to the publication of lithographed copies of some popular compositions. We have, however, long had a serviceable grammar and dictionary of Karnáta, the former by Mr. M'Kerrell, a Madras civilian, published in 1820, and the latter, both Karnáta and English, and English and Karnáta, in four volumes quarto, by Mr. Reeves, of the London Missionary Society. The former follows Captain Wilks in his description of the

limits through which the language is in use—from Bedar, north-west of Haidarabad, passing by Adoni and through Nandidrug to the Eastern Ghats, the course of which it follows until it passes by Koimbatur, and, running to the north-west, ascends to the sources of the Krishna, whence it returns to Bedar. It is used also, but with other dialects, on the sea coast in the interval between the Principality of Kurg and the Portuguese territory of Goa, to which tract the designation of Canara is, with questionable propriety, restricted. The Zila Courts where it is chiefly employed are those of Honawar, Mangalur, and Dhárwár; but it is in use generally throughout Maisur. The population of whom it is the vernacular are estimated at about two millions. Encouragement is held out, in the shape of pecuniary rewards to the junior civilians of the Madras Presidency, to acquire some knowledge of Karnáta in addition to those languages which are indispensable, or Tamil and Telugu.

The Tamil language is one of those of which a knowledge is highly essential in the provinces subject to the Presidency of Madras, and it is accordingly one of the two of which the study is now imperative on the Madras civilian. It is the language of the country termed, in Sanskrit, Drávira, comprising the provinces of the Coromandel coast, from a short distance north of Madras to Cape Komorin, and extending inland to the limits of the Karnáta language. It comprises, therefore, the Presidency Courts, and those of Arcot, Salem, Koimbatur, Kumbhakonam, Trichinapallí, Madura, Tinivelli, and is spoken, it has been estimated, by five millions of people. There are two dialects, or, perhaps, rather styles of it—Shen and Kodun, or high and low Tamil—in both of which there is a copious literature, Tamil having been highly cultivated at as early a date as the ninth century, when a college, established at Madura for its especial encouragement, was in a flourishing condition. Ample means for the acquirement of its structure exists, as the Missionaries of both the Roman and Protestant Churches have long ago contributed ably to its illustration. Beschi's grammar of the common dialect was published in 1728, and that of the higher Tamil has been translated by Mr. Babington. A grammar of the current language, by Ziegenbalg, was printed in 1716. The originals of these were in Latin, but more recently an excellent grammar has been published by Rhenius, in English. We have also an English Grammar by Mr. Anderson. We are indebted to the Missionaries also for Tamil dictionaries, but the first published is printed in an uncouth type and on bad paper, and is now scarce. A much more comprehensive dictionary, Tamil and English, was undertaken by the late Dr. Rottler, and has been printed in four parts. Unfortunately it was left by the compiler unfinished, and it has been printed in a defective state, long lists of Tamil words being inserted without any English interpretation. The portions which are translated form much the larger share, and the manner in which what has been done is effected enhances the regret that some competent scholars should not have been employed to render the work entire. The language is difficult of acquirement, but with these helps it is to be mastered. It is no doubt, in its origin, independent of Sanskrit, but, to judge from the dictionary, admits of Sanskrit insertions as freely as any other of the southern dialects. It is also peculiar in its dealings with Sanskrit words, so that, without a previous knowledge of the latter, it is scarcely possible to recognise them in their Tamil form. It has, as shewn above, a scanty alphabet. It has no aspirates, and abhors compounds; and therefore substitutes unaspirated letters for the former, and resolves the latter into syllables; *Bhárata*, therefore, becomes *Párada*, and *Grámam*, *Kirámam;* for *Sïva-prakása* we have *Siven-pirikasan,* and for *Tattwam, Tattuvan.* It is evident that Tamil scholars who are not Sanskrit scholars also must be continually embarrassed by these equivocal expressions.

Radically related to Tamil, but employing a different alphabet modelled on the Devanágarí, and differing very frequently in its grammatical structure, is the Malayálam or Malayálma language, which is spoken along the southern portion of the Malabar coast from Quilon to Cape Kumarí. North of Quilon, as far as to Goa, the Tuluva, which is a distinct dialect, although of the same derivation as the Malayálam, is the provincial form of speech, though much intermixed with other dialects, especially Karnáta; and, according to Mr. Ellis, the Koduga or Kurg language is a modification of Tuluva. The Kurg Raja, however, when in England, wrote in the Karnáta character, and declared that to be his native tongue. Besides the relation of the order of the alphabet, the Malayálam abounds, more perhaps than either of the other dialects of the south, in Sanskrit derivations, in a proportion exceeding a half, equal perhaps to three-fifths of the whole under the two heads which Mr. Ellis specifies as common to the dialects of Southern India, *Tat-samam,* pure Sanskrit words, or *Tad-bhavam,* derived from Sanskrit. The *Desya,* or native words of the country, may also be divided into Tamil *Tatsamam,* or pure Tamil, and Tamil *Tadbhavam,* derivatives from Tamil.

There are several serviceable grammars of the language. One was published by Mr. Drummond, of the Bombay Medical Service, soon after the province was subject to British authority, or in 1799;—but this is now superseded by the grammars of Mr. Spring, of the Madras Civil Service, and the Rev. Mr. Peet, of the Church Mission Society. There are also good dictionaries, Malayálam and English, and English and Malayálam, by the Rev. Mr. Bailey, of the same Society. There is a dearth of printed books, but something has been lately done to provide students with the means of study. Malayálam is the language of the Zila Court of Kalikat, or Calicut, and it mixes with Karnâta in the Courts of Honawar and Mangalur. It is spoken by about two millions and a half of people, inclusive of North and South Canara.

These are the principal languages of British India, but there are others which are of growing importance, although not yet forming objects of official requisition. In the north, the Bhot dialects, which spread through the Himálaya districts, are of Tibetan origin, and terms from the latter find their way into the language of administration. The grammar and dictionary of Csoma Körösi are the only means of becoming conversant with the language; and no English scholar has yet trodden in his steps, although Petersburgh and Paris can boast of cultivators of Tibetan. The Panjábí, of course, becomes of primary importance; and our intercourse with our neighbours, the Affghans, renders Pushtu a valuable acquisition; but nothing has yet been effected towards facilitating the acquirement of the latter beyond the very circumscribed grammar and vocabularies of Lieutenant Leech, or of the former, except the similar publications of the same intelligent officer, and a grammar, vocabulary, and dialogues, by Captain Sterling. On the west, a knowledge of the language of Sindh has become essential; and here, also, the means are yet limited, although they begin to be supplied in a grammar and short dictionary by Captain Stack. Of the dialects of the Hill tribes on the east, from Asam to Arakan, all that is yet known is from the comparative vocabularies of the Rev. Mr. Brown and of Mr. Hodgson, the object of which is rather comparative than practical. When we get to Arakan we come upon the Burma language, a knowledge of which, since the annexation of the provinces along the coast from Arakan to Tenaserim, is indispensable to the government of an extensive tract of country and a numerous population. There are grammars of the language, sufficient to enable the European to acquire it, by the late Missionaries Judson and Hough, and by Captain Latter. There is also a good English and Burma dictionary, by Mr. Lane; but a comprehensive Burma and English dictionary is still a desideratum. There is a want, also, of printed books, which might easily be multiplied from the copious stores of Burma literature, both historical and Buddhist.

To give liberal encouragement to the preparation and publication of these and similar works in all the languages current in the wide provinces and among the many millions of people subject to its authority is the positive duty and the obvious interest of the Government of British India. Much has, no doubt, been accomplished; but it may be questioned if the encouragement that has been given has been always judiciously bestowed. The efforts of individuals must always be desultory, and will often be ineffective. There wants a systematic course of proceeding, and the selection of competent agents; and it might be worth while to adopt official arrangements for ascertaining what has been done, and what remains to be done, towards providing the civil and military servants of the Company with ample and adequate means of acquiring a command of all the languages through which they may have to minister to the necessities and claims of the different races amongst whom the course of service may call them. In the meanwhile the following pages will, it is hoped, contribute to facilitate their acquirement of the qualifications which are indispensably necessary for the due performance of their important functions—knowledge of the languages, and knowledge of the people, of India.

GLOSSARY.

Áb, H. (آب, contracted from the A. ابو *Abu*) A father.

Ábái, H. (اباي) Patrimonial, descending from paternal ancestors (land, property).

Áb, H. (P. آب, S. आप:) Water.

Ábdár, H. (آبدار) A servant whose office it is to prepare water for domestic use, or for drinking.

Ábdár khána, H. (آبدارخانه) The room where such water is kept in suitable earthen vessels.

Áb-páshi, H. (آبپاشي) Irrigating fields, watering fields; *lit.* water-sprinkling.

Áb-rawán, H. (آبروان) Running water; *metaphor.* Fine muslin.

Ábí, H. (آبي, *lit.* Relating to water, watered). In the north-west provinces it is applied to land watered from ponds, tanks, lakes, or water-courses, in distinction to that which is watered from wells; as the supply from the former is liable to fail in the hot season, *Ábí* land is assessed at a lower rate; in some cases at less than a half of that watered from wells.

Ábistáni, H. (آبستاني) Land artificially irrigated.

Áb-khez, H. (آبخيز) A soil impregnated with water, moist or wet soil.

Ábkár, H. (آبكار) A manufacturer or retailer of spirituous liquors; *lit.* a maker of (strong) waters.

Ábkári, also written Abkaree, Abkary, Abkarry, Aubkaury, H. &c. (آبكاري), or in Telugu, Ábukári, (అబుకారి) Revenue derived from duties levied on the manufacture and sale of inebriating liquors, as *tári* or *toddy*, *pachwai*, *arrack*, &c., and on intoxicating drugs, whether in substance, infusion, or extract, as *opium*, *bhang*, *chiras*, &c. It is levied on certain licenced distilleries, or in fees for licences granted by the collector to retailers. In some parts of the south of India the *Ábkári* included duties on eating-shops, gaming-houses, itinerant tumblers, jugglers, and the like. [In the Report of the House of Commons, 1832, p. 95, it is said to comprehend duties on pepper and betel; but this is a mis-statement, as no such duties are levied; although, in Mysore, the areka-nut was sometimes included in the Ábkári farm.] The principal Regulations in Bengal for the Ábkári duties are xxvii. 1793, x. 1813, xiii. 1816, and vii. 1824

Ábkári Dárogha, H. (آبكاري داروغه) The head native officer appointed to superintend distilleries, spirit-shops, and the like.

Ábkári Mahál, H. (آبكاري محال) The department or office of *Ábkári*, the excise.

Abáb, Mar. (अबाब, from A. *Abwáb*, q.v.) A particular item in revenue accounts: the grain falling to the share of the Government after deducting the portions of the several sharers.

Ábád, H. (P. آباد). The word is very generally adopted; as Hindi and Mar. (आबाद), Beng. (আবাদ), Telugu (ఆబాదు), Populous, cultivated, as a village or tract of country; the reverse of *Wirán*, (ويران), waste, deserted. A village or tract which is designated in revenue phrase as *Ábád* is one from which revenue may be levied: in military topography it denotes a place where supplies may be expected. It occurs also, though less commonly, as *Ábádán* (آبادان). *Ábád karna* means, to introduce or extend cultivation or population, to settle, to people; whence may arise a claim to property through descent from the *Ábád-kár*, the originator or founder. As the second member of a compound *Ábád* often denotes a city, as *Akbar-ábád*, the city of *Akbar*, or Agra, which he made his capital; *Aurang-ábád*, the city of *Aurang-zeb*; *Murshid-ábád*, the city of *Murshid Kuli Khan*, Governor of Bengal, by whom it was enlarged and embellished; *Sháhjahán-ábád*, the city of *Sháhjahán*, or Delhi; with many others of Mohammedan origin and improvement. From the attributives *Ábád* and *Ábádán* come the substantives *Ábádi*, *Ábádáni*, Populousness, cultivation: in Bengali the meanings have been transposed, *Ábád* (আবাদ) signifying cultivation, populousness, and *Ábádi* (আবাদী), cultivated, peopled.

Ábád-beshi, H. (آباد بيشي, from P. *béshi* بيشي, Excess). First assessment of newly-settled or cultivated land.

Abarátam, Tam. (அபராதம், from S. *Aparádha* अपराध, Fault, offence, in which sense it also occurs in most dialects). Fine, amercement, forfeiture.

Âbd, Ûbd, H. (A. عبد, plur. *Âbíd* عبيد) A slave, two descriptions of whom are alone recognised in Mohammedan law—infidels made captives in war, and their descendants. In practice much greater latitude is allowed, although not strictly legal; and a title to slaves may be acquired by purchase, donation, or inheritance. The term enters largely into the formation of Mohammedan proper names, as *Âbd-ullah*, slave of God; *Âbd-âli*, slave of Ali; *Âbd-ul-málik*, the slave of the Lord (God). It is also frequently prefixed in affectation of humility to the official signatures of native officers, whether Hindus or Mohammedans; and in law papers it is sometimes prefixed to the name of each subscribing witness.

Ábdá, Ben. (আবদা, S. अब्द, a year). The period during which a party who reclaims waste land is allowed to hold it rent-free. The rent remitted. The land so held. [The term in this sense is confined to Eastern Bengal and Chittagong.]

Abdhút, Ubdhoot, H. (S. *Avadhúta* अवधूतः) A religious mendicant of the Hindus, one who professes to have "shaken off" the infirmities of humanity. In Hindustan the *Abdhút* is generally of the *Vaishṇava* sect. In the south it is said he is usually a *Ṣaiva* mendicant.

Ábédak, Beng. (S. আবেদক *ávedaka*) A complainant or suitor, a petitioner.

Ábedan, Beng. (S. আবেদন) A petition, a plaint, an affidavit.

Ábedan patra, or *Ábedan lipi*, (S. আবেদন পত্র, or লিপি) A written plaint or petition, a representation in writing.

Abhar, Ubhur, Mar. (अभर) The collections from a village in the Marátha country. *Kacha Abhar*, The gross collections, without any deduction.

Abhaya, Ubhuyu, Mar. (S. अभय, from अ neg., and भय, fear), An assurance of safety or immunity.

Abhayaḍinḍima, Mar. (S. अभयडिंडिम) A proclamation by beat of drum (*ḍinḍima*) of general security to all who submit in the case of a captured town or conquered country.

Abhaya patra, S. &c. (अभयपत्र) A written document in assurance of safety, a safe conduct.

Abhichár, H. (S. अभिचारः) Employment of charms or spells for the destruction of an enemy.

Abhipaṭṭi, Ubhipuṭṭee, Mar. (अभिपट्टी) Any extra cess or assessment [under the Peshwa's Government.]

Abhír, Ubheer, H. &c. (ابهير, S. अभीरः, also, with the initial long Ábhíra आभीरः) A shepherd, a cowherd. According to *Menu* (B. x. 15) the *Ábhíra* is of mixed origin, the offspring of a Brahman father, and a mother of the *Ambashṭha*, or medical caste; but the *Abhíras* were a people, a pastoral tribe, settled, about the beginning of the Christian era, on or near the lower course of the Indus, on a tract known to classical geographers, as the *Abiria* of Ptolemy, lying north of the Sahyadri mountain, and of Syrastrene. The *Abhírs* of *Saurashtra* are mentioned in the *Mahábhárata*. From their pastoral habits the name came to be generally applied to the cowherds of Hindustan. In the spoken dialects of upper India the word is corrupted to *Ahír*, *Uheer*, q. v. In Bengálí and Maráthí it is unchanged, occurring as *Abhír*.

Abhijog, Beng. (অভিজোগ, S. *Abhiyoga* अभियोगः) Plaint, complaint, beginning of a suit.

Abhijogi, Beng. (অভিজোগী, S. अभियोगी) A plaintiff, a complainant.

Abhijog-patra, Beng. (অভিজোগপত্র, S. अभियोगपत्र) A petition, or writing of complaint.

Abhyudayaka-ṣráddha, S. (अभ्युदयकश्राद्ध) Offering to deceased progenitors, or to the manes collectively, on some prosperous event, as the birth of a son, or the like.

Abhyupetya Ṣusrúshá, S. (अभ्युपेत्यशुश्रूषा) Contracted service, a title of Hindu law, treating of disputes between master and servant.

Abíḳ-Ubeḳk, H. (A. ابيق) A runaway slave, in Mohammedan law.

Âbír-Ûbeer, H. (from A. عبير, Saffron), A powder of a red or yellow colour, composed of various vegetable and mineral ingredients, as turmeric, safflower, saffron, red or yellow orpiment, talc, ground to a fine powder, and used by the natives to throw over one another and stain their faces and clothes with at the vernal festival of the *Holi*, as typical of the buds and blossoms of the season of spring.

Abwáb, H. (A. ابواب, plur. of *báb* باب, a door, a section, a chapter, a title,) Heads or subjects of taxation, or the taxes which were imposed under the Mohammedan Governments in addition to the regular assessment on the land. Miscellaneous cesses, imposts, and charges, levied by Zemindars and public officers. These cesses were either abolished or consolidated with the land revenue, and are no longer payable to the British Government; but such as existed before the perpetual settlement, and were not spe-

cially abrogated or not consolidated, are still claimed sometimes by the Zemindars, (Reg. viii. 1793, xxx. 1803, v. 1812). They were variously designated, as, 1. after the princes by whom they were ordered, as *Abwáb Kásim Âli Khán*, taxes of *Kásim* (Cossim) *Âli*, Nawab of Bengal; or, 2. from the pretext on which they were raised, as *Abwáb-Faujdári*, taxes on the Zemindars, in commutation of fees which had been payable to the office of *Faujdar*, or chief military and police magistrate, and *Abwáb Thánadári*, fees exacted by *Shujâ Khán* from retailers of spirituous liquors and other articles in bazars attached to police or military stations, and payable to the *Kotwál*; *Abwáb Khamsi* (from *khamsa*, five, for *several*), different taxes levied by the Governor of Dacca when the *Diwáni* was granted to the Company, on pretence of presenting the proceeds to the Emperor in acknowledgment of the grant (*Fifth Rep. and Gloss.*); also *Abwáb mehmáni*, a cess levied on the inhabitants of a village to defray the expenses of the Zemindar on his paying it an occasional visit; *Abwáb ráhdári*, rates charged on the people of a town or district for the repair of the public roads; *Abwáb Pátaki*, a cess apparently peculiar to Orissa, literally, "taxes on the wicked or fallen," applying the term to eight inferior or degraded castes or occupations, namely, *Tántís*, weavers, *Támbúlis*, venders of betel and *pán*, *Guṛiyas*, confectioners, or makers of sweetmeats with *Guṛ* or molasses, *Sonárs*, goldsmiths, and *Kaiwartts*, *Kíbárats* and *Gokas*, different tribes of fishermen.

Achalit-Uchulit, H. (S. अचलित: *lit.* What has not moved, or is immoveable), Real or landed property.

Áchandrárgam, Tam. (ஆசந்திர்ரார்கம், from the S. आ *á*, as long as, चन्द्र *chandra*, the moon, and अर्क *arka*, the sun, *i.e.* as long as the sun and moon endure). In Tanjore and Kanara, any village, of which the lands are permanently apportioned among the hereditary proprietors. The term, slightly modified according to dialect, appears to be in common currency in the south of the Peninsula to denote perpetuity.

Áchamana, S. (आचमन) Rinsing the mouth, sipping a little water and ejecting it before and after meals, and before and after various ceremonies, one of the permanent and daily practices of the Hindus.

Áchamaníya, S. (आचमनीय) Water fit for sipping, also for offering it to an idol.

Áchár, H. &c., (آچار, S. आचार: *Áchára*, whence it is introduced into all the dialects, sometimes slightly modified). Institute, established and essential observance, as daily ablutions and personal purification, daily worship, tonsure, investiture, marriage, obsequial rites, or *Śráddhas*. Performance of appropriate duties in different stages of life, &c. It is also used in composition with terms limiting its application, as *Kuláchár*, family usage; *Déśáchár*, custom of the country; *Matáchár*, practice of any particular sect; *Nityáchár*, invariable observance; *Śuddháchár*, ceremonial purity; *Vṛíddháchár*, old established custom.

Áchárj, Áchári, Áchárya, H. &c. (اچارج, आचारी, from the S. *Áchárya* आचार्य्य:) A religious teacher; properly, the Brahman who instructs the religious student of the two next castes—the *Kshatriya* and the *Vaiśya*—as well as the Brahman, in the Vedas. In modern use it is applied to any religious instructor, or to any Brahman or religious mendicant professing to be qualified to give spiritual instruction. In the south of India it especially denotes the head of a religious society—the *Mahant* of Hindustan, or the *Paṇḍa*, or head Priest of a temple. Among the Maráṭhas it was given to Brahmans employed by respectable families as cooks. In the Tamil provinces it is assumed by carpenters and other artisans.

Achchaka, Karn. (ಅಜ್ಜಕ) Assessment, taxes. One who pays taxes.

Achchavaḍi, or *Achchuaḍi*, Karn. (ಅಜ್ಜುವಡಿ) Assessment, tax.

Aluté, corruptly, Ulootay, Allootie, Allooty, Alowtay, Mar. (अलुते, plur. of अलुता, possibly a mere alliterative term derived from *Balute*, q. v. as *Baluté-aluté*) The collective designation of the persons whom it is customary in some of the provinces of the Dekhin, to retain as village servants, in addition to the *Baluté*, or regular village servants, such as superannuated members of the Baluté, or their widows, religious mendicants, and the helpless and lazy in general. Besides these, twelve classes of the Aluté, as well as of the Baluté, are specified, viz. 1. The *Jangam*, or priest of the Lingayits, who is employed to blow the conch shell in the temples; 2. The *Koli*, or water-carrier, who supplies travellers and government functionaries travelling on public duty with drinking-water, also the cultivators with water to wash their threshing floors, and the village at large with water on public festivals; 3. The *Bhâṭ*, or village bard, who chants hymns in the temples, and is employed when children are betrothed to ascertain that there are no physical impediments to the marriage; 4. The *Rámúsi*, or village watchman, by caste and practice a thief. In different parts of the South-West of India his place is taken by the *Bhíl* or the *Koli*, both wild and lawless tribes, residing chiefly in the thickets of the Satpura hills, but taking service in the plains; 5. The *Máli*, *Bághbán*, or gardener, who grows flowers to decorate the temples with, and prepares nosegays to present to Government officers or men of rank passing through the village; 6. The *Taráḷ* or *Yeskar*, who is considered the same as the *Mher*, except that the latter is usually ranked among the Baluté receiving only a different scale of compensation. All the *Mhers* in the village take the office of Tarál for a year in rotation, and, besides the fixed allowance of land or grain, each receives annually a pair of shoes and a blanket. The Tarál is to be always resident and at the call of the *Patíl*, and is especially assigned to attendance on strangers, whom he furnishes with local information, and for whom he procures the necessary supplies; 7. The *Gondhali*, beater of a double kettle-drum; 8. The *Ḍaurí Gosain*, who beats a sort of

small drum; 9. The *Garsi*, (?) or piper; 10. The *Sempi*, *Darjí*, *Súti*, or *Suï*, the village tailor; 11. The *Telí*, or oil presser and vender; 12. The *Támbúli*, or preparer of the *Pán*, or betel-leaf, &c. Few of these hold land, but are mostly paid by an allowance of grain. There are some varieties in their specification; as, for instance, in Duff's History of the Marathas the twelve *Alutas* are called, 1. The *Sonar*, goldsmith; 2. The *Jangam*; 3. The tailor; 4. The water-carrier; 5. The *Tarál*; 6. The *Máli*; 7. The drummer; 8. The piper; 9. The *Rámúsi* or *Bhíl*; 10. The *Taili*; 11. The *Támbúli*, and 12. The *Gondali*. But the whole number of twelve are rarely found in any village establishment. On the other hand, there are occasional additions to the list, as, *Bájantris*, musicians and comedians; *Kalávantins*, dancing girls; a *Vaidya*, or village physician; a *Ghota-khor*, a diver, one who plunges into the water to recover lost articles; and a *Gárpagári*, a village conjuror and fortune teller.

BAIS, BEIS, H. (بَيس, बैस) A numerous tribe of Rájputs found in Oudh, in which they give name to the district. They are also numerous in the Company's territories in the north-west provinces of *Baiswára*. Their traditions are very remarkable. They refer their origin to *Munji-Paithan* in the Dakhin, and assert that the 360 clans into which they are said to be subdivided are the descendants of *Sáliváhana*, king of that city A. D. 78, giving name to the *Sáka* era, by as many of his

wives. They are included amongst the thirty-six royal races, and may intermarry with *Chouháns, Kachwáhas,* and other eminent Rájput tribes. The branch of them named *Tilak-Chandra* (*i. e.* having the moon for their 'tilaka,' or frontal mark), residing at *Dundia-khera*, and their nearest of kin, hold themselves superior to the other divisions, and profess to give their daughters to none but the very purest races. There is reason to suspect that, in the Oudh territory at least, they practice female infanticide.

Baisak, Bysuk, H. (بَيسك) A spot in a *Jangal* where cattle are sent to graze (Dehli). The term is also applied to old and worn out animals.

Bait-ul-mál, H. (A. بَيت, place or office, ال مال *al-mál*, the treasure or revenue) The public treasury or exchequer, into which payments on various accounts are made, and, according to the sources whence they are derived, applicable to the support of different classes of persons. The principal sources are, 1. Duties on merchandise which, after paying the officers employed in the collection, should be applied to the support of the poor and destitute; 2. The fifth of the spoil taken in war, and the produce of mines and of treasure trove, to be applied to the support of orphans, paupers, and travellers; 3. The amount of the tax and tribute levied from unbelievers, from which the salaries of magistrates, the pay of teachers, students, and soldiers, and the expense of public works are to be defrayed; and 4. Property escheated, or for which there is no owner, and also the fines for manslaughter and murder, which is to be expended on the maintenance of the sick, the poor, and foundling children. The Sultan may take from the *Bait-ul-mál* the necessary expenses of the State, but not for his personal use. "The *Bait-ul-mál* is not the property of the ruling power, but that of all Mohammedans, for whose benefit it should be administered." The term is sometimes erroneously confounded with *Betan-mál*, q. v., and rendered an escheat, or the escheat and place of deposit are confounded. One or other has misled the Maráṭhas, as the term occurs in Mr. Elphinstone's Report, *Bait-ul-mál*, Escheats.—Sel. iv. 166.

BÁLU, BALOO, H. &c., (بالو, बालु, from the S. बालुका) Sand.

Báluä, H. (بالوا, बालुआ) Sandy.

Bálubard, *Baloo-burd*, H. (from P. بردن, to bear, to take away) also, vernacularly, *Bálu-búrd* (बालुबूर्द), Arable land destroyed by a deposit of sand from inundation. An item of remission of revenue on this account.

Bálu-char, or *chur*, H. &c., (from *Bálu* and *Char* چر, a shoal, a bank) Land covered by a deposit of sand. A sand-bank formed by a deposit of sand from the waters of a river. The name of a village near Murshidabad, perhaps originally so formed from the river; whence *Báluchari*, a kind of silk manufactured at *Bálu-char*.

BALUCH, corruptly, BULOOTCH, or BULOTCH, (?) A bundle of corn, to which, in the northern Sirkars, the village artificers are entitled. A portion of corn paid at harvest-time as a moiety of their wages to the village peons by the peasantry. (Although repeated in the Glossary from the Fifth Report, and found there p. 681, the word is most probably a typographical error for *Bulooteh*, corrupt reading of *Balute*, or *Bulooté*, q. v.).

BALUTÁ BULOOTA, Mar. (बलुता) or, as the persons so named are usually spoken of collectively, plur., BALUTE, BULOOTE (बलुते), or, with BÁRÁ, twelve, prefixed, BÁRÁ-BALUTE (बाराबलुते), The twelve BALUTÁS, from their

being twelve in number, or, according to some, from the amount set apart for them being divided into twelve parts. The word is also spelled BALOTE, BALUTYÁ, and BALOTYÁ, and is corruptly written in a variety of forms, as, BULOOTEE, BALOOTEE, BULLOOTEH, BALLUTAY, BULLOTEE, BULOWTEH, BALOWTAY, &c. A village officer or servant. The popular enumeration is twelve, but the whole number, by including three who may be regarded as the heads of the village, and the twelve inferior classes, or *Alute*, q. v., extends to twenty-seven. The actual number, however, varies in different parts of India, as do the respective appellations: there is less variety, although some, in the duties. According to *Molesworth* (Mar. Dict.), the twelve *Balutas* of the Maratha villages in which the system is preserved most entire, are, 1. The *Páṭil* (पाटील), or Head-man; 2. *Kulkarṇí* (कुलकरणी), Accountant; 3. *Chaudhari* (चौधरी), Head of the trades; 4. *Potadár* (पोतदार), Assayer, money-changer, and silversmith; 5. *Des-páṇḍyá* (देशपाण्ड्या), District accountant; 6. *Nháwi* (न्हावी) Barber; 7. *Paríṭ*, (परीट), Washerman; 8. *Gurav* (गुरव), Attendant on a temple; 9. *Sutár* (सुतार), Carpenter; 10. *Kumbhár* (कुंभार), Potter; 11. *Vésakar* (वेसकर), Gate-keeper, usually a *Mahár* by caste; and, 12. *Joṣi* (जोशी), Astrologer. Most enumerators, however, exclude the principal officers or administrators of the village affairs. Thus, *Grant Duff* specifies the village officers; the *Páṭíl*, the *Kulkarṇi*, and *Chaugala*, assistant or deputy of the *Páṭíl*, as distinct from the *Bárá Balute*, and *Bárá Alute*. For the latter, see the word *Alute*. The twelve village servants he terms, 1. The Carpenter; 2. Blacksmith; 3. Shoemaker; 4. *Mahár*, or watchman; 5. *Máng*, worker in leather; 6. Potter; 7. Barber; 8. Washerman; 9. *Gurav* or *Śúdra*, attendant on a temple; 10. The astrologer; 11. The *Bháṭ*, or bard; and, 12. The *Mauláná* or *Mulla*, or Mohammedan priest. In some places the *Balute* are fourteen, divided into three classes, severally denominated the *Thoralá-khás* (थोरलाखास्), Elder or principal division; *Madhalá-khás* (मधलाखास्) The middle; and *Dhákaṭá-khás* (धाकटाखास्) Younger or inferior; the first comprising the Carpenter, Blacksmith, Shoemaker, and *Mahár*; the second, The Washerman, Potter, Barber, and *Máng*; and the third, The Goldsmith, *Mauláná*, *Gurav*, *Joṣi*, Waterman, and the *Rámúsi* or *Bhíl*. In the Kanara countries these village servants and officers are termed *Ayakárru*, or *Ayagárru*, or *Ayangáṇḍlu* (ಅಯಕಾರ್ರು, ಅಯಗಾರ್ರು, and ಅಯಂಗಾಂಡ್ಲು), q. v., and are enumerated by Reeve as, 1. The *Gauḍa*, head-man; 2. *Ṣánabhóga* (ಶಾನಭೋಗ), accountant; 3. *Joïsa* (ಜೋಯಿಸ), astrologer; 4. *Pattárí* (ಪತ್ತಾರಿ); corn-measurer, or money-changer; 5. *Kammáranu* (ಕಂಮಾರನು), blacksmith; 6. *Baḍiga* (ಬಡಿಗ), carpenter; 7. *Kumbhára* (ಕುಂಬಾರ), potter; 8. *Naïda* (ನಾಯಿದ), barber; 9. *Agasa* (ಅಗಸ), washerman; 10. *Bárika* (ಬಾರಿಕ), One who affixes the public seal to public papers; 11. *Taḷawára* (ತಳವಾರ), watchman; 12. *Níraganṭí* or *Koḷavára* (ನೀರಗಂಟೀ, ಕೊಳವಾರ), waterman; 13. *Konikárachakra* (ಕೊನಿಕಾರಚಕ್ರ), betel-nut gatherers. In the Telugu villages we have the 1. *Pedda kápu* (పెద్దకాపు), head-man; 2. *Karanam* (కరణము), accountant; 3. *Vaḍla-vaḍu* (వడ్లవాడు), carpenter; 4. *Kammari* (కమ్మరి), smith; 5. *Kummari* (కుమ్మరి), potter; 6. *Chákáli*, (చాకలి), washerman; 7. *Mangali* (మంగలి), barber; 8. *Madiga-váḍu* (మదిగవాడు), A *Chandála*, and *Vetti-váḍu* (వెట్టివాడు), a sweeper. In Guzerat, the *Desaī* and *Majmudár*, properly district officers, sometimes exercise the functions of *Pátél*; at other times, the *Pátél* is the head-man of the village, under whom are the *Taláti*, accountant; *Sutár*, carpenter; *Lohár*, ironsmith; *Kumbhár*, potter; *Darji* or *Suī*, tailor; *Dhobi*, washerman; *Hajám*, barber; *Mochi*, shoemaker; *Khálpá*, leather-dresser; *Bhangi*, sweeper; *Dheṛ*, watchman; *Kosia*, water-drawer; *Sonar*, goldsmith; *Bhát* or *Bhárat*, bard; besides the *Akhun*, Mohammedan teacher; *Baid*, Hindu doctor; *Joṣi*, astrologer; Gosains, Fakirs, &c. In the Dehli district they are known collectively as the *Kamin* (کمین), the inferiors of the village, and are, the *Lohár*, smith; *Barhaī*, carpenter; *Kumhár*, potter; *Dhobí*, washerman; *Nāī*, barber; *Kahár*, bearer; *Sagga*, water-carrier; *Darzi*, tailor; *Dóm*, musician; *Dhúniya*, cotton-stuffer; *Chipi*, cloth-stamper; *Rangrezi*, dyer; *Brahman*; *Balahar*, or *Dhanuh*, messenger; *Kháhrob*, sweeper; *Dauráha*, guide, intelligencer; and *Chamár*, shoemaker. In Bengal, and those parts of Hindustan where the village organization has been greatly disturbed by the long period of Mohammedan rule, the establishment of village officers and servants is less complete, but the head-man and accountant are almost universally retained, and more or fewer of the rest are to be found. In most instances the offices are hereditary, are capable of being mortgaged or sold, and are paid by recognised fees and perquisites, by

allotments of corn at the time of harvest or sometimes, by small portions of land held rent-free, or at a low quit-rent. The following is a further specification of their synonymes and functions:

1. Mar. *Pátíl*, Guz. *Pátel*, H. A. *Mukaddam*, *Kadím*, H. *Chaudhari*, *Mahto*, *Mahájan*, *Thákur*, *Jethráyat*, Ben. *Mandal*, S. *Grámádhipati*, *Pradhán*, Tam. *Grámáttan*, *Ambalagár*, *Ijamán* (S. *Yajamána*), *Mániya káran*, *Monigar*, *Pravarttika*, Karn. *Gauda*, Mal. *Náttár*, *Náttárí-káre*, Tel. *Naidu*, *Náyadu*, *Pedda-kápu*, *Pedda-kár* or *Pedda Reddi*, *Reddi-vádu*. (These, and the synonymous appellations of the other village servants, are not always exclusively applied to them, and many are so applicable only in virtue of their general purport; as, S. *Pradhána*, vern. *Padhán*, the principal; A. *Mukaddam*, one who precedes or takes the lead, or *Kadím*, elder, senior; Tam. *Ijámán*, lit., the institutor of an act of worship; and Tel. *Pedda-kápu*, the old or chief man, &c.).

The head-man, the *Pátíl* (Mar.), or *Pátél*, (of other dialects), has the general controul of the affairs of the village, usually assisted by a sort of village council of the most respectable of the community, but not exclusively, as any discussions that may occur are mostly held in an open space in the village, where all have access, and do not hesitate to give their opinions. With their concurrence, the head-man superintends the cultivation, apportions the assessment, collects the revenue, either in money or kind, and pays it to the Government district-collector, regulates the village expenses, distributes the quotas for defraying them, and collects the money and pays the charges. He examines and checks the accounts. In some places, especially in the south, he has charge of the police, and is entrusted with limited magisterial powers. — Madras Reg. xi. 1816, Bomb. Reg. xii. 1827, sec. vi. xlix. And as village Munsiffs, the heads of villages are also entrusted with powers to decide civil causes of small value.—Madras Reg. iv. 1816. The *Pátél* also usually settles petty disputes in the village either by his own authority or through the agency of a Panchayat, or court of arbitration. He is the chief organ of Government in its dealings with the village. In some places the office is hereditary; in others the head-man is appointed by the Zamindar, or contractor for the revenue; in others he is elected by the villages. In some villages, especially those held by coparcenary tenure, their affairs are usually managed by several of the principal inhabitants, not by one head-man; and even where such a functionary is recognised, there are sometimes more than one individual regarded in the same light, in which case the eldest, or more respectable of the number, takes the lead in transacting public business. Such a head-man is distinguished among the Marathas by the Hindustani or Arabic term *Mukaddim*: his fellows retain the national term of *Pátíl*. Where the office is hereditary, as it commonly is among the Marathas, its fees, perquisites, and privileges may be pledged for a loan, or may be sold. The office of *Pátíl* is regarded as extremely respectable, and Hindus of the highest rank have not disdained the title. *Daulut Rao Sindhia* particularly affected the title of *Pátíl*, and in some villages of the Dakhin exercised the office by deputy, and claimed the perquisites and rights; and *Bhairi Sál*, the first noble of the Court of Jaypur, boasted of the title of hereditary *Pátíl* of the principality. In Maratha villages the *Pátíl* is commonly assisted by a deputy, the *Chaughalá* (चौघला), who, on his part, or in his absence, conducts the affairs of the community. He is not known elsewhere by any specific designation.

Mar. *Kulharni*, *Bhoï*, H. A. *Kanun-go*, H. *Patwárí*, S. *Gráma-karana*, or *Káyastha*, Tam. *Kanakapilli*, B. *Kayeth*, *Moharir*, Karn. *Sánabhoga*, Tel. *Karanam* or *Karnam*, Guz. *Taláti*, *Rigal*, Mal. *Menava*, *Menon*. The accountant's business is to keep accurate accounts of the lands of the village, their extent, quality, produce, and proprietary distribution, whether held singly or in common, of changes of possession or property of the lands, of the village expenses, and assessment and payment of the revenue. He acts as clerk and notary, and often as the scribe, or letter-writer and accountant of the villagers.

The village servants, properly so called, are,

1. S. *Sútradhára* or *Varddhaki*, Mar. Guz. H. *Sutár*, H. *Barhaï*, Karn. *Badige*, Tel. *Vardhaki*, *Vadla-vádu*. The carpenter and wheelwright, who makes and repairs all the wood-work and agricultural implements of the villagers.

2. S. *Lohakára*, H. Mar. Guz. Beng. *Lohár*, Karn. *Kammár* (S. *Karmakára*), Tam. *Karumári*, Tel. *Kammari*, blacksmith or ironsmith, who makes and repairs all iron-work for the village.

3. S. *Charmakára*, H. Beng. *Chamár*, Mar. *Chámhár*, Tam. *Chakkili* or *Shakkili*, Tel. *Cheppulu-kuttavádu*, H. Beng. Guz. *Mochi*, Guz. *Khálpá*. A man of

low caste, who works in hides and leather, and makes the leather bags for drawing water, and any other leather article for public use. He makes shoes, whips, thongs, &c., for the villagers, but for hire when for individual use. He also dresses and tans skins, and sometimes skins dead animals.

4. Mar. *Mahár* or *Mhár*, *Dheṛ*, *Balláyi*, *Mhau*, &c. These are local names current in the Maraṭha and Guzerat provinces for particular tribes of outcasts, members of which are usually found in the villages. The Mahár is the guardian of the village boundaries and land-marks, and is the public servant of the head-man. He summons the villagers to public meetings, carries the collected revenue to the Government office, and acts as public letter-carrier and messenger. He cuts wood and grass, and serves as scout, guide, baggage-porter, and general attendant on travellers. He assists the head-man in his police duties, and traces and apprehends thieves. He officiates also, sometimes, as watchman, especially of the crops, and is the sweeper of the roads through the village. Some of these functions are wholly or in part discharged by other servants, as the *Máng* and *Yeskar*. The office of village *Mahár* is generally held by one or more families; so that, although there is nominally one officer, the duties are commonly performed by several individuals. The functions of the *Mahár*, are, in part at least, also discharged in different places by other low tribes or castes, especially those of protecting the village boundaries, and acting as guides, messengers, and watchmen, who are frequently *Bhils*, *Kolis*, or *Rámusís*. The persons employed to protect the roads and boundaries are also termed *Rakh-wálas* and *Varttaniyas*, whilst the village watchman is designated by a variety of terms in different parts of India, as H. Mar. Beng. *Chauhidar*, *Kotwar*, Uriya. *Chokiá*, H. *Dosád*, *Dhanuk*, *Goret*, *Hári*, &c., Tel. *Payik*, *Pásbán*, Tam. *Kávali* or *Kával-káran*, Tel. Karn. *Talári*, Karn. *Taláwára*, also Mar. *Jagla*.

5. Mar. *Máng*, Tel. *Bárikudu*, *Mádiga-váḍu*, *Vetti-váḍu*, Tam. *Veṭṭiyáṇ*, H. *Bhangi*, *Khakrob*, *Mehtar*, *Halál-khor*, Karn. *Totí*. A man of very low caste who is the scavenger and sweeper of the village. He is also employed as skinner, and as executioner, and occasionally as a watchman.

6. H. *Dhobi*, Mar. *Parít*, Karn. *Ayási*, Tel. *Chákali* or *Chákala-váḍu*, Tam. *Vaṇṇun* (வண்ணான்). The washerman, who washes the clothes of the villagers.

7. S. *Kumbhakára*, H. *Kumhár*, Mar. *Kumbhár*, Tel. *Kummári*, Karn. *Kumbhára*, Tam. *Kuyavan*. The potter, who makes pots and tiles for the village, and has sometimes to supply travellers with water.

8. S. *Nápita*, H. *Naï*, Mar. *Nháwi*, Karn. *Náïda*, Tel. *Mangali* (S. *Mangala*), Tam. *Ambaṭṭan*, Guz. *Náwi*, also from the A. *Hajám*, which is also used in other dialects, as Hin. and Beng. The barber, who has to shave the inhabitants, more especially their heads: he also bleeds, and acts as surgeon. His wife is the general midwife. He is occasionally called upon to carry a torch before travellers at night.

9. S. *Jyotishi*, H., and in most dialects, *Joshi* or *Joṣi*. The village astronomer, who prepares the almanack, announces lucky and unlucky days, and the days appropriated to public festivals, and casts nativities. The name applies to the office, which is filled most commonly by a Brahman, who in that character conducts the village ceremonies and religious observances, and is known by the terms *Bhaṭ* or *Bhuṭ*, *Parsáï*, *Purohiṭ*, and others.

10. S. *Swarnakára*, whence the *Sonár* of most of the dialects, also H. Mar. Beng. *Potadár* or *Potdár*, Karn. *Pattári*, and H., from the A., *Saráf*, vulgarly, *Shroff*. Goldsmith, silversmith, assayer, and money-changer, weigher of coin and bullion. He declares the value of coins tendered in payment of the revenue, and makes the silver ornaments worn by the villagers.

11. Mar., from S., *Guru*, *Gurav*, or *Pujári*, A Ṣudra whose especial duty it is to clean the village temple and deck the idol. He acts also as a servant to the more respectable villagers, and attends their wives when they go out. He has also to assist in the carriage of travellers' baggage, and sometimes acts as trumpeter.

12. Mar. (S.) *Bháṭ*, A bard, or genealogist, who keeps a record of family descents, and arranges marriages. He composes and recites poems or songs on particular festive occasions. He is sometimes reckoned one of the *Alute*, q. v.

13. H. Mar., from A., *Mauláná*, *Mulla*, *Akhund*, The Mohammedan priest who conducts the ceremonies of the Mohammedans of the village, and acts as schoolmaster. In some places he has degenerated into the butcher, killing animals for such of the villagers as eat meat. Where there are no Mohammedans, the place of the Mulla is filled up by the *Koli*, or waterman, who supplies water to the villagers and travellers, but who is

more usually enumerated amongst the *Alute*. In Karnáta, the waterman, *Niraganti* or *Kolaváru*, has charge of the supplies of water for irrigation, superintending its distribution, and preventing waste. The Karnáta establishment, also, includes officers not recognised elsewhere; as the *Alatigára* or *Pattári*, Corn-measurer, who apportions the shares of Government and the cultivators where the revenue is paid in kind; and the *Addika* or *Addiga*, who superintends the cultivation, q. v.: also the *Konikára-chakra*, who gathers betel-nuts for the villagers from the public plantations. For the other classes of village servants, see *Alute* and *Náru-káru*.

Baluten, Baloten, Bulooten, Buloten, Mar. (बलुतें, बलोतें, the final *n* is scarcely sounded), also read Baluteh, Baloteh. The portion of the crop assigned to the village servants for their maintenance, also their fees, perquisites, or other rights.

Balute-dár, Mar. (बलुतेदार) A village officer or servant receiving a share of the crop, &c.

Balute-paṭṭí, corruptly, *Bullooty-puttee*, Mar. (बलुतेपट्टी) A cess or tax upon the shares or claims of village servants.

Báluttaram, Karn. (ಬಾಳುತ್ತರಂ) Land in Kanara with which temples were endowed, but remaining in the hands of the original proprietors. They were not at first included in the assessment, being considered religious property; but subsequently they were assessed, such share of the produce as the temples had formerly received being continued to them. Land claimed as the special endowment of an officer of the temple.

Bam, Bum, H. (بم, बम) An exclamation of salutation in passing, interchanged especially with *Ṣaiva* mendicants carrying the water of sacred rivers to a distance, who call out as they go along to those they meet, *Bam-bam Mahádeo*, and receive the same words in reply.

BHÁG, BHÁGAM, corruptly, BAUG, BAUGAUM, BAUGOM, H., but in most other dialects also, (بهاگ, S. भाग) A share, a part, a portion, a share in kind: tax, duty, the share of the Government. Share or portion of inheritance. In Hindu law, partition may be regulated amongst the sons according to the number of their mothers, or the wives of the deceased, which is termed *Patní bhága*; but this is allowable only where the usage has been long established as the custom of the family. The more regular distribution is according to the number of sons (*putra*), thence denominated *Putra-bhága*. See *Vibhága*.

Bhág-baṭái corruptly, *Bhugwuttee*, H. (بهاگ بٹاي, भागबटाई) Apportionment of shares of the crop in kind between the cultivator and the Government.

Bhág-batti (?) *Bhágavatí*, (from S. *Bhága*, share, and the possessive particle *vatí*, belonging to, or possessed of). In Guzerat, division of the crop in kind, the Government taking one-half of the crop in the rainy season, and from one-third to one-fifth of that in the dry season, if the land be irrigated; (probably an error for the preceding).

Bhágdár, corruptly, *Baugdar*, H. (بهاگدار, भागदार) *Bhágidár*, Guz. (ભાગીદાર) A sharer, a partner; also, in Cuttack, an accomplice.

Bhágdárí, H. (بهاگداري, भागदारी) Holding a share; the same as *Paṭṭídárí*, in the Dakhin.

Bhágí, H. (भागी) A sharer, a partner; also, a share, a portion.

Bhágí-dár, Mar. (भागीदार) A sharer, a partner. It also occurs *Bhágil* and *Bhágelí*.

Bhág-joṭ, Ben. (ভাগজোট) Cultivation by the Ryot on the terms of sharing the crop with the Zamindar.

Bhág-khamár, Ben. (ভাগখামার) The transfer of land, held on the condition last named, from one Ryot to another Ryot, the latter engaging to give to the former a half share of the produce.

Bhágwár, H. (بهاگوار, भागवार) Held upon a joint or sharing tenure (land, &c.)

BHAGAT, H. (بهگت, corruption of *Bhakt*) A religious mendicant, a worshipper of *Vishṇu*.

BHÁGNAR, H. (بهاگنر, भागनर) A name given to the rich alluvial lands under the banks of the Jumná.

BHAGTÁ, H. (بهگتا) A tribe of Ahírs.

BHÁÍ, BHAEE, also BHAIYÁ, less correctly, BHAYA and BHYE, H., &c. (بهاي, بهيا, भाई, भैया, S. भ्रातृ) Ben. (ভাই) A brother, a natural brother; also, a friend and companion; metaphorically, a brother. It is especially applied also to individuals connected by community of origin and joint interest in a common ancestral property, proprietors of shares, either actually or conventionally, in the same village lands. (The derivatives and compounds may follow either form of the primitive, but those which take the second form, *Bhaiyá* or *Bhaya*, are most frequent.

Bhái-ans, *Bhaiyánṣ*, H. (بهاي انس, भैयांश, from अंश, a share) The share or portion of a brother or a co-parcener.

Bhaiyánṣí-bíghá, H. (भैयांशीबीघा) An arbitrary measure of land, used by the brotherhood of a co-parcenary village, for apportioning the revenue upon the lands they cultivate. It is larger than that in common use upon which the revenue is assessed at so much per Bigha.

Bhái-band, *Bhaee-bund*, H. (بهاي بند) A brother, one by lineal affinity, or one by community of origin and interest, or only by friendship and association.

Bhái-bandí, H. (بهاي بندي, भाईबंदी) Brotherhood, fraternity, actual or incidental.

Bhái-bat, *Bhaeebut*, or *Bháíwad*, *Bhaeewud*, or *Bhybut*, *Bhywud*, H. (بهايبت, भाईवत, from *bat* or *wad* affix implying like to) As a brother or co-parcener, brother or partner-like (acting, engaging, sharing, &c.)

Bháíbau, Ben. (ভাইবৌ) A brother's wife.

Bhaiyá-báṇṭ, H. (भैयाबांट) Held in common, as a village. See the next.

Bhaiyáchárá, or *Bhaiyáchárí*, less correctly, *Bhayachára*, &c., H. (بهياچارا, بهياچاري, भैयाचारा, भैयाचारी, either from the S. *chara*, चर, going, or *áchára*, institute, fra-

ternal establishment) Lands, or villages, or certain rights and privileges held in common property, either entirely or in part, as in the perfect, or imperfect *Paṭṭidárí* tenure by a number of families forming a brotherhood, originally perhaps descended from a common ancestor, but now not always connected by sameness of descent. Their several claims and liabilities are sometimes regulated by established custom, but they sometimes rest upon ancestral rights, the nature and extent of which are not always easy of determination and adjustment, and require careful investigation. In all such fraternities the Government revenue is most usually paid through one of the number representing the whole. Any one of the co-parceners may let or mortgage his share to a non-proprietor; in some places, subject to the concurrence of the rest of the fraternity. In such case, the original shareholder may retain his privileges of administering and voting, in regard to the interests of the community, as well as his share in the manorial rights of the whole to waste lands, water-courses and reservoirs, ground-rents on land let to strangers, taxes on trades, fees on occasional fairs, and a variety of other emoluments which are shared in common.

Bhái-hissi, H. (from the P. حصه, a part) The shares of a brotherhood.

Bháijhi, Ben. (ভাইঝী) A brother's daughter.

Bhái- or *Bhaiyá-jamá*, H. (भाई- भैयाजमा) A fee paid to the head or heads of the village on settling the assessment of the revenue.

Bhái, or *Bhaiyá-pansi*, H. (بهاي پنسي, भाई- भैयापंसी) The shares of a co-parcenary or brotherhood.

Bhái-dwitíyá, H., &c. (from the S. भातृद्वितीया) A Hindu festival. See *Bhrátri-dwitíyá*.

Bhái-phoṭ, Ben. (ভাইফোট) Marking the foreheads of brothers with sandal, on the preceding festival.

Bhái-puä, Uriya, (ଭାଇପୁଅ) Lit., A brother's son, applied to a relation holding lands in a village on easier terms than others not related to the Zamindar, on paying a proportion of the revenue and village charges.

Bhaimí, S. (भैमी, from *Bhíma*, भीम) The eleventh of Mágha, on which day offerings are presented to the manes, in honour of Bhíma.

Bhais, Thug. One of the seven original clans.

Bhajanappura, Mal. (ഭജനപ്പുര) The palace of the Elia Raja of Travancore. A private residence in a temple.

Bhájawal, Mar. (भाजावल) Burning the weeds off the ground before sowing the seed. Ground so burned.

Bhájídast, Mar. (from भाजी, vegetables, and P. *dast*, دست, the hand) A tax levied in kind, either by the Government or the village officers, on fruit and vegetables brought to market.

Bhákar, Mar. (भाकर) A plain cake of bread; most usually applied to bread made from inferior grains, as holcus, millet, &c.

Bhaksi, H. (بهكسي, भकसी) A dungeon, a chamber in which revenue defaulters in native states are confined.

Bhakshya, S. (भक्ष्यः) Eatable, what may be legally eaten; in opposition to *Abhakshya*, what is not to be eaten, what is prohibited.

Bhakt, Bhukt, also read Bhakat, Bhakta, and Bhagat, H. (بهكت, S. *bhakta*, भक्तः) A follower, a worshipper, one devoted to, as to a divinity, as *Siva-bhakt*, a follower of Ṣiva; *Vishṇu-bhakt*, an adorer of Vishṇu.

Bhákta, S. (deriv. of भक्तः) A follower, a dependant, a pensioner, a religious sect or school, as those of *Ṣaívas*, or of *Vaishṇavas*. The right-hand worshippers of *Ṣaktí* are also called *Bháktas*.

Bhakti, S. (भक्तिः) Faith, devotion, service, hire of labour.

Bhál, H. (भाल) A tribe of Rajputs, proprietors of lands in the districts of Bulandshahar and Aligarh.

Bhálṣultán, H. (بهالسلطان) A clan of Rajputs, same as the Bhál, but freer from intermixture.

Bhaláwan, Bhulawun, Mar. (भलावण) A letter of credit, one of introduction or recommendation.

Bhále, or Bhálu, Thug. The cry of the jackall—an unlucky omen.

Bhámaṭyá, or Bháṇwaṭyá, Mar. (भामट्या, भांवट्या) A sly thief, a pickpocket, a shoplifter, &c.

Bháṇḍ, commonly pronounced *Bhánṛ*, H. (भाण्ड, from the S. भाण्डः, buffoonery) A native actor, mime, and jester, of a particular tribe, now usually Mohammadans, but sprung from the Hindu Bahrupiyas.

Bháṇḍ, H., &c. (S. بهانڈ, भाण्ड) A vessel. Stock, capital.

Bhanḍár, or *Bhánḍár*, or *Bhanḍára*, also *Bhánḍár-khána*, H., Mar. (भण्डार, भाण्डार, भण्डारा, from the S. भाण्डागारः) *Banḍára*, or *Bhanḍára*, Karn. (ಬಂಡಾರ, ಭಂಡಾರ) A treasury, a store, a room where household supplies are kept. Villages managed by the Raja or Zamindar himself, his own peculiar estate, not rented or farmed to others. In Cuttack, also, a reservoir.

Bháṇḍárí, H., Mar. (भाण्डारी) A treasury, a store. See the last. In Guzerat, a kind of guarantee-assurance to a creditor that a loan made by him shall be repaid by the borrower, without the surety's becoming personally liable. Also, guarantee or assurance to any person of the undisturbed enjoyment of recognised office or property, granted on many occasions by the British Government to the creditors and officers of the *Gaíkwar*.

Bháṇḍárí, H., Mar., &c. (from *Bhaṇḍára*) A treasurer, a storekeeper. In Sylhet, a servant, an out-door servant. In other parts of Bengal, a steward. In Cuttack, also, a barber.

Bhaṇḍárá, Bhuṇḍara, Mar. (भंडारा) A feast given to a number of religious mendicants or Gosains. (Perhaps the same as *Banḍhára*, q. v.)

Bhaṇḍárí, Bhuṇḍaree, Mar. (भंडारी) A man of a low caste, whose especial employment it is to draw the sap from the cocoa-nut tree, and convert it, by fermentation, into a strong spirituous liquor.

Bhaṇḍár-már, Mar. (भंडारमाड) A cocoa-nut tree reserved for the preparation of spirit, and not allowed to bear fruit.

Bhang, Bháng, Bhung, Bhang, corruptly, Bang, H. (بهنگ, بهانگ, P. بنگ, *bang*) Mar. (भंग, भांग) Ben. (ভাং) Tam. (பங்கு) &c. An intoxicating preparation of hemp (*Cannabis sativa*), either an infusion of the leaves and capsules, or the leaves and stalks bruised and pounded, and chewed or smoked like tobacco. According to Mr. Elliot, the natives of Hindustan distinguish the Bhang from the Ganja plant; the former bearing female flowers only, the latter male. From Dr. O'Shaughnessy's description, the term Bhang properly applies to the larger leaves and capsules, and Ganja to the dried plant with the stalks. From the Bhang is prepared the infusion bearing the same name. The Ganja is used for smoking.—Bengal Dispensatory.

Bhangí, H. (بهنگي, भंगी) One addicted to the use of Bhang.

Bhángrá, H. (بهانگرا, भांगरा) One who is addicted to the use of Bhang.

Bhangela, H. (بهنگيلا) Hempen cloth for wear, or for sacks, also sacks made of it.

Bhángá, Mar. (भांगा) A field, a division of a field.

Bhangí, Bhungee, corruptly, Bangy, or Bahangy, H. (بهنگي, भंगी) The name of a low caste, employed as sweepers, and in the most inferior menial offices. They are said to be of mixed origin, having sprung from the union of a Brahman woman and a Sudra man. They extend throughout Hindustan, where they are known by different appellations, as *Mehtar*, *Halál-khor*, &c. They profess to be Hindus, observing some Hindu usages, but in others they follow the practices of the Mohammadans, and can scarcely be considered as members of either faith. The name is probably derived from Bhang, for the Bhangis are generally addicted to the use of intoxicating drugs and liquors.

Bhangá, Uriya, (ଭଙ୍ଗା) Correct weighment of salt.

Bhangá-moharir, Uriya, (A. a clerk, محرر) An officer who superintends the weighment of salt.

Bhanwag, Bhunwug, H. (بهنوگ) A small clan of Rajputs.

Bháo, Ben. (ভাও) Mar. (भाव) Price of any thing, value of an article, market price or rate; interest on money or seed advanced.

Bháolí, Bhaolee, or Bhávalí, corruptly, Bhowley, Bhaweley, Behavilley, H. (بهاولي, भावली) Distribution of the products of the harvest, in previously stipulated proportions between the landlord and tenant. Rent paid in kind, instead of money. It is also possibly the correct form of *Baoli*, q. v.

Bháoli-khil, H. (بهاولي كهيل) Land recently brought

into cultivation, and of which the cultivator is allowed a larger share of the produce.

Bháoli-pá, H., corruptly, *Bhowley-pah*, (بهاولي پا) Land long cultivated, in which the proportional share of the cultivator is less than in land of recent cultivation.

Bhar, Bhur, H. (بهر, S. भर) Full, complete (used chiefly in composition).

Bhar-kas, Mar. (?) Land paying full rent. (*Dakhin.*)

Bharpái, or *paee*, H. (بهرپاي) Mar. (भरपाई) A release in full endorsed on the back of a receipt (being properly the two last words of the phrase, *main ne kauri bharpái*, the kauris have been received in full by me).

Bharwasulí, Mar. (भरवसुली) A village, &c., from which full revenue is realized.

Bhar, Bhur, H. (بهر) One of the aboriginal races of Hindustan, called also *Rájbhar*, *Bharat*, and *Bharpatwa*. Tradition assigns for their original seat the whole country from Gorakhpur to Bundelkhand, and the Pargana of Bhadoï, properly *Bhar-doï*, in Benares, is named from them. Many old stone forts, embankments, and excavations in Gorakhpur, Azimgarh, Jonpur, Mirzapur, and Allahabad, are ascribed to them. Amongst others, the celebrated fortress of *Vijayagarh*, or *Bijaygarh*, is still called, after them, a *Bharáwatí* fort. When met with they are found following the meanest vocations. They are especially swineherds; and are considered as knowing where treasure is hidden. In the hills eastward of Mirzapur there are some *Bhar* Rájas. The name may be possibly an abbreviation of *Bhárata*, a native of *Bhárata* or India; especially as it is retained unaltered as one of their synonymes.

Bháṛá, H. (بهاڑا, भाड़ा) Ben. (ভাড়া) Mar. *Bháreṇ*, (भाडें) Hire, wages, rent, recompense. In Bengal it is especially the hire of any inanimate thing, and therefore does not imply wages.

Bháṛáṭiya, Ben. (ভাড়াটিয়া) A tenant, a renter.

Bháṛekarí, Mar. (भाडेकरी) One who lets out houses, cattle, &c. One who hires them. A labourer, a hireling.

Bhárá, Mar. (भारा) A bundle of grass, a sheaf of corn.

Bhárebhát, Mar. (भारेभात) Threshed rice, usually yielding half a maund per *bhárá*, or bundle.

Bhárá, (?) A charge made to the Ryot who pays his rent in kind for the carriage of the grain to the place where it is sold. (This may be derived from *Bhár*, a load, or from *Bhárá*, hire; in the latter case it should be written with the hard *ṛ*, (بهاڑا.)

Bhárá, Thug. The dead bodies of the victims (Dakhini).

Bharahar, Thug. A pitcher full of water. A lucky omen.

Bharaí, corruptly, Bhurrye, Bhuray, Burry, H. (بهرئي, भरई) An allowance formerly made to the Government revenue officers in the provinces of Bareilly and Benares, to cover the cost of remitting the collections to the Government treasury, and of exchanging the different sorts of rupees received in payment into standard currency. A cess or tax raised on pretext of providing for such deductions and allowances, which was originally divided between the Raja and the *Amil*. *Bharaí* was finally abolished by Reg. xiv. 1807, cl. 14.

Bharaki, Thug. A gun.

Bharan, Bharana, or Bharna, H., Mar., &c. (بهرن, S. भरण) Completing, filling, rearing. Paying in full. (In the south) A row of betel-nut trees.

Bharwáṛ, Bhurwar, Guz. (ભરવાડ) A shepherd, leading a nomadic life, pasturing sheep, goats, and camels, and living on or by their produce in milk and wool.

Bhárwatia, or Bharwuttia, (?) A feudal dependant or chief in a state of open insurrection against his liege lord, or against the State, committing robbery and depredation on the country, and assuming the character of an outlaw. (Captain M^c^Murdo, Bombay Trans. i. 271, derives it from *Bhar*, out, and *wut*, country; but in that case it would more correctly be *Báherwatanía*; for the words in Guz., as in other dialects, are *Báhar* or *Báher*, from the S. *bahír*, out, and *watan*, from the Arabic, country. Perhaps the aspirate is altogether incorrect, and the word should be *Barwáṭia*, q. v.)

Bháryá, pronounced also Bhárjá, H., Ben., &c. (S. भार्य्या) also Bháj, Mar. (भाज) A wife, one wedded according to the ritual of the Vedas. It sometimes denotes a second or inferior wife, as distinct from the *Patní*, the wife first married. It also applies to the female of the Nairs in Malabar.

Bhásán, Ben. (ভাসান) The name of a class of Sirdars in the Kasiya hills.

Bhasáwan, H. (भसावन) A tax on boats carrying grain.

Bháshá, S. &c. (भाषा) Speech, a speech, a form of speech, a dialect or language, commonly applied to Hindi. The plaint in a law-suit; (also *Bháshá-páda*).

Bháskara-saptamí, S. &c. (भास्कर, the sun, and सप्तमी, seventh day) A festival in honour of the sun, held on the seventh of Mágha.

Bhaṭ, Bhuṭ, also written Bhaṭṭ, Bhuṭṭ, H. &c. (بہٹ, S. भट्टः) A title or cognomen of learned Brahmans, as *Kumaril Bhaṭ*, and others. Also, the name of a particular tribe of Brahmans in the province of Benares, said to have sprung from a Maraṭha father and a mother of the *Sarwaria* tribe of Brahmans. A common title or appellation of Maraṭha Brahmans, especially of such as live by begging.

Bháṭ, also Bhárata, H. &c. (بہاٹ, S. भाटः, भारतः) Baṭṭu, Bhaṭṭu, and Bhaṭráju, Tel. (బట్టు, భట్టు, భట్రాజు) The bard, herald, genealogist, and chronicler of ancient days, sprung from a Kshatriya father and Vaiṣya mother. The modern Bháṭ is sometimes said to have been born of a Brahman widow by a Kshatriya father. He fulfils the same office as his prototype, though with inferior dignity;

although in the west of India, where he is identified with the *Cháraṇ*, his personal security is held sufficient for the payment of a debt, or fulfilment of an engagement; its violation being followed by the voluntary death either of the Bháṭ himself, or of some member of his family, the retribution of which falls upon the defaulter. In some parts of India the *Bháṭs* are distinguished as *Birm-bháṭ* and *Jaga-bháṭ*; the former being hired on particular occasions to recite the traditions of a family; the latter being the chroniclers of the family by hereditary descent, and visiting the members periodically, to take note of all occurrences regarding them. Both classes are as much dreaded for their rapacity, as respected for their reputed sanctity. In some places in Upper India the *Bháṭs* are found forming village communities, and branching into various subdivisions. Some have become converts to Mohammadanism. The *Bháṭ* of the village establishment appears to be of an inferior class.

Bhát, H. (بهات) Advances to cultivators without interest. The name of a particular soil north of the Ganges, containing much nitre. In the Lower Doab and Bundelkhand the word means, Uneven ground. The more universal sense of *Bhát* is, Boiled rice, from the S. *Bhakta*. In Maraṭha, and in other places in the south of India, it is applied also to rice in the husk.

Bhátan, *Bháten*, Mar. (भातण, भातेण, for भात-तृण, S.) Rice-straw.

Bhát-set, Mar. (भातशेत) A rice-field, land fit for rice cultivation.

BÍGHÁ, BEEGHA, corruptly, BEEGA, BEEGAH, BEGAH, &c., H. (بيگها) BIGHÁ, Mar. (बिघा) A measure of land, varying in extent in different parts of India. The standard Bíghá of the revenue surveys of the north-west provinces is equal to 3025 square yards, or $\frac{5}{8}$ths of an acre. In Bengal, the Bíghá contained only 1600 square yards, or little less than $\frac{1}{3}$d of an acre. In Benares it was, at the time of the settlement, determined at 3136 square yards. In other parganas it was equal to 2025, to 3600, or to 3925 square yards. A Kachha (an immature or crude) Bíghá is in some places a third, in others only a fourth of a full or standard Bíghá. Akbar's Bíghá contained 3600 Ilahi-gaz, which have been considered as equal to the 3025 square yards of the Bíghá of Hindustan. Mr. Elliot specifies the following as some of the variations found in the Upper Provinces:—

		Bíghás.	Biswas.	Kattas.
Farakhabad - - - - - -	100 acres	=175	12	0
East and South Gorakhpur - -	,,	=192	19	7
Allahabad & part of Azimgerh,	,,	=177	5	6
Part of Azimgerh & Ghazipur,	,,	=154	6	8
Bijnur - - - - - - - -	,,	=187	19	15
In the Upper Doab (Kachha) -	,,	=582	3	0

In Cuttack the Bíghá is now considered to be an English acre. The Maraṭha *Bíghá* is called twenty *Páṇḍs*, or 400 square Káṭhis or rods, each five cubits and five hand-breadths: as the rod varies, so does the Bíghá: under the Âadil Shahi dynasty it was equal to 4383 square yards, or only 457 square yards less than an English acre. The Guzerat Bíghá contains only $284\frac{2}{9}$ square yards.

Bighaṭí, or *Bigháoṭí*, corruptly, *Begehree*, *Beegotee*, *Beeghari*, *Bighari*, *Bigharni*, H. (بيگهتي, بيگهاوتي) Accord-

ing to measurement by *Bíghás;* as revenue assessed at so much per *Bíghá;* also, division of lands by Bíghás among copareeners. Settlement of the revenue per Bíghá, with reference also to the quality and produce of the lands, generally made at a money rate, but sometimes in kind. A coparcenary village, in which the lands are distributed among the sharers in Bíghás and their fractional parts.

Bíghá-dám, H. (from *dám,* دام, price) Settlement of the revenue at so much per Bíghá, especially in villages held in common, in which the lands are apportioned in Bíghás, and the assessment proportionably rated.

Bigha-dán, H. (?) Rate levied on the sharers of an imperfect Paṭṭídárí village, to make good any deficiency of revenue left by the produce of the land held in common. (? If this and the preceding are not essentially the same.)

Bíghá-daftari, corruptly, *Beghah-duftery,* H. (from the P. دفتر, a record) Official record of the measurement of the lands of a district in Bíghás in the time of Akbar.

Bighárwaṇí, corruptly, *Begownee,* Mar. (विघावणी) Assessment of villages at a stipulated rate per *Bíghá.* Reduction into *Bíghás* of measurements by a different standard.

Biṛa, Biṛá, or Bíṛí, corruptly, Beree or Beedee, Anglicised Betel, H. (بيڑا بيڑه, बीड़ा, बीड़ी, S. वीटिका) A Pán or Paun, or small pieces of areka-nut, spice, catechu, and sometimes a little quick-lime, rolled up in a leaf of the piper-betel, to be slowly masticated, answering the purpose of an aromatic, astringent, and alkalescent condiment. It is much used by the natives of all parts of India, and is commonly presented from one to another, in token of civility or affection. It is also given in confirmation of an assurance of a pledge or promise, and among the Rájputs is sometimes exchanged as a pledge of defiance.

Birana, or, vernacularly, Bírná-khar, Hindi, (बीरनाखर, from S. वीरण) A tough coarse grass spreading over uncultivated lands which are inundated yearly, and removable only by digging.

Biṛár, Dakh. (بڑار) A drove of bullocks laden with grain, cotton, &c.; also Biṛki, (بڑکي).

Bírbání, Beerbanee, H. (بيرباني, from *vír* or *bír* (Lat. *vir*) a man, and *báni*, a form of the possessive affix, having a man, or husband) A term used among the Játs, and in the north-west provinces, to designate a man's own wife.

Bíṛgújar, Biṛgoojur, also Bargújar, Burgoojur, H. (بڑگوجر) One of the thirty-six royal races of Rájputs, settled chiefly along the Jumna, from Rohilkhand to Mathurá. Their chief town was Anupsheher, the rulers of which, as well as the branch of Katehr Bírgújars, are Hindus, but the other tribes are Mohammadans, although adopting the Hindu title of Thákur along with the Mohammadan appellation, as, Thákur Akbar Ali Khán. The Mohammedan tribes retain many Hindu customs, so that, as Mr. Elliot remarks, it is almost doubtful which religion they prefer. According to some of their traditions, they migrated into the Doab from Dajore, in the Macheri country; to others, from Deosar, in Jaypur, whence they were expelled by the Kachwahas. Rathor tradition places them in the vicinity of the hills bordering Rohilkhand in the fifth century.

Birháḍ, or Birhaṛ, Mar. (बिऱ्हाड) Lodging, residence in a lodging for a time.

Birháḍ bájáleṇ, Mar. (बिऱ्हाडबाजालें) A traveller's bag and baggage; lit., Lodging and bedstead.

Birhána, H. (برهانا) Lands in which culinary herbs are grown.

Birheriá, H. (برهيريا) A branch of the Chumár tribe.

Birinj, H. P. (برنج) Rice.

Birinjári, H. (P. آر, who brings) A dealer in rice following camps; more correctly, *Banjári*, q. v.

Birinjphal, H. A sort of rice.

Birjiá, H. (برجيا) A division of the *Ahír* tribe.

Birká, H. (برکا) A pond, a small well.

Birmbháṭ, H. (برمبهاٹ) A branch of the Bháṭ tribe, whose office is the recitation of ancestral exploits at family festivals. They are hired for the occasion. They reside permanently in villages and towns, and do not lead a migratory life, like some of the other Bháṭs. See *Bháṭ*.

Birodh, Ben. &c. (বিরোধ, from the S. *virodha*) Litigation, opposition.

Birra, H. (برّه) Gram and barley sown in the same field. In the Delhi district, chana or gram injured by wet. In East Oudh, a ceremony connected with the building of a house.

Birra, H. (برّه, but more correctly, بيوره, detail) Entry of the different crops of the village lands under separate heads in the Patwári's account.

Birrá-barár, H. (برّابرار, but apparently either a various reading, or an error for *Behri-barár*, q. v.) Collection in kind (Central Doab). Mr. Elliot suggests its derivation from '*Birat*,' separation on account of the crops being divided before appropriation, or from the *Birra* of the *Patwári*.

Birt, or Brit, H. (برت, from S. *vritti*, वृत्तिः, maintenance, support, means of livelihood) Grant or endowment to any person for his maintenance, or for religious and charitable

objects. Proprietary right, whether acquired by purchase, inheritance, or grant, heritable and transferable, subject to payment of revenue, either to Government, or to the Raja or Zamindar, when not specially exempt. A right, custom, or privilege derived from the performance of offices, whether secular or religious. A right to perform certain offices claimed by different castes. Fees to family priests. *Birt*, as used in Gorakhpur, has been supposed to indicate a peculiar tenure; but it does not seem to have any especial sense, or to be more than a local term, equivalent to other terms indicating a grant of land, either rent-free or at a stipulated rent, being merely a grant of land made originally by the Rajas of Gorakhpur and Benares, and held in absolute and hereditary right upon payment of a stipulated rent or revenue to the representatives of the original granter. The rent is liable to occasional adjustment, and to increase, if the Government demand on the Raja be increased. Although not liable to be dispossessed as long as the rent is paid, yet the occupant may be ousted, for a time at least, during which he is entitled to Málikána. He is also considered as at all times entitled to the Jalkar and Bankar, or products of the waters and the woods.—Revenue Report, Commons, App. iii. 81, par. 380. Various kinds of Birt are specified as recognised in Gorakhpur: as—

Jivan Birt, H. (جيون برت, lit., maintenance for living;) An assignment by the Raja to a younger son and his descendants of villages in perpetuity, granting them by Paṭṭa, or deed of lease, and receiving a fixed sum as rent. An allowance to the family of an old servant deceased.

Marwat Birt, H. (مروت برت, from *Marná*, to die) Compensation in land to the family of a man killed in the service of the Raja, chargeable with half the rent of a village held as Birt on the usual terms.

Sankalp Birt, H. (سنكلپ برت, from S. *Sankalpa*, संकल्पः, a vow) A religious grant to a Brahman, and held at first rent-free, but latterly subject to a small payment.

Birta, H. (in Nepal) Grant of land rent-free in absolute property and for ever.

Birtiá, H. (برتيا) One holding a *Birt*, or subsistence grant of any description, upon the terms of the grant. In Gorakhpur, the Birtias, according to Mr. Elliot, pay a fixed yearly sum, equivalent to 20 per cent. of the Government revenue, on account of the Raja or superior landholder; but they are the owners of the soil, and exercise the entire management of their villages, not liable to be ousted, holding an hereditary and transferable tenure, and subject to enhancement of rent only when the Government revenue is increased. (They do not appear, therefore, to differ essentially from Ryots holding hereditary property under a Zamindar, and not liable to dispossession as long as paying their rent; except that they are analogous to village Zamindars in excluding the district Zamindar from interference in the management of the villages.)

Birwá, H. (بروا) A tree. In East Oudh, The labourer employed to raise water with the Beri, q. v.

Birwáhi, H. (برواهي) An orchard. (From *Birwá*, a tree).

Bisáh, H. (بساه) Purchase, buying.

Bisahru, H. (بسهرو) A purchaser.

Bisal, Thug. A person intended to be killed, but who has clothes round his neck, or some hindrance to strangulation. A victim awkwardly handled. A Thug with traces of his crime on his dress.

Bísanam, Mal. (?) A second or lighter crop (Travancore).

Bisandhi, Thug. Fetters, any metal utensil.

Bisát, H. (بسات, less correctly, بساط) Mar. (बिशात) Stock, capital, goods, means.

Bisátí (A. بساطي, بساتي, from the A. بسط, a bed, a carpet) A pedlar, a hawker; a trader not keeping a shop, but exposing his wares on a carpet or mat spread on the ground. (The notion is the same as is expressed by *Bichháití*, q. v., and the terms are probably confounded.)

Bisen, H. (بسين) A powerful tribe of Rajputs in the eastern parts of the north-west provinces, the head of whom is the Raja of Salempur Majjhauli.

Bish, corruptly, Beesh and Beeshy, H. &c. (بش, also written and pronounced Bikh, بكه, S. विषः, *visha*) Poison in general, but usually applied to a root used sometimes in medicine (aconitum ferox). The fibrous stalk of the lotus (from S. बिस).

Bishá, Uriya (ବିଶା) A brass weight equal to 20 palas.

Bishkapra, H. (بشكپره) A kind of spreading grass used in medicine (trianthema pentandra).

Bishnprít or preet, corruptly, Bishunpereet, H. &c. (بشنپريت, S. विष्णु, *vishnu* and *príta*, प्रीत, grateful to, beloved by) whence also, *Bishnuprít*, Ben. (বিষ্ণুপ্রীত)

Lands held rent-free by Brahmans, or religious persons, professing the especial service of the deity *Vishṇu.*

Bishnprít-dár, H. (P. دار, who has) A Brahman holding lands granted in honour of Vishṇu.

Bishnottar, corruptly, Bishnowattur, H. &c. (بشنوتّر, S. विष्णोत्तर) Land held rent-free by Brahmans professing the worship of *Vishṇu*, or granted in honour of that divinity: hence also, *Baishnavottar* (from *Baishnav*, a follower of *Vishṇu*).

Bishnowi, H. (بشنوي) A tribe of growing importance in some parts of the north-west provinces, combining Hindu and Mohammedan practices and belief, generally terming themselves Sheikhs, but adding the title to a Hindu name.

Bisht, H. (بشت) A provincial term in Kamaon for a kind of *Táluḳdár*, appointed by Government.

Bísí, Beesee, H. (بيسي) A measure of weight, commonly a *Vis* or *Vísí*, equal to five *Sers*. In Garwhal and Kamaon, a dry measure; also a measure of land equal to 20 nalís, and 4800 square yards. In Rangpur, a land measure equal to 16 *dhans*.

Bisí, Bisee, Uriya, (ବିଷୀ) A fiscal division of the county a province or district paying revenue under the Hindu Government of Orissa: also termed *Bishe* (from S. *vishaya*, विषयः, a country).

Bissoï, or *Bishayi*, read also, *Bisaye*, (?) Uriya, The chief of a district in Orissa, collecting the Government revenue, and exercising police and judicial authority. The Desmukh of the Marathas.

Bisni, Thug. A Thug, a thief, any one living by plunder.

Bisodhan, Ben., Uriya, &c. (বিশোধন, S. विशोधनं, lit., making clean or pure) Acquitting, discharging, as a debt.

Bisodhan patra, Ben. &c. (পত্র, a document) An acquittance, a receipt, a written discharge or release.

Biswa, H. (بسوه, विश्व, from *bís* بيس, S. *vinsati* विंशति twenty) Lit., a twentieth, but applied especially to the twentieth part of a *Bíghá*. It is also used to express a proportionate share of proprietary right in a village which is conventionally taken as a *Bíghá*, divisible into twenty parts distributed among the sharers; as, a holder of five *Biswas* is proprietor of one-fourth; of ten *Biswas*, of a-half; of one *Biswa*, of one-twentieth; of half a *Biswa*, of one-fortieth, &c.

Biswa-barár, H. (برار, बरार, tax) Assessment or collection of the revenue upon the *Biswas* or shares of the land.

Biswadár, H. (P. دار, who has) The holder of a share or shares in a coparcenary village.

Biswadári, H. (P. داري, having) Proprietary tenure in *Biswas*, or shares so designated. Also the tenure of independent village communities holding under a superior Tálukdar, as in Aligarh, Mynpuri, and Gorakhpur. In some places, as in the Delhi district, the term is equivalent to *Paṭṭidári* or *Zamindari*. (In that case the derivation is probably different, and it may come from the S. *viswa* विश्व, all, whole).

Bíswah, Mar. (बीस्वक, from S. विंशति, twenty) The twentieth part of a *Pád*, which is the twentieth of a *Bíghá*. The *Bíswah* is one square *Káṭí*, or rod, which, however, varies in length.

Biswáli, Uriya (ବିସ୍ୱାଲି) Land assigned to the *Khandáyat*, or head of a division called a *Khanda* (or, more probably, the land assigned to the *Bissoï*, the H. *Khand* and U. *Bishé* meaning the same).

Biswánsa, or *Bíswansí*, H. (بسوانسه, from *Bisva*, and S. अंश *ansa*, portion) The fraction of a *Biswa*, usually the twentieth.

Biswí, H. (بسوي, विश्वी) The holder of a *Biswa*, or share, in which character the person may be appointed by a collector of revenue to collect the dues of the other sharers. Alienation of lands on a low quit-rent or payment of a fine (East Oudh). In the north-west provinces it sometimes implies a deduction of two Biswas per each Bíghá cultivated by under-tenants, claimed as his right by the landlord or lessor.

Bítá, Beeta, H. (बीता, more correctly, perhaps, Bhití, q. v.) Lands of a village that have existed from time immemorial, in opposition to lands recently acquired by alluvial deposit.

Bita or Bhíta, Thug. A hundred.

Bitaurá, H. (بتورا) A heap of dried cow-dung.

Bíṭaurí, Hindi (बीटौरी) A tax upon artificers and shopkeepers for permission to work or trade in a village. Puraniya.

Biṭhak, H. (بتّهك) Ant-hills (East Oudh and Benares); also a seat or platform where people meet to converse. See *Baiṭhak*.

Bít khét, H. (بيت كهيت) Lands on which forced or unrequited labour is demanded from the Ryots by the owner of the village.

Biṭ- or Biḍ lavaṇ, corruptly, Bitnoben, Hindi (विट or

विड लवण) A kind of medicinal salt, commonly known as black salt, formed by fusing common salt with Emblic myrobalan.

BITRÁ-BANDI, H. (بترا بندي) Arrangements for securing the revenue (Sagar). See BILA-BANDI.

Bráhman, Brahmun, dialectically, Bahman or Bohman, or, in Tamil, Párappan or Pirramanan, corruptly, Braman, Bramin, &c., H. (براهمن, S. ब्राह्मण्) A man of the first order or caste of Hindus, properly charged with the duty of expounding the Vedas, and conducting the ceremonies they enjoin: in modern times, engaged not only in such duties, but in most of the occupations of secular life. The Bráhmans of the present day are distinguished into a variety of divisions and subdivisions, between most of which no social relations exist. The first distinction is between those who maintain a sacred fire—and are thence termed Agnihotras—and those who do not, by far the larger proportion. A more universal distinction is that of the five *Gauṛa* and five *Dráviṛa* races. The first are the *Kányahubja*, or Bráhmans of Kanuj; *Sáraswat*, or north-west of India; *Gauṛ*, or Bengal; *Maithila*, or north Bahar; *Utkala*, or Orissa. The second are the *Dráviṛa*, *Tailanga*, *Karnáta*, *Maharáshtra*, and *Gurjar*, or Guzerat Bráhmans. Each of these has various subdivisions. According to a *Játi Málá*, or list of castes current in Hindustan, the principal are thus enumerated: 1. Kányakubja, four: *Sarjupári*, *Sarwaria*, *Jijhaulia*, and *Sanauḍhiya*. 2. Sáraswat, ten: *Bháradwájí*, *Sípoli*, *Chaini*, *Súdhani*, *Bhúratí*, *Khuhaṭí*, *Ranḳhaṭi*, *Bolí*, *Máli*, *Grahaṇi*. 3. Gauṛ, six: *Gauṛ*, *Párikh*, *Báhimí*, *Khandelwál*, *Sáraswat*, *Sukhwál*. 4. 5. The Maithila and Utkala Bráhmans have but one order. Of the five *Dráviṛas*, the Dráviṛa properly so termed has three divisions: *Bádam*, *Brihatcharan*, *Ashṭasahasra*. 2. Tailanga has six: *Telghánya*, *Belnáḍ*, *Begináḍ*, *Karnákammala*, *Munganáḍ*, *Kásalnáḍ*. 3. Karnáṭa, two: *Badgalnáḍ-Ṣilnáḍ*. 4. Maharáshṭra, eight: *Karáḍe*, *Chitpáwan*, *Deṣastha*, *Yajurvedi*, *Ápastambha*, *Abhír*, *Serabaï*, *Kayasthíprabhu*. 5. The Gurjara Bráhmans are of eighty-four tribes; the principal of which are the *Nágara*, *Mora*, *Audíah*, *Mewára*, *Srí-gaur*, *Khedewal*, and *Bhúïnhár*: (some of these names are very possibly inaccurate.) There are also two classes considered additional to the whole, *Ṣákadwípí*, who came latterly, it is

said, from *Ṣákadwípa*, and *Ġayáli*, said to have been made *Bráhmans* by *Vyása.* Each of the above has an infinite number of subdivisions. The Kanouj Bráhmans, from whom the Bráhmans of Bengal are reputed to spring, are said to have been divided, after their settling in Bengal, into a hundred and fifty-six families. Of these, one hundred are to be found in the portion of Bengal termed *Várendra*, and fifty-six in that termed *Ráṛh.* Of the former, eight, and of the latter, six are considered *Kulína*, or of good family, or noble; a classification ascribed to *Balál Sen*, a Raja of Bengal in the twelfth century. The first are named *Maitra, Bhíma, Rudra, Vágísí, Santámani or Sandyál, Láhuri, Bháduri, Sudhu-vágísí*, and *Bhadara.* The fourth and fifth names are not unfrequently met with, the rest seldom. Those of the *Ráṛh* Bráhmans are more common: they are *Mukhuti* or *Mukharji, Gánguli, Kanjláha, Goshála, Bandygati* or *Banarji, Chatati* or *Chatoji.*

Mar. (चौथ, for CHAUTHÁĪ, from the S. चतुर्थ, fourth) An assessment equal to one-fourth of the original standard assessment, or generally to one-fourth of the actual Government collections demanded by the Marathas from the Mohammadan and Hindu princes of Hindustan, as the price of forbearing to ravage their countries. The *Chauth* was collected by the Marathas through their own agents, and was divided into four parts: 1. *Ráj bábti*, a fourth allotted to the head of the State; 2. From the other three parts, denominated collectively *Mukhása*, six per cent. of the whole *Chauth*, termed *Sahotra*, was set apart for the *Pant Suchu*; 3. and *Nargunda*, or three per cent. was given away at the pleasure of the Raja or Peshwa; 4. The remainder, or *Ain Mukhása*, sixty-six per cent., was distributed among different *Jagírdárs*, to assist them in maintaining the troops they were bound to furnish for the use of the State. Even when a country came into the actual possession of the Marathas, the collections were made under the same titles as before, and appropriated in like manner. Under the British Government the *Sahotra* portion, or six per cent. on a fourth of the Government collections, is still enjoyed by the *Pant Suchu*; and some of the grants made from the *Ain Mukhása*, or nett surplus of the fourth, are still held by individuals. In Hindustan, under the Mogul Government, a *Chauth* was levied from the successful party in a law-suit or arbitration: the precise proportion is not stated, but it was probably a fourth of a rupee, or four anas per cent. on the value of the litigated property. (from उपाध्याय:, a teacher) A Bráhman supposed to be acquainted with the law, and exercising in some places in the Maraṭha country the functions of censor and judge of offences against the laws, especially of caste, and receiving perquisites and fees in that capacity.

Dharná, or Dharṇé, H., Ben., Mar., &c. (دهرنا, धरना, धरणे, from the S. धरणं) Sitting at the door of a house or tent, to compel payment of a debt due by a debtor, or of arrears owing by a public officer or prince. The person so sitting observes a strict fast, and as long as he so sits the person from whom he demands payment is obliged to fast also, and abstain from his usual occupations and amusements; as, if the suitor were to perish, the consequences of the sin would fall upon him. Originally the person sitting in Dharná was necessarily a Bráhman, either on his own behalf or that of another, and the sin of Bráhmanicide would be incurred by his death. The practice is not restricted to Bráhmans; but is altogether obsolete in the Company's provinces, having been made a punishable offence by Ben. Reg. vii. 1820. In some parts of the south of India a similar practice is observed, to extort a boon, or the promise of one, from an idol, by sitting permanently at the door of a temple until the attendant priests assure the person his desire will be granted. *Dharne*, in Mar., also means an armed party sent to seize an offender.

It is popularly known by the name *Diwálí*, but under that appellation is addressed to a different object, and has undergone popular modifications. See *Diwálí*.

Dípamálá, S. (from माला, a garland) A row of lights. A festival of the Sikhs, observed on the 14th of the dark half of Kártik. Also vernacularly, *Dípmál*, Mar., (दीपमाळ) A pillar in front of a temple on which lamps are suspended.

Dípárádhana, Tel. (దీపారాధన, from S. आराधनं, worshipping) Offering a lamp to an idol, worshipping an idol by waving a lighted lamp before it: also, in Mysore, setting fire to a cloth steeped in butter or oil, and suspended to the gate of a temple on the 15th night of the month Kártik.

Dípavárane, Mar. (from वारणे, to revolve) Waving a lamp before an idol, an act of worship.

Dípdán, H. (دیپدان, from S. दीप, a lamp, and दान, giving) Offering of a lamp to an idol. A particular popular ceremony, suspending a lamp to a tree for ten days after the death of a relation, in order to light the spirit on its way to Yamapuri, the city of Yama, the judge of the dead. Presenting a lamp to the Ganges, setting it afloat on the river lighted, and watching for its extinction, as ominous of good or ill luck. Also (derived from *Díp*, abbreviation of *Dwíp*, S. द्वीप, an island,) Land assigned to Bráhmans on the bank of a river, to deprecate its encroachment.

Dírá, Hindi (दीरा) Fresh lands thrown up by the shifting of the courses of rivers.

Dirm, or **Dirham**, H. (A. درم, درهم) A silver coin, usually weighing from 45 to 50 grains, rather heavier than an English sixpence. As a weight, a *dirham* is considered to be equal to $3\frac{1}{2}$ *máshas*, or $46\frac{1}{2}$ grains. The *dirm* is also sometimes distinguished from the *dirham*, the latter being equal to ten of the former.

Diṭṭhwan, H. (دٹّھون, a vernacular corruption of S. *Devotthána*, q. v.) A Hindu festival on the eleventh lunation of the light half of Kártik, on which *Vishṇu* is awakened with music and singing from his four months' slumber, constituting the rainy season: marriages and festive rejoicings, which have been but few during the interval, are now resumed: and on this occasion the cutting of the sugar-cane is commenced by the cultivators bringing home a small quantity from a corner of the field, and spreading it out for the reception of the Sálagrám-stone, or Ammonite type of *Vishṇu*: after this only, when the fortunate hour is announced, the sugar-cane harvest commences.

Diṭṭamu, Tel. (దిట్టము) Arrangement, settlement, estimated aggregate of the revenue of a village from investigation of each several holding.

Divákírtti, Mar. (दिवा, by day, and कीर्त्ति, repute) A barber, any one of a low caste. (A barber is not to be employed nor spoken of at night).

Divasá darwaṛá, Mar. (दिवसा, S., by day, and दरवडा, attack by robbers) Bare-faced extortion by the government, or officers in authority.

Diviṭí-inám, Tel. (దివిటీఇనాము) Land granted as the portion of the village torch-bearer.

Divyá, S. and in most dialects; vernacularly changed in some to *Dibya*, (दिव्य, divine) An oath, or, more correctly, an ordeal, various kinds of which were admitted by the Hindu law. 1. The *Tula*, or balance, in which the accused is first weighed against a weight properly adjusted, and then, after certain ceremonies, is again weighed: if he be lighter than before, he is innocent; if the same, or heavier, guilty. 2. *Agni*, or fire, in which the

accused touches fire or heated metal: if his hands are burnt he is guilty. 3. *Jala*, water: the accused is to be entirely immersed while a person runs to a place to which an arrow has been shot and returns with it: if he then lives he is pronounced innocent. 4. *Visha*: the accused is acquitted on his swallowing poison with impunity. 5. *Kosha*: drinking holy water, that in which images have been bathed, and meeting with no misfortune for fourteen days afterwards. 6. *Taṇḍula*: chewing grains of rice and ejecting them: if they are dry, or tinged with blood, the suspected person is pronounced guilty. 7. *Tapta-másha*: taking a *másha* weight of gold out of a vessel filled with hot butter or oil, without burning the fingers, is proof of innocence. 8. *Phála*, the ploughshare: holding with impunity a heated ploughshare, or similar blade of steel. 9. *Dharmádharma*: images or drawings of *Dharma* and *Adharma*, virtue and vice, are covered carefully with cow-dung or earth, and placed privately in a vessel: the accused draws one of them, and is declared innocent or guilty accordingly: this is also termed *Dharmárchá*, worship of *Dharma*. 10. *Tulasí*, holding the leaves of the Tulasi plant, which is sacred to *Vishṇu*, and some water, and, after repeating the form of the oath, swallowing them. Some of these forms of ordeal are still in use among native states, and that of chewing rice is occasionally employed for the detection of petty thefts by the police-officers of the British government. There are other forms also in popular use, some of which are rather modes of adjuration than ordeals, although the notions are blended; as, 1. *Kachcha ghaṭa* or *ghaṛá*, H. Mar. (from *kachcha*, raw, unbaked, and *ghaṭa*, or *ghaṛá*, a water vessel) filling an unbaked earthen vessel with water, and carrying it on the head for a certain distance without breaking it. *Bel-bhanḍára*, (q. v.) Swearing by the leaves of the *Bel*. *Gangájala*, (S. *Jala*, water) Swearing while holding a cup with the water of the Ganges, or some sacred stream. *Devála*, or *Deválaya*, swearing in a temple before an image. *Gau*, holding the tail of a cow; or *Bráhmaní*, touching the feet of a Bráhman, while pronouncing an oath. *Símá*, or *Símbá*, a boundary: in a case of contested boundaries, a person is selected by both parties, who, after performing religious ceremonies, walks over and points out the proper boundary: if no misfortune befal him or his family within a given term, his decision is considered final: or sometimes he walks the boundary with an oil-cake on his head, the falling or breaking of which vitiates his demarcation. These different modes of determining innocence or guilt, or of giving evidence, are accompanied with various forms and observances, according to the supposed sanctity, and the importance of the judgment.

Diwálá, H. (ديوالا) Diwáleṇ, or Díwalúṇ, Mar. (दिवाळें, दिवाळूं) Diwáḷí, Karn. (ದಿವಾಳಿ) Bankruptcy, insolvency.

Diwaliyá, very corruptly, *Devaleeo*, H. (ديواليا) A bankrupt. (This and the preceding are variously derived from *dípa* or *diwá*, a lamp, because, it is said, it was formerly the practice to announce the event by placing a piece of burning cow-dung at the bankrupt's door, or because it was customary to announce insolvency at the *Diwálí* festival.

Diwálí, corruptly, Deepoulee, H. &c. (ديوالى) Deülí, Ben. (দেউলী) Karn. Díwaḷigeïchha, (ದೀವಳಿಗೆಯುಚ್ಛ, from the S. *Dípáli*, or *Dípávalí*, q. v.) A popular festival of the Hindus, the feast of lights, held on the two last days of the dark half of Aświn and the new moon and four following days of Kártik (Sept.—Oct.). Appropriate ceremonies are allotted to each day, but on the last the night is to be spent in merry-making and festivity, and illuminations are to be made in honour of deceased ancestors. The goddess *Lakshmí*, or fortune, is also to be worshipped, and in her honour games of chance are to be played during the last night of the festival. Amongst the Maraṭhas it is the commencement of the commercial year, over which *Lakshmí* especially presides, and accounts are opened by merchants and bankers with individuals for the smallest sums—a few rupees—as ominous of success. Bankruptcies are also declared at this season. In Bengal the lower orders of the Mohammadans, in imitation of the Hindus, also offer lamps at this time to the spirits of the dead.

Díwán, incorrectly, Dewan, Deewan, Divan, H. &c. (P. ديوان): in the dialects the *i* is short, as Dibán, Ben. (দিবান) Diwáṇ, Mar (दिवाण) A royal court, a council of state, a tribunal of revenue or justice. A minister, a chief officer of state. Under the Mohammadan government it was especially applied to the head financial minister, whether of the state or of a province, being charged, in the latter, with the collection of the revenue, the remittance of it to the imperial treasury, and invested with extensive judicial powers in all civil and financial causes. Under the Maraṭha government the *Díwán* was the chief minister

after the *Pradhán.* The title also denoted the head officer of any revenue or financial department, as the *Díwán* of the mint, of the jewel office, and the like; in which sense it is retained under the British goverment, as the *Díwán* of the mint, of the bank, of the salt-agency, and, formerly, of a collectorate, and is even applied to the managers of Zamindárís for native proprietors, and to native servants intrusted with the management of the financial interests of a house of business, or of nny responsible individual. The title of *Díwán*, or office of *Díwání*, equivalent to the right of collecting the whole revenues of Bengal, Bahar, and Orissa, was conferred upon the East-India Company by the nominal emperor of Hindustan, Shah Âálam, in 1765. The word also signifies a record or account book; and, in Mohammadan law, the bags in which the Ḳazi's records are kept.

Díwání, incorrectly, *Dewani,* and, corruptly, *Dewanny,* H. (A. ديواني) adj., Of or relating to a Díwán, civil, as opposed to criminal. subst., The office, jurisdiction, emoluments, &c., of a Díwán. The right to receive the collections of Bengal, Bahar, and Orissa, conferred on the East-India Company by the titular Moghul. It is used also in the early reports for the territory of which the revenue was receivable under the grant in Bengal.

Díwán-dene or *dhárá,* Mar. (from देणे, to give, or धारा, fixed rate) Any tax or assessment.

Díwán-juz, H. (جز, a little) A sub- or deputy-steward, or finance officer.

Díwán-i-Âám, H. (from A. عام, all or common persons) A public court, or general audience chamber.

Díwán-i-khás, H. (from A. خاص, select) Private audience chamber. A cabinet council.

Díwán-i-khálṣa, H. (A. from خالصه, pure, most eminent) The accountant-general of the royal revenue.

Díwán-i-daftar, H. (دفتر, an office) The account or record office of the Díwán.

Díwání-sanad, H. (from A. سند, a grant) A patent or grant under the authority of the Díwán. A grant of the office of Díwán. The deed of grant by which the Díwání was conferred upon the East-India Company.

Díwán-i-tan, H. (from P. تن, the body) The chief financial minister in attendance on the emperor. The officer charged with the provision of the emperor's personal expenses. (He is called, in some of the early reports, *Díwán Beutal,* which is clearly erroneous, although it may have some relation to *Byay* or *Vyay* expenditure).

Díwánu, Karn. (ದಿವಾನು) The head native officer of a *Kachcheri.*

Díwár, Deewar, H. (ديوار) The tutelary divinity of a village for whom a portion of grain is set apart at each harvest; commonly represented by a shapeless stone, although bearing various personal appellations, as, *Kateswari, Hanwat, Bhúm-sen, Hari-Rám,* &c.

The most general application is, a Mohammadan religious mendicant, who wanders about the country, and subsists upon alms. Many orders of them are known in Hindustan, named after their founder, or some peculiar practice or doctrine. They are generally divided into two classes: 1. Those who are *Básharâ*, with the law, having families, and following the precepts of the Koran; they are also known as *Sálik*, travellers or pilgrims: and 2. *Be-sharâ*, without the law, or *Majzúb*, 'abstracted,' who lead a life of celibacy and seclusion, and whose sanctity is such as to place them above the necessity of observing the rules of the Koran. The chief Hindustani *Fakírs* are, 1. The *Kádaría* or *Bánawá*, who profess to be the spiritual descendants of *Saiad Abdul-kádir Jiláni*, of Bagdad. 2. The *Chishtía*, followers of *Banda-nawáz*, whose shrine is at *Kalbarga*; they are usually Shias. 3. *Shútária*, descendants of *Abdul-shútár-i-nák*. 4. *Tabkátia*, or *Madária*, followers of *Sháh Madár*; many of these are jugglers, and bear or monkey leaders. 5. *Malang*, descended from *Jaman Jatí*, one of *Shah Madár's* disciples. 6. *Rafái*, or *Gurz-már*, descended from *Saiad Ahmed Kabír Rafái*, who appear to beat, cut, and wound themselves without suffering inconvenience, and who, in the belief of the faithful, can cut off their own heads, and put them on again. 7. *Jalália*, followers of *Saiad Jalál ud din Bokhárí*. 8. *Sohágia*, from *Músa Sohág*, who dress like women, wear female ornaments, play upon musical instruments, and sing and dance. 9. *Naksh-bandía*, followers of *Bahá ud din*, of *Nakshband*, distinguished by begging at night, and carrying a lighted lamp. 10. *Báwá piári ha fakírán*, who dress in white. There are other distinctions; and at the *Muharram* a number of the lower classes assume the character and garb of Fakírs, of different ridiculous personations, for the amusement of the populace, and the collection of contributions.

FASKH, H. (A. فسخ) Breaking an agreement, dissolving a contract, breaking off or dissolving a marriage.

FASL, FUSL, corruptly, FUSSUL, H. (A. فصل, from the verb فصل, to divide) A section, a chapter; but in India more commonly a section of the year, a season; thence also, a crop or harvest. There are two principal harvests in the year, spring and autumn, to which a third is sometimes added; they are—

Fasl-i-rabíí, commonly, *Fusuli-rubbee*, or simply, *Rubbee*, (فصل ربع) The spring harvest, which yields dry crops, as wheat, barley, different kinds of pulse and grain that do not require irrigation or much water: the seed is sown towards the close of the periodical rains, or in September-October, and the crops are gathered about February and March.

Fasl-i-kharíf, or *-khureef*, H. (A. فصل خريف) The autumnal harvest, consisting chiefly of rice, or grains requiring irrigation. The seed is sown at the commencement of the rainy season, and the crop is usually reaped after their close, or about October-November.

Fasl-Bhádonwi, H. (فصل بهادونوي) This is an intermediate harvest of occasional cultivation, consisting of grains of quick growth, as millet and different sorts of pulse which may be sown at the beginning of the rainy season, and gathered in the month of *Bhádra*, or about September: this is, however, commonly included in the Kharíf.

Faslána, H. (فصلانه) Relating to the harvest or the crop; a fee or perquisite derived from it, &c.

Faslí, *Fuslee*, corruptly, *Fassily*, *Fusly*, H. (فصلي) Belonging to the harvest, or season when cultivated, or lands productive of crops assessed according to the value of the crops, or frequency and abundance of the harvests. The harvest year—a mode of computing time prevailing throughout India, and one of the forms used in giving a date to all public orders and regulations. The era originated with the emperor *Akbar*, who, finding different eras current, thought to simplify the existing chronology by introducing a new mode of computing time. In fact, however, he only aggravated the confusion, by adding to the number; the old eras still continuing to be current along with the new. According to *Akbar's* directions, the year of the *Samvat*, corresponding with the *Hijra* year 963=A. D. 1555, and which was therefore *Samvat* 1612 (1555+57), was arbitrarily shorn of 649 years, and called the *Faslí* year 963, the same as the *Hijra*. Starting from this point, it has since gone on concurrently with the *Samvat*, or luni-solar year of the Hindus; so that by adding 649 years to the *Fasli* year, we get the *Samvat* year; and by adding 592-93, the difference of the Christian era (649 − 57=592), we obtain the Christian date. The *Fasli* year began on the 10th of the lunar month *Aswin*, corresponding to the 10th September 1555: if more than four months of the year have expired, the addition is 593. Thus, the date of Reg. i., 10th February 1833, corresponds with the 1st of *Phálgun* 1889 (1833+56) *Samvat*, and with the 1st of *Phálgun* 1240 (1833 − 593) *Fasli*. In the Dakhin the *Fasli* year is reckoned somewhat differently, being two years later than the same year in Hindustan, having been introduced by *Sháh Jehán*. The addition to the *Fasli* therefore, to convert it into the Christian year, is only 590; thus, the Bomb. Reg. dated *Fasli* 1239 is equivalent to A. D. (1239+590) 1829. The Tamil year of *Fasli*, 1257-58, corresponds with 1848 (=1258+590). The year is, or ought to be, sidereal; but the Madras government fixed its commencement to the 12th July. Its subdivisions are little attended to, as its sole use is its application to revenue matters; and the year only is specified, not the months.

Fasl-jásti, Tel. (ఫసలుజాస్తి, from P. *ziádatí*) An extra crop, one more than usual: an extra cess imposed on land bearing more than one annual crop.

Fasl-kamí, H. (from P. كم, less) Deficiency of harvest. Deduction from the revenue on account of a scanty crop.

Gauḍ, pronounced Gauṛ, H. &c. (گوڑ) S. Gauḍa, (गौड, গৌড) The ancient name of Central Bengal, and that of the ruins of its former capital. A name applied to one of the two great divisions of the Bráhmans, or the Five *Gauṛas*, (see *Bráhmana*); also to one of the five, the Bráhmans of Bengal proper, who are distinguished again as *Varendriya*, *Ráṛhiya*, *Sáṭshati*, and *Vaidika* Bráhmans: the two first from their being settled in the several portions of *Gaura*, called *Varendra* and *Ráṛh*; the third as descended from 700 Bráhmanical families who were settled in Bengal before the introduction of the families from Kanoj, who are said to have been fugitives from Orissa; the fourth from their knowledge of the Vedas. The *Gauṛ* Bráhmans were also classed by *Balál Sen*, a Raja of Bengal about the eleventh century, in three divisions: 1. *Kulínas*, from *kula*, a family, the most respectable members of the community; 2. *Ṣrotriyas*, those who had passed through the established institutions, and had read part of the Vedas; and 3. *Vanṣajas*, merely born Bráhmans, possessing neither respectability nor learning. There are other divisions of Bengal Bráhmans of a still inferior description, degraded by acting as priests for the mixed castes, or by some peculiarities of a fanciful and fabulous character. The term *Gauṛ* is also applied to other castes or tribes, as specified by Mr. Elliot.

Gauṛ-Bráhman, H. (گوڑ برهمن) The Bráhman of the *Gauṛ* tribe or caste, one of the five *Gauṛs*, but located in the upper provinces throughout the Subah of Dehli to the hills. There are many subdivisions of these *Gauṛ* Bráhmans of Hindustan, who are apparently unknown in

Bengal, as, the *Ádh-Gauṛ*, *Kaithal-Gauṛ*, *Gújar-Gáuṛ*, *Sidh-Gauṛ*, &c., amounting in all to forty-two.

Gauṛ-Rájpút, H. (گور راجپوت) One of the thirty-six royal Rájput races whose origin is doubtful. They are numerous in the north-western provinces, divided into three principal branches:—the *Bhaṭ-Gauṛ*, *Báhman-Gauṛ*, and *Chamar-Gauṛ*; names derived, Mr. Elliot supposes, from some intercourse with Bháts, Bráhmans, and Chamárs.

Gauṛ-tagá, H. (گور تگا) An important tribe of Bráhmanical descent in the north-west of India, extending through a great part of Rohilkhand, the Upper Doab, and territory of Dehli. According to the fables current among them, they were originally invited from Bengal by Raja Janamejaya, king of Hastinapur, for the purpose of exterminating the Takshakas or snakes, in concert with the Raja. Mr. Elliot considers the *Takshakas* to have been Buddhist Scythians from the north, who invaded India about 500 years B. C. The *Tagas* are so termed, it is said, from the S. *tyága*, abandoning, as they abandoned their Bráhmanical character by accepting and cultivating the lands granted to them by Janamejaya.

Gauṛ-ṭhákur, H. (گور ٹھاکر) A tribe of Rájputs, settled in the Farakhabad district.

Gauḍ, Gauṛ, or Gauḍa, also spelt Gavuḍa, corruptly, Gowda, and Gowdoo, Karn. Gaz, Guz, vernacularly, Gaj, or Guj, H. (P. گز) A measure of length, a yard. In the reign of Akbar there prevailed a great number of measures of this denomination, varying in length from 18 to 58 inches; to correct which disorder, they were all abrogated, and a standard *gaz* established in their stead, termed the *Iláhi-gaz*. The actual value of this measure was made the subject of many inquiries and experiments upon the institution of the great revenue survey of the western provinces, when it was found to be the basis of all the records of land measurements in that part of India: as no standard had been preserved, a fixed object of comparison could not be procured, and the different reports and measurements made it vary from 29 to 35 inches, and as the majority of actual measures of land made it 33 inches, that was assumed as the fixed standard value, and it constitutes the basis of the survey measurements. In trade, a greater latitude prevails, and the cloth merchant, in particular, has a *gaz* of his own, equal to two *háts*, or cubits, or an English yard.

Goshwára-kul, H. (from A. كُل, all) A complete abstract or summary of the whole.

Goswámí, S. (गो, sense or passion &c., स्वामी, master, one who restrains his passions, modified vernacularly as Gosáin, Goosáin, Gosámi, or simply Sámi or Swámi, Gosáí, Gosávi, Gosáyí, &c.) A religious mendicant in general. As a special name it is applied to very different classes of persons, identified only by their professing a religious and mendicant life. The most respectable are the reputed descendants spiritually of Ṣankara Áchárya, of whom there are ten chief branches, and who are thence also called the *Daṣ-námi*, or ten-named Gosains, attaching to the ordinary Hindu appellation one of the terms, *Tírtha*, (shrine), *Ásrama*, (an order), *Vana* and *Araṇya*, (a wood), *Saraswatí*, (the goddess of eloquence). *Bhárati*, (the goddess of speech), *Puri*, (a city), *Giri* and *Parvata*, (a hill), or *Ságara*, (the ocean), as, *Ananda-giri Vidyáraṇya, Puran-gír, Rama-ásrama*. These, although they are occasionally vagrants, are usually assembled in *maths*, or conventual residences, under a superior: some of their establishments are liberally endowed, and of great reputed sanctity, particularly that of Sringeri, in the western Ghats, near the sources of the *Tungabhadrá*, said to have been founded by *Ṣankara* himself. Individuals of the

three pure castes are admissible, and in some cases Ṣúdras also; but as they profess celibacy, their numbers are in part recruited by the purchase or adoption of boys at an early age. The *Daṣ-námi Gosains* worship preferentially *Ṣiva*, of whom *Ṣankara* is said to have been an *avatára*; but many have been distinguished as advocates of the Vedánta doctrines. One division of them, termed *Atíts*, differs from the more rigid *Daṇḍí-gosains*, in following secular pursuits, as traders and ministrant priests of temples: some of them even marry and settle, when they are termed *Samyogis*, or *Gharbáris*. These Gosains, although met with in Upper India, are most numerous and influential in the south. In Hindustan the name is more correctly applied to two different classes, both worshippers of Vishṇu, the *Gosains* of *Gokul*, who are descended from *Vallabha Áchárya*, and, although religious characters, are allowed to marry and follow secular pursuits, and the *Gosains* of Bengal, who are the disciples of *Chaitanya*, a native of Bengal, who instituted a new form of Vaishnava worship at the end of the fifteenth century. They also marry, and, like the *Gokulastha*, lead domestic and respectable lives. The term is also applied loosely to mere vagrants, some of whom wandered about formerly in armed gangs, and levied contributions forcibly on the villages, plundered them, or now, coming singly, or in small bodies, extort money by inflicting disgusting tortures upon themselves: these sometimes go naked.

Gosávní, Mar. (गोसावनी) A female Gosain; one who, on arriving at years of discretion, adopts a life of continence and mendicancy.

Ḍaurí-Gosávi, Mar. (डौरी गोसावी) A class of religious vagrants, said to be disciples of Gorakhnáth; in which case they are not properly Gosains, but Jogis: they sing hymns in honour of Bhairava, playing on the *ḍaura* (डौर), or a small drum shaped like an hour-glass; whence their name, *ḍaurí*, a player on the *ḍaura*.

Got, H. &c. (گوت, abbreviated from गोत्र, q. v.) A family, a race; a family of Bráhmans, bearing the common name of some Ṛishi, their supposed progenitor, or primitive spiritual head, as, *Sándilya*, *Kásyapa*, *Bháradwaja*, &c. Any branch or subdivision of a tribe or caste. A caste collectively.

Got, Thug. A large city.

Gota, Thug. Stones, especially from graves.

Gotá, Hindi (गोता) The mustard-seed crop (Puraniya).

Gotáí, Mar. (गोताई) Ceremonies observed by Ṣúdras prior to the re-admission of a man who has forfeited his caste.

Gotpat, or *-pát*, Mar. (गोतपत-पात) A caste or family collectively. Ceremonies of receiving back a man who has lost caste among Ṣúdras.

Goth, Guz. (ગોથ) Four; a private number used by merchants, &c. *Goth-padi*, fourteen.

Goṭáṛá, Hindi (गोटारा) The rich lands immediately adjacent to the village (Puraniya).

Goṭbastí, Hindi (गोटबसती) The chief or first assemblage of houses erected on the settlement of a village: those subsequently built form the *thola* or *paṭṭí*.

Gotra, S. &c. (गोत्रः) Family, lineage, relationship by descent from a common ancestor of the same name. A family, a tribe, especially applied to races of Bráhmans who profess to regard some celebrated saint as their progenitor or their primitive spiritual head, and whose designation they bear; as, the *Bháradwája-gotra*, *Kásyapa-gotra*, *Sándilya-gotra*, &c. The term, at least in its vernacular form *Got*, has come to signify a subdivision of any common tribe or caste.

Gotraja, S. (गोत्रज) A kinsman of the same family and name, the '*gentile*,' in opposition to the *bandhu* or kinsman of a different family or cognate. Adoption is preferably enjoined in the same *gotra*, while marriage is prohibited.

Gotrahatyá, S. (हत्या, killing) Striking or killing a person of the same *gotra*.

Gotra-varanam, S. (from वरणं, choosing) Ceremony of repeating the genealogy of the bride and bridegroom at a marriage: (it should probably be *varṇanam*, describing, relating).

Graha, S. (ग्रह, from ग्रह्, to take) A planet.

Grahapatra, S. (from पत्र, a leaf) A horoscope, a table indicating the positions and aspects of the planets at any particular moment, as at birth, marriage, &c.

Grahapújá, S. (from पूजा, worship) Worship of the planets, to render them propitious.

Grahaṇa, S., Ben., &c. (ग्रहण) An eclipse. Taking, accepting, seizing, apprehending. In the dialects more usually *Gahan*.

Grahíá, Uriya (ଗ୍ରହୀଆ) A mortgage, chiefly of lands.

Gram, English. The term current for varieties of pulse, especially for native chaná, the chick-pea (Acer arietinum).

The word is probably of Portuguese origin, from *Grao*, grain.

Grám, or Gráma, S. &c. (ग्राम), the term occurs in all the dialects, sometimes in the primitive form, but usually modified, as, Gám, Gánw, or Gáon, corruptly Gaum, (गाम, गांव, गाओं), also varied according to inflexion, as, Grámamu, Tel. (గ్రామము), or to alphabetical peculiarities, as, Kírámam, (so written though pronounced Grámam), Tam. (கிராமம்), Grámam, Mal. (ഗ്രാമം) A village, literally; but, as specifying a municipal and fiscal division, a hamlet, a township, consisting not only of the residences of the inhabitants, but of a tract of land around them within determinate boundaries, including arable and pasture lands, wood, waste, and water. The organization of such townsbips prevails, in principle, throughout India, but varies in practice in different parts of the country: they are, however, reducible, in the first instance, to two principal classes, one of which is so far the property of one individual that a single person is responsible for the revenue, and collects it from the cultivators as if from his tenants, exercising the right to distrain their goods, or eject tbem altogether, on failure of their paying their stipulated or customary share of the government demand, and claiming also a right to impose upon them occasionally cesses and charges, and, in some cases, to let tbe lands to temporary occupants at a stipulated rent: in the second great class the government revenue is paid direct by a number of individuals claiming proprietary rights in the village lands, paying either severally, or through a head man, who is one of their own community, representing them either by hereditary descent or election. Modifications of both these descriptions occur: tbus, of tbe first, in Bengal generally, and in the north-west provinces occasionally, the proprietary rigbt is vested in one individual, either by his having been in possession of such right from the earliest recorded period, or from having acquired it by purchase when lands have been sold for arrears of revenue: tbese are known as Zamindárí tenures. In the south of India, in the Tamil provinces, an *Ekabhogam* (sole enjoyment), or *Ijamán* (*yajamána*, or householder) *Grámam* is usually the property of a single individual, eitber in his own person or as head of his family: sometimes, however, the village is distributed amongst a body of hereditary proprietors, over whom the *Ijamán* bas a controlling power, allotting the lands amongst them according to their shares, and apportioning and collecting the revenue: no sale of the land can be effected without his sanction. The second great class of villages, in which the proprietary right is vested in a certain number of individuals, who are responsible for the public revenue, is the most numerous class, and may once have been universal: these coparcenary tenures present many peculiarities, which it is necessary to become acquainted witb for each in particular, in assessing tbe public revenue, but they may be chiefly distinguished as of three kinds: 1. Those in which the whole land is held and managed in common; the rents paid by the cultivators, whether they be the proprietors themselves or tenants under tbe proprietors, being thrown into a common stock, with all other profits from the estate, and, after deducting expenses, the balance is divided amongst the proprietors, according to old and established practice: these are called in Hindustan *Zamíndárí* villages, as the occupants are termed village *Zamindars*, to distinguish them from the *Zamindárs* of Bengal, or they are termed *Bhayachara*, or brotherhood villages. In the south of India they are called *Pasung-karai* and *Pangu-vaḷi*, or by the S. terms *Samudayam* or *Samohi*. *Panguvaḷi* and *Samudayam* are especially applied to coparcenary tenures, in which the allotments are liable to revision and re-adjustment from time to time, on the agreement of the occupants. 2. The more general form of coparcenary villages is that termed in the north-west provinces, *Paṭṭídárí*, in which the lands are divided into *Paṭṭís*, or shares, and held in severalty by the different proprietors, or *Paṭṭídárs*, each person managing his own lands, and paying his fixed share of the government revenue; tbe whole being jointly responsible, in the event of any one sharer failing to fulfil his engagements: in the south these tenures are known as *Arudi-karai*, *Áchandrárkam*, *Bhaṭṭavrittí* or *Bharttvartí*, *Palabhogam*, q. v. 3. A third form is that known in the north-west provinces as the *imperfect Paṭṭídárí* village, in which part of the land is held in common and part in severalty; the profits of the land held in common being first appropriated to the government revenue and tbe village expenses, and the overplus being distributed, or the deficiency made good, according to a rate on the several holdings, when the proprietors are said to pay their revenue by *Dhár-báchh* or *Bíghadám*, q. v. Villages may also be denominated from the mode of the dis-

tribution of the lands, as the *Bíghati* of the upper provinces, where the division of the allotments usually held in severalty is by *bíghás*, or their fractions: the *Vísabadi* of the Ceded districts, where the division is by *visas*, or sixteenths, which are usually held in common: the *Nírwa* or *Bhágwár* villages of Guzerat, in which the village is distributed into *bhágas*, or portions according to the original number of sharers: these *bhágas* are subdivided by *ánas*, or sixteenths, amongst the heirs of a deceased proprietor, according to their number and respective rights, and these *ánas* may be again subdivided into fractional sixteenths, termed *ánis* and *chárvals*: *Bhágwár* villages are usually held in severalty. In some parts of Hindustan villages are primarily divided into a certain number of nominal integral parts, usually twenty, which are called *biswas*, and then again into fractions of twentieths, termed *biswánsís* and *harwánsís*: these portions are distributed amongst the representatives of the original proprietor or proprietors, constituting the proprietary shares, termed *Pattís*, or sometimes *Péns*, q. v.: the *Pattí* is divisible according to the number of the heirs of a *Pattídár*, into smaller portions, called *thoks*, *tholas*, or *dheris*, and these may again be subdivided into smaller shares, termed *behrís*. *Thok* is sometimes convertible into *Pattí*: see these terms severally, also the Tamil terms, *'Pangu* and *Karai*. When the proprietors of a village are of different classes or religions, it is primarily divided between them according to their respective interests, and the portions in Hindustan are termed *tarafs*; so that there may be a Mohammadan and a Hindu *taraf* in one village, each being severally divisible according to the prevailing usage. Every village has an establishment of municipal officers and servants, more or less complete, according as its organization has been more or less interfered with: see under the word *Baluta*.

Grámadevatá, H. (S. ग्रामदेवता) *Grámdebta*, or *-debtá*, Ben. and Uriya (গ্রামদেবতা) *Grámdeo*, Mar. Hidád, A. (حداد) Mourning. In law, the mourning of a widow for her husband, total abstinence from the use of ornaments, and of perfumes or unguents, except medicinally.

Hifẓ, Hifáẓat, H. (A. حفظ, حفاظت) Preserving, protecting, guarding, taking care of.

Hijra, H. (A. هجرة) lit. Departure from one's country, separation of friends or lovers; whence it gives name to the departure or flight of Mohammad from Mecca to Medina, which, in the Khalifat of Omar, was constituted the commencement of the Mohammadan era: this event took place on the night of Thursday the 15th of July, A. D. 622. The usual era therefore reckons from the dawn of the 16th of July. The Mohammadan year is strictly lunar, consisting of twelve months, each of which should count from the actual visibility of the new moon; but chronologically the months are completed at 30 and 29 days alternately, making the year consist of 354 days; but eleven times in a cycle of thirty years one day is added to the year, which makes the average length of the Mohammedan lunar year $354\frac{11}{30}$ days, or 354d. 8hrs. 48min., and the average length of the months 29d. 12hrs. 44min. The intercalary years of the cycle are the 2d, 5th, 8th, 10th, 13th, 16th, 19th, 21st, 24th, 27th, and 29th. To ascertain if any given year be an intercalary year, it is to be divided by 30, when one of the specified numbers will be the remainder; thus, A. H. 1137 divided by 30=37, leaving 27, and it will be therefore the 27th year of the cycle. The rule given by Major Jervis, from Professor Carlyle, for finding the corresponding years of the Hijra and the Christian era, is only an approximation: "Multiply the centuries of the year by 3, and add to the product for the years over the century as many times as it may be divided by 33, deduct the total from the whole number, and add to the remainder 621;" thus, Required the year of our Lord corresponding to the year H. 1396; then 13 × 3=39, to which add 2, the quotient of 96 divided by 33, making 41; then 1396 − 41=1355 + 621=A. D. 1976." That this is not correct in cases where the number in excess of the centuries, is a trifle less than 33, or a trifle more than any of its multiples is evident from a comparison with the standard tables: for instance, the year 1132 should be, according to this rule, A. D. 1720, but it begins 14th November 1719 according to the tables: so 1198 should be 1784, but in the table it begins 26th November 1783. The result, however, is near enough for general purposes, requiring correction only as to the period at which the year commences. Another rule for the same is—Multiply the Hijra year by 970203, cut off six decimals, add 622.54, and the sum will be the year of the Christian era, and decimal of the day following, in old style; thus, A. H. 1215 × 970203= 1178.796645, leaving 1178 + 622.54=1800.54. The Hijra year commences on the 25th May; so that this again is only an approximation. A more simple form, and one which also shews the day on or about which the concurrence of the Mohammadan and Christian year commences, is the following: Multiply the Hijra year by 2.977, the difference between 100 solar and as many lunar Mohammadan years; divide the product by 100, and deduct the quotient from the Hijra year; add to the result 621.569 (the decimal being the equivalent of the 15th July, *plus* 12 days for the change of the Kalendar); and the quotient will be the Christian year from the date at which the Mohammadan year begins; thus, Hij. 1269 × 2.977=37778, which divided by 100=37.778 and 1269 − 37.778=1231.222 + 621.569=1852.791, or to 9 months and 15 days, *i. e.* the 15th of October, which is the commencement of the Hij. year 1269. The reverse formula for find-

ing the corresponding Hijra year to a given Christian year is thus laid down: Subtract 622 from the current year; multiply the result by 1.0307; cut off four decimals, and add .46; the sum will be the year, which, when it has a surplus decimal, requires the addition of 1: thus, 1852 − 622 = 1230; 1230 × 1.0307 = 1267.7610 + .46 = 1268.22; add therefore 1, and we have the equivalent Hijra year 1269. Comparative tables of the Christian and Mohammadan years are to be found in "L'Art de verifier les dates," "Playfair's Chronology," "Prinsep's Useful Tables," Calcutta, and "M'Cudden's Oriental Eras," Bombay, 1846; but they are not always quite correct. The months of the Mohammadan year, and the number of days in each, are the following:—

1.	*Muharram*	days 30,
2.	*Ṣafar*	„ 29,
3.	*Rabíá-ul-awal*	„ 30,
4.	*Rabíá-us-ṣání*	„ 29,
5.	*Jumádi-ul-awal*	„ 30,
6.	*Jumádí-us-ṣání*	„ 29,
7.	*Rajab*	„ 30,
8.	*Shâbán*	„ 29,
9.	*Ramaẓán*	„ 30,
10.	*Shawál*	„ 29,
11.	*Ẓilkâda*, or *Ẓulkâda*	„ 30,
12.	*Ẓilhijja*, or *Ẓulhijja*	„ 29,

except in the intercalary years, when this last month has also 30 days. The Mohammadans in India commonly employ the Persian names of the days of the week, which are, for the first five only, the numerals prefixed to the word *Shamba*, "a day;" or sometimes the Arabic names, which are similarly composed with *Yaum*, "a day," and the numerals as far as five: the sixth and seventh have special denominations; as,

Sunday	*Ek-shamba*	*Yaum-ul-ahad*,
Monday	*Do-shamba*	— *ul-iṣnain*,
Tuesday	*Seh-shamba*	— *us-ṣaláṣa*,
Wednesday	*Chahár-shamba*	— *ul-arbâá*,
Thursday	*Panj-shamba*, or *Jumâ-rát*	— *ul-khamis*,
Friday	*Jumá*, (the day of assembly or prayer)	— *ul-jumá*,
Saturday	*Shamba*, or *Hafta*, (the 7th)	— *us-sabât*, (the Sabbath).

Inâám, H. (A. انعام) vernacularly, Inám, corrupted to Enam, or Enaum, Ben. (ইনাম) Mar. (इनाम) Tel. (ఇనాము) A gift, a benefaction in general, a gift by a superior to an inferior. In India, and especially in the south, and amongst the Marathas, the term was especially applied to grants of land held rent-free, and in hereditary and perpetual occupation: the tenure came in time to be qualified by the reservation of a portion of the assessable revenue, or by the exaction of all proceeds exceeding the intended value of the original assignment; the term was also vaguely applied to grants of rent-free land, without reference to perpetuity or any specified conditions. The grants are also distinguishable by their origin from the ruling authorities, or from the village communities, and are again distinguishable by peculiar reservations, or by their being applicable to different objects. They are first classed as *Sanadi*, and as *Gáon-nisbat-Inám*.

1. *Sanadi-Inám* is a grant emanating from the ruling power of the time of the grant, free from all government exactions, in perpetuity, and validified by *Sanad*, or official deed of grant: it usually comprises land included in the village area, but which is uncultivated, or has been abandoned; and it is subject to the *Haks*, or dues of the village functionaries. It may be granted sometimes with a reservation of a half, a third, or a fourth of the government claim known as *Inám-nímai*, *I. tijái* and *I. chauthái*.

2. *Gáon-nisbat-Inám*, (from the A. نصبت, a portion) Lands granted rent-free by the village out of its own lands; the loss or deduction thence accruing to the government assessment being made good by the village community. Seven kinds of such grants are specified; as, 1. The *Inám* of the *Mukaddam*, or officiating head of the village, termed *Inám-passoree*, (or, perhaps more correctly, *I. páseri*, the latter meaning maintenance). This is saleable or assignable in mortgage with or without the office of *Mukaddam*; it is liable to the dues payable to the village servants on land of the like quality. 2. Land assigned to the *Mhar*, of two kinds; see *Hinki* and *Hadoli*, or *Márhi*. 3. *Devasthán*, free lands attached to temples and mosques: it is not transferable in any way, either by the village, or the persons attending on the temples, whose duty it is to sell the produce, and apply the money to the ordinary expenses of the temples. 4. *Inám-waveyley*, (? *-máwali*) Lands granted to the village artificers and servants, in place of dues upon the produce: this is more common in the *Máwal*, or hill country, than in the *Dés*, or country above the *Ghats*: the lands may be mortgaged, but not sold, and are resumable by the donors. 5. *Dharmádaya*, corruptly, *Dhermudow*, Lands assigned in charity, saleable and assignable in mortgage. 6. *Deva-tekí*, A parcel of land occasionally held by a *Mukaddam* or *Mhar*, in reward of his having established by ordeal disputed territories: it may be sold or mortgaged. 7. *Pál*, or *Sút*, A small piece of land held rent-free in connexion with land bearing revenue, to compensate for some deficiency in the produce of the latter: it

cannot be sold or mortgaged separately, but remains annexed to the larger portion.

Another classification of Maraṭha *Inám* lands arranges them under six heads, according to the objects of the donation; as, 1. *Hindu Ináms*, which are subdivided into seven classes, viz. (1) Rent-free lands assigned by the state, or by the village, to Bráhmans of reputed sanctity or learning, not engaged in secular affairs; (2) to the *Gosávi*, or village Gosain, to enable him to keep up his *math*, or religious dwelling, and accommodate travelling mendicants of a similar character, usually a village benefaction; (3) to individuals for military services, granted by the state, or Jagírdars and great officers; (4) to *Bháts*, or bards, granted both by the state and the villages; (5) *Gaocharani badal*, revenue remitted on some of the village lands, on the plea of their being appropriated to the grazing of cattle belonging to religious persons; (6) *Jangam-inám*, land granted by villages inhabited by *Lingáits* to their priests; (7) *Yátrá-che-háthí*, lands granted by the village to persons for keeping up and conveying flags (from *háthí*, a flagstaff) to *yátrás*, or fairs held in honour of some deity. 2. The second of the major or generic classes are *Mohammadan Ináms*, consisting of rent-free grants made by opulent Mohammadans to religious persons of their own faith, and to a variety of vagrants, mendicants, tumblers, jugglers, &c. 3. *Devasthána Ináms* are lands assigned for the support of religious establishments, whether Hindu or Mohammadan, and for the keeping up of temples, shrines, mosques, &c. 4. *Dharmadáya Ináms* are lands appropriated to religious persons, as an act of charity, by the heads of the government, and by the village communities: some of these are of considerable antiquity, and are frequently confirmed by *Dána-patras*, grants inscribed on copper plates. 5. *Dehangi Ináms*, numerous but limited assignments to a variety of village artificers and servants, musicians, dancers, and the families of individuals who have lost their lives in the service of the state, or of the village. 6. *Watandári Ináms*, or assignments to the village officers and servants. Besides these classifications, which are especially applicable to the *Maraṭha* countries, a variety of terms occur in relation to the designation of *Ináms*, either of local or general applicability.

(ಜಾಗೀರು) lit., Taking or occupying (*gír*) a place or position (*já*, or *jái*). A tenure common under the Mohammadan government, in which the public revenues of a given tract of land were made over to a servant of the state, together with the powers requisite to enable him to collect and appropriate such revenue, and administer the general government of the district. The assignment was either conditional or unconditional; in the former case, some public service, as the levy and maintenance of troops, or other specified duty, was engaged for: the latter was left to the entire disposal of the grantee. The assignment was either for a stated term, or, more usually, for the lifetime of the holder, lapsing, on his death, to the state, although not unusually renewed to his heir, on payment of a *nazarána*, or fine, and sometimes specified to be a hereditary assignment; without which specification it was held to be a life-tenure only: Ben. Reg. xxxvii. 1793. cl. 15. A Jágír was also liable to forfeiture on failure of performance of the conditions on which it was granted, or on the holder's incurring the displeasure of the emperor. On the other hand, in the inability of the state to vindicate its rights, a Jágír was sometimes converted into a perpetual and transferable estate; and the same consequence has resulted from the recognition of sundry Jágírs as hereditary by the British government after the extinction of the native governments by which they were originally granted; so that they have now come to be considered as family properties, of which the holders could not be rightfully dispossessed, and to which their legal heirs succeed, as a matter of course, without fine or *nazarána*, such having been silently dispensed with. This is particularly the case in the Maraṭha territories, in which, when first conquered, Jágír grants were found to be numerous, reducible to three classes—1. those held by descendants of the original ministers of the Rajas, as the *Pratinidhi* and the *Pradháns*, prior to the usurpation of the Peshwa, but continued, in some instances, under his rule; 2. those held by military chiefs, on condition of service, some of whom have held their fiefs from the time of the Mohammadan monarchies; and 3. those held under grants from the Peshwas, generally Brahmans or Maraṭhas of low family: they were all allowed to retain their lands on the principle of securing their services on a moderate scale, preserving the sovereignty of the British government entire, and interference with the chiefs on extraordinary occasions only. With regard to the Jágír in general, the especial object and character of the grant was commonly specified by the designation attached to it, as in the following examples: see also Ben. Regs. xxxvii. 1793. xlii. 1795. xxxvi. 1803. xiii. 1825. Bomb. Reg. xvii. 1827. x. cl. 38. Reg. vi. 1833. The term is also in use, although with some license, to designate temporary grants, allowances, or stipends, from the government to individuals.

KÁCHHÍ, CÁCHHEE, H. (کاچھی) Guz. (કાછી) A tribe of cultivators found in most parts of Hindustan, of which they are the gardeners especially, being employed in market

and flower gardens, and raising vegetables and flowers for sale. In Behar they are the principal growers of the poppy. Those of the north-west provinces, who are mostly industrious agriculturists, reckon seven branches, usually denominated *Kanaujia*, *Hardíha*, *Singrauria*, *Jamanpuria*, *Bamhania* or *Maghya*, *Jaretha*, and *Kachhwáha*, which do not eat together or intermarry. There are, however, as noticed by Mr. Elliot, other distinctions, and in the Maraṭha territory some of them are named from the countries whence they have come, as the *Bundela* and *Márwári Káchhis*.

Kachhiár, H. (?) Land enriched by alluvial deposit on the banks of the Chambul, commonly cultivated for market produce by *Káchhis*, whence its name.

Kachhwárá, H. (کچھوارا) Any portion of ground cultivated by *Káchhis*. Mr. Elliot derives the name of the province of Cach, corruptly Cutch, from this circumstance: it rather seems derivable from the Sanskrit *Kachchha*, any tract of low or marshy ground near to a river or the sea.

Kachhwá, H. (کچھوا, कछवा) Low land.

Kachhwáha, Cuchhwaha, H. (کچھواها) A distinguished tribe of Rájputs professing to descend from *Kuṣa* or *Kusha*, the son of *Ráma*, and forming the ruling race in Amber of Jaypur, the Raja of which is of the clan.

KÁMAT, Mar. (कामत) A distinction amongst the *Senawis*, q. v., usually added to the name, as *Rám-Kámat*.

KAMATAMU, or, omitting the final, KAMATA or KAMATAM, corruptly, KUMENATAM, KAMBATAM, and COMPTUM, Tel. (కమతము) The cultivation which a cultivator carries on with his own stock, but by the labour of another: the land which a Zamindar, Jagirdar, or Inamdar keeps in his own hands, cultivating it by labourers, in distinction to that which he lets out in farm. The word occurs apparently, although not very commonly, in Upper India, as *Kámat*, (कामत), to signify lands held by a non-resident tenant, who cultivates by a hired servant, or *Kámatí*, (कामती); also, an entry in the village accounts of the land so rented, and by whom (Puraniya). In the Doab of the Dakhin, *Kámat* lands are described as either those reserved by public officers for their own use, Jagír lands cultivated by their servants, or lands not expressly Inám, but appropriated or obtained in grant by public servants or great men, and cultivated either by hired or compulsory labour.

Kamatagádu, Tel. (కమతగాడు) *Kamatagáranu*, Karn. (ಕಮತಗಾರನು) A person who cultivates lands belonging to another with the farming stock of the owner.

KÁMÁṬHÍ, corruptly, KAMATEE, COMPTÍE, and COMPTÍE-BANIA, Mar. (कामाठी) A caste of *Súdras*, or individual of it; according to one statement, those in the Maratha districts are distinguished as Tailanga and Karnáta *Kámáthís*, from their country: at Puna they are said to be employed as rice-cleaners, grinders of corn, and cutters of sticks, tent-pitchers, and artillerymen; they also sell snuff: in Telingana they are also petty retail dealers, or chandlers: in Mysore they are chiefly employed in road-making, and in repairing public works: in general they seem to be common labourers, and are probably the same as the Ganges water-carriers of Hindustan: see *Kámárthí*.

KÁMÁṬÍ, KÁMÁṬIGANU, Karn. (ಕಾಮಾಟಿ, ಕಾಮಾಟಿಗನು) A bricklayer, Tel. (కామాటి) A pioneer, a labourer, one who works with a pickaxe or spade (no doubt the same word as the preceding Marathí term).

Kánamvaram, Mal. (കാണംവരം) A mortgagee.

Kánappáttam, Mal. (കാണപ്പാട്ടം) Mortgage tenure of lands; interest on the money advanced on mortgage.

Kánam, Mal. (കാണം) An advance or deposit of money made to a proprietor of lands or gardens on receiving them from him at a stipulated rent, upon lease for a given term of years: the deposit bears interest, which the tenant sets off against the rent: the principal is returned when the lease expires and the occupant does not renew it. This is therefore a somewhat different application of the same term from a loan upon a mortgage where the lender holds the land as a security; here the landlord holds the deposit as a security for his rent. (Although spelt exactly in the same manner, it is possible that the two words are not identical. In Walker's report on Malabar, he says this *kánam* is from the Sanscrit word, signifying 'a little,' 'an ear of corn,' &c.; in which case the derivative, like the original (कण), should be written with a short, not a long vowel, *Kanam* or *Kunum*, not *Kánam*, *Kanum*; the apparent identity may therefore arise from the vernacular disregard of the correct spelling).

Kánam-janm-maryáda-aranyavar, Mal. Assessors by whom the value of an estate is determined, and the proportions of the tenant and landlord adjusted.

Kánam-kondavan, (? for *Koruvan*, കൊഴുവൻ) Mal. A tenant, a person who gives security by a deposit for payment of rent.

Kánam-páttam, Mal. (from പാട്ടം, rent) Leasehold tenure of lands or gardens on payment of a rent, or proportion of produce equal usually to two-thirds, or the money value of that proportion of the produce.

Kuli- or *Kuri-kánam*, incorrectly, *Koori-kanom*, Mal. (കുഴിക്കാണം) Money paid to a tenant on his relinquishing his lease, or to a mortgagee when a mortgage is paid off, for any improvements they may have made, especially for any fruit-bearing trees, as cocoa-nuts, &c., which they may have planted: on the other hand, if the property has been depreciated by neglect, compensation is deducted from the original deposit or loan: this is also termed, according to Mr. Græme, *Nádi-kánam* (നാടികാണം).

Kanama, Tel. (కనమ) A breach in the bank of a tank, whether accidental or artificial; a pass between two hills.

Kanát, H. (A. قنات) The walls of a tent, or an external screen of canvas surrounding a tent.

Kanaujía, Canoujía, incorrectly, Kanojiya, H. (كنوجيه, कनौजीया) A designation of various tribes in Hindustan, implying a notion of their having come originally from Kanauj, or Kanyákubja: it is especially applied to a large and influential tribe of Bráhmans, one of the five classes of Gauda Bráhmans: five chief subdivisions of them are reckoned, all numerous and well known—*Kanaujía proper*, *Sarwaria*, *Sanaudha*, *Jijhotia*, and *Bhunhár*, who are again divided into sixteen classes, named either from their reputed founders, who were celebrated sages, as *Garga*, *Gotama*, and others; or from their former acquirements, as *Dobe*, *Tewari* or *Trivedi*, *Chaube*, or as learned in two, three, or four Vedas, or from their having been teachers, as *Bhattachárj* and *Upádhyáya*; or from other circumstances, as *Pánde*, *Díkshit*, *Bájpeyi*, &c. The *Kanaujias proper* are found principally in the central Doab, extending into Bundelkhand on the one hand, and on the other into Oudh, and are divided into six or six and a

half families, thence termed *Khat-* (for *shaṭ*, six) *kul*, or, severally, *Gotes*, (from the S. *gotra*; a race), as the *Sandel-gote, Upamán-gote, Bháradwáj-gote, Bharadwáj-gote, Kátyáyana-* or *Viswámitra-gote, Kasyapa-gote,* and *Sahrint-gote.* These correspond in rank to the *Kulín* Brahmans of Bengal, and, although taking wives from the other tribes, allow their daughters to marry only into one of the *Khat-kul.* The *Sarwaria* class is also called *Saryu-* or *Sarju-pária,* living beyond the Sarju or Gagra river, or chiefly in Gorakhpur. The *Sanaudhas* are met with principally in Rohilkhand and the upper and central Doab, extending westwards to Gwalior. The *Jijhotias* are settled to the south-west. The *Bhoonhárs* are found with the *Sarwarias* in Oudh, and spread to the hills of Bundelkhand. The term *Kanaujia* is applied, however, to other than Brahmanical tribes, and we have *Kanaujia Kúrmis,* or agricultural castes, and even *Kanaujia Thugs.*

LINGA, S. adopted in all the dialects, (लिङ्ग) A mark, a characteristic sign: the distinguishing mark of gender or sex; the male organ: the phallus, as the type of Ṣiva, and as worshipped in all parts of India: it is usually of stone or marble, and is set up in temples especially appropriated to the worship of *Ṣiva*, or *Mahádeva*, under this form. There were, at the time of the Mohammadan invasion, twelve principal *Ṣiva-lingas* in India, namely, 1. *Somanátha*, in Guzerat; 2. *Mallikárjuna*, in Telingana at Srísailam; 3. *Mahákála*, at Ujayin; 4. *Omkára*, on the Narbudda; 5. *Amareṣwara*, also at Ujayin; 6. *Vaidyanáth*, at Deogerh in Bengal; 7. *Rámeswára*, at Ramiseram; 8. *Bhímaṣankara*, in Rajamahendri; 9. *Tryambaka*, at the sources of the Godávarí, 10. *Gautameṣa*, where, unknown; 11. *Kedáreṣa*, on the Himalaya; and 12. *Visveṣwara*, at Benares. In the south the principal *Ṣiva-lingas* at present worshipped are at *Kánchi* or *Conjeveram*, *Jambukeṣwar* near Trichinopoly, *Tirunamale*, *Kálahastri*, and *Chidambaram*: one sect of Hindus, the *Víra-Ṣaivas* or *Jangamas* of the south, wear a small representation of the *linga* in a case round the neck or on one arm, whence they are called also *Lingadháris*, and *Lingavants*, as below.

Lingá-ít, Mar. (लिंगाईत), *Lingadhári*, or *Lingavant*, erroneously, *Lingumut*, Karn. (ಲಿಂಗಧಾರಿ, ಲಿಂಗವಂತ) A member

of the *Jangama* or *Víra-Saiva* sect, or a worshipper of Siva as the *Linga*, and carrying a representation of the type about his person: the sect, which is numerous in the central and southern parts of the peninsula, is of modern origin, being founded by a Brahman named Básava, residing at Kalyán in Karnata in the middle of the 12th century. The *Lingáits* differ from the Brahmanical followers of Siva in denying the sanctity of the Brahmanical order, and the authority of the Vedas; in the recognition of various divinities, and in virtually abolishing the distinction of caste, and the inferiority of females. One division of them, termed *Árádhyas*, are, by birth, Brahmans; but the rest, who are more especially termed *Jangamas*, are of the *Súdra* and mixed castes, and look upon the *Árádhyas* as their inferiors. The *Jangamas* are again distinguished as two-fold—*Sámánya* or ordinary, and *Visésha* or extraordinary, the latter professing greater purity of manners. There is also a lower grade of sectaries, or *Bhaktas*, who are likewise distinguished as *Sámánya bhaktas*, and *Visésha bhaktas*; the former retain their caste, but in all other respects are the same as the *Sámánya Jangamas*; the latter are entirely exempt from caste, and are bound by vow to honour the *Guru*, or spiritual teacher, the *Linga* and the *Jangama*, or brother in the faith: accounts respecting their manners vary; but as an inveterate hostility subsists between them and the Brahmans, accounts derived from the latter are not to be depended on. The *Jangamas* have a literature of their own, written mostly in the Karnata and Telugu languages, particularly the *Básava Purána* in the former. The *Árádhyas* are sometimes well versed in Sanskrit literature.—Account of the Jangams, by C. P. Brown, Madras Journal of Literature and Science.

Mahal, Muhul, pl. Mahál, Muhal, H. &c. (A. محل, محال) A place, a house, an apartment, a seraglio: a station, a street, a district, a department: (in the Hindu dialects this word is written indifferently *Mahal*, or *Mahál*, as in Beng. and Mar. (মহল, মহাল, महल, महाल), confounding the sing. and plur. numbers, and using both in the sense of the singular, as in the following):

Mahál, corruptly, *Mahl*, *Mhal*, *Mâal*, *Mohaul*, *Mehaul*, *Mal*, H. &c. (محال, properly the pl. of محل, but used as a sing. noun. with a plur. of its own, or *Mahálát* محالات), *Mahál*, or *Máhál*, Guz. (મહાલ, માહાલ) A province, a district, as the *Jangal-mahals*, on the west of Bengal; a division of a *Taálluk*, or district, yielding revenue according to assessment. In the language of the Regulations a *Mahál*, or *Mehál*, is called an estate, and is defined, any parcel or parcels of land which may

be separately assessed with the public revenue; the whole property of the revenue-payers in the *mehál* being held hypothecated to government for the sum assessed upon it. Beng. Reg. xlii. 1803, ch. 2, sect. 2, and xi. 1822, sec. 29. Under the Mohammadan government the term was also applied to a head or department of miscellaneous revenue derived from a tax on some particular class of things or persons, as, *Mahál-i-kághaz*, the tax or duty on paper; *Mák-i-mahál*, the duty on fish; *Nimak-mahál*, the revenue derived from the monoply of the sale of salt; *Mahál-abkári*, the department of the excise: so in Karnata, *Mahálu* (ಮಹಾಲು) meant revenue, or sources of revenue, chiefly territorial, but comprising other objects. In Puraniya, the items of the village *Hast-o-bud*, were termed *mahál*s: the word is in fact very vaguely employed. In some places a certain right is intended, capable of being rented, as the *Mom mahál*, or right to the wax found in the forests of a given tract. In Cuttack, the plural *Mahálát* was applied to the lands which paid the full assessment to the state, in contrast to the *Kiláját*, or military estates paying a quit-rent only.

(మణుగు) A measure of weight of general use in India, but varying in value in different places. Four principal varieties are specified by Mr. Prinsep; 1. the Bengal *maund*, containing 40 *sers*; 2. the *maund* of Central India, consisting of half the quantity, or 20 *sers*; 3. the *maund* of Guzerat, consisting of 40 *sers*, but of lesser value, making the Bombay *maund* 28lb. avoirdupois; and 4. the *maund* of Southern India, fixed by the Madras government at 25lb. In Bengal there were also two kinds of *maunds*, the *Bázár maund*, of the value above described, or, more correctly, 82lb., being based upon the computation of 80 sicca rupees to a *ser*, and 40 *sers* to the *maund*, the rupee weighing 179.666 Tr. grs.; and the *Factory maund*, introduced into the Company's commercial transactions in 1787, apparently for the convenience of converting it into English weight, the *Factory maund* being = 74lb. 10 oz. 10.666 drs., and three such *maunds* being almost exactly equal to 2 cwt. In 1833 the Bengal government directed the discontinuance of both in the public offices, and established a *maund* weighing 100lb. troy, or $87\frac{2}{7}$lb. avoirdupois, based upon the change of the weight of the rupee to 180 grs. troy, which made the new *maund* heavier by $\frac{2}{7}$ths of a pound. The *maund* of Akbar's time was equal to but $34\frac{3}{4}$lb.; and still, in various parts of India, great differences prevail, extending from 25lb., as at Bombay and in Mysore, to 163lb., the weight of the *maund* in some parts of the district of Ahmadnagar, in which the highest values occur: the term is used rather laxly in the west of India as the unit of land measure, one *man* being equal to four *rukas*, or 16 *payalis*, or 32 *adholis*, or 40 *chakurs*, q.v. The Hebrew *Mann*, or *Manah*, from which, through Arabic, the Indian word is derived, corresponded more nearly to the *ser*, being but 13,125 troy grains, or less than 2lb. avoirdupois.

Mukaddam, corruptly, Mokuddum, Mocuddim, Mugadum, H. &c. (A. مقدم), Mar. (मुकद्दम), Makadam, Uriya (ମକଦମ) A chief, a leader, one who goes before: in India, applied especially to the head man of a village or of a caste or corporation: in the Maratha villages the head man was usually charged with the realization of the revenue and its payment to the district collector, with the superintendence of the cultivation, the management of the affairs of the village, and the disbursements of its expenses: he was also intrusted, to a certain extent, with jurisdiction in disputes among the cultivators, and with the police: in Hindustan, the *Mukaddam* has, in some places, become solely responsible for the public revenue, having been suffered to assume the character of a petty proprietor, and being designated as *Málik-mukaddam*; under the former system the title was not unfrequently given to the village Zamindárs. In some places the term is applied to the hereditary occupant of an estate in a village, immovable as long as paying a fixed rate to the Zamindár or the Raja. The *Mukaddam-biswadár* is usually a head man who holds an entire share of a village, and sometimes an entire village, but in some places he appears to have been reduced to the state of hereditary cultivator from having been part proprietor of the village, in consequence of the title having been appropriated, through fraud or violence, by some individual proprietor. In Cuttack, the *Mukaddams* are regarded in a similar light, but are divided into two classes, the *Mazkúri-mukaddam*, who pays direct to government (the term *mazkúri*, q. v., having here the reverse of its usual meaning), and the *Záti*, or *Játi-mukaddam*, who pays through an intermediate revenue payer, or *Mál-guzár*: the title is sometimes applied to a farmer of several villages. Where the *Mukaddam* only represents the village he is sometimes allowed a portion of land, either rent-free or held at a quit-

MUK

rent. Ben. Reg. ix. xii. 1805; vii. 1822. In Guz., a *Muḳádam* is commonly the name of a supervisor, especially of one employed by a merchant to superintend the landing or shipment of goods, &c.

(ముఖాసా, మొఖాసా), Mokásá, Mar. (मोकासा) A village or land assigned to an individual either rent-free or at a low quit-rent, on condition of service; or a village held *khás* by the state, the revenue being paid to the government direct; or the share of the government in a village, or in the revenue paid by it: the term, as current among the Marathas especially, is somewhat differently explained by different authorities: according to one statement, it was applied to the remaining portion of the *chauth*, or fourth of the revenue of tributary countries after the fourth set apart for the Raja had been deducted; from this, again, a further portion, or six per cent. on the *chauth*, being set apart for certain officers of the state, the remainder, termed *Ain Mokásá*, or simple assignment, was distributed amongst the military chiefs in requital of their services. According to a different account, the *Mo-*

kásá was the remainder of the whole revenue after a fourth had been set aside; this remainder, or three-fourths of the whole, was subject to the deduction of six per cent. upon it, termed *Sahotra*, and to two per cent. termed *Nargaud*; the former of which was appropriated to the *Pant-suchiu*, the latter to the different subordinate functionaries: the several designations were preserved after the lands or villages on which the *chauth* had been levied as a tribute were incorporated with those of the Maraṭha principality: (the term, although supposed to be of Hindustani derivation, is not familiarly used in Upper India, and is chiefly current, in its vernacular forms, in the south).

Mukhása-, *Mokhasa-*, or *Mokása-dár*, Tel. &c. (from P. دار, who has) The holder of a village, or of lands, at a quit-rent, or rent-free, on condition of service: under the Maraṭha government the *Mokása-dár* had much the same powers as the *Mámlat-dár*.

Patriká, S. (पत्रिका), *Patrike*, Karn (ಪತ್ರಿಕೆ) A written paper, a letter, a deed, a document.

Patrudu, Tel. (పత్రుడు) A steward, a cash-keeper, a manager for another.

PÁTRA, vernacularly, PÁTR, S &c. (पात्र) A vessel; whence, fig., a fit person, a person of capacity.

PAṬRAVÁḌU, Tel. (పట్రవాడు) A man of a tribe of hill people.

PAṬṬA, S. &c. (पट्ट) Silk, a band or fillet of silk, especially of old the mark of royalty; as seen on the coins of the Seleucidæ and their Indo-Bactrian successors: in Karnáta a plate of brass with magic verses worn for some days on the forehead of a Brahman to avert the consequences of having been born under an unlucky conjunction of the stars.

Paṭṭaráṇí, S. &c. (पट्टराणी) *Pátrání*, H. (پاٹرانی) A queen, one who has been crowned or has had the royal fillet on her brow.

PAṬṬÁ, PUṬṬA, corruptly, POTTAH, current in most dialects, sometimes slightly modified, H. (پٹا), Mar. (पट्टा), Tel. (పట్టా), PAṬṬE, Karn. (ಪಟ್ಟೆ), PAṬṬO, Sindhi, PAṬṬA, PAṬṬÁ, Uriya (ପଟ୍ଟ, ପଟ୍ଟା): it is also read in Beng. and Uriya with a single *ṭ*, and in the former with the first vowel long, PÁṬÁ, PAṬÁ (পাটা, ପଟା), PAṬṬAYAM, PAṬṬÁ, corruptly, PATTIAM, PATTIOM, Tam. (பட்டயம், பட்டா) PAṬṬAYAM, Mal. (പട്ടയം) A deed of lease, a document given by the collector to the Zamindár, or by some other receiver of revenue, to the cultivator or under tenant, specifying the condition on which the lands are held and the value or proportion of the produce to be paid to the authority or person from whom the lands are held: the term is laxly applied to a variety of deeds securing rights or property in land, also to a deed of gift in general: also, in the south of India, to a title or appointment of office, or to the office itself, as to that of manager of a temple: *Paṭṭas* have been the subjects of frequent legislation. Ben. Reg. viii. 1793; iv. 1794; v. 1795; v. 1812; vii. 1822. Madras Reg. xxx. 1802; v. 1822.

PAṬṬAIYAM, Tam. (பட்டையம்) A deed of gift either on paper or copper: (see *Paṭṭayam*, under *Paṭṭa*: it is no doubt the same word with the Tamil nominal termination).

PAṬṬAKDÁR, corruptly, PUṬṬUCKDÁR, (?) An officer employed originally to collect the revenues of government in Tanjore, and who, in many cases, appropriated the estates and became identified with the *Mirásidár*—Fifth Rep. 957. (According to the Glossary, the term means lit. book-keeper, accountant, from H. *Patah* (پتك), but there is no such word in Hindustani in that sense, nor in any other dialect, as far as the dictionaries are authority).

PÁṬṬAM, commonly written, PÁṬAM, and, corruptly, PATOM, Mal. (പാട്ടം) Rent, hire, contract, lease (no doubt the *Paṭṭá* of other dialects, but applied to the thing rather than to the document, as by the following): the *Pátam* of an estate in Malabar is a stipulated proportion of the produce, paid in kind in the case of grain, in money in that of plantations.

Páṭṭa-chíṭṭá, corruptly, *Patom-chit*, *Putta-chit*, Mal. (പാട്ടച്ചീട്ട) A deed of lease, the written engagement given by the landlord to the tenant, also by the tenant to the landlord, agreeing to pay a certain amount of rent.

Páṭṭa-kánam, Mal. (പാട്ടകാണം) Rent, tax: rent of a property paid to a certain extent in advance. See *Kánam-pátam*.

Páṭṭa-kandam, Mal. (പാട്ടക്കണ്ടം) Rented corn-fields.

Páṭṭa-káran, or *Páṭṭam-káran*, or, in current use, *Pátamkár*, (പാട്ടക്കാരൻ) A tenant, one who holds land by paying rent.

Páṭṭakudissika, Mal. (പാട്ടകുടിശ്ശിക) Arrears of rent.

Páṭṭanella, Mal. (പാട്ടനെല്ല) Rent paid in kind or in rice-corn.

Páṭṭapaṟa, Mal. (പാട്ടപ്പറ) A large measure, or *paṟa*, used in measuring seed-corn: the produce, and the proportion as rent.

Páṭṭapaṟamba, Mal. (പാട്ടപ്പറമ്പ) A garden or plantation let on lease.

Páṭṭapravritti, Mal. (പാട്ടപ്രവൃത്തി) The office of rent-gatherer to a temple: the office of a victualler.

Páṭṭayola, or *Páṭṭola*, or *Páṭṭayolakaranam*, Mal. (പാട്ടയോല, പാട്ടോല, പാട്ടയോലക്കരണം, from *ola*, the palm leaf, and *karanam*, an instrument) A lease, a deed of lease or of transfer of land upon mortgage.

Maṟupáṭṭam, Mal. (മറുപാട്ടം) Counterpart covenant of lease kept by the proprietor.

Veṟum-páṭṭam, corruptly, *Veerom-paṭṭom*, Mal. (വെറും-

പാട്ടം) Rent without any advance or security, simple rent: (from *verum*, empty).

PAṬṬAM, Tam. (பட்டம், S. पट्ट) Government, authority, kingdom: a head ornament symbolical of authority: a crown.

Paṭṭaṅkaṭṭi, Tam. (பட்டங்கட்டி) A chief: a village headman of the *Paravar*, or fisherman caste.

Paṭṭólai, Tam. (பட்டோலை), *Paṭṭola*, Mal. (പട്ടോല) lit., The crown *ólai*, a royal edict: also government records, monthly abstract of the account of public receipts and disbursements.

PATTANA, S. (पत्तन), vernacularly, PATTAN, the *tt* sometimes becomes *ṭṭ*, as PAṬṬAN, or PUṬṬUN, or PATNÁ, H. (پٹّن, پٹنا), Mar. (पट्टण or पत्तन), Karn. (ಪಟ್ಟಣ, ಪಟ್ಣ), Tam. (பட்டணம்) A town, a city, whence *Patna* in Behar, and *Puṭṭun* in Sindh, &c., as being *the* city, or one deserving the appellation: the term is said to have been also applicable to a village granted rent-free by a viceroy of a province to a Zamindár (?): in Orissa it is applied to a village without lands or township, being confined to the ground on which the houses are constructed, and paying no land revenue, though subject to *Chandína*, or miscellaneous imposts for ground-rent, &c. In Bengali, *Paṭṭan* (পত্তন) also means the first settling of a colony, a village or town.

Paṭṭan-kami, Beng. (P. كمي, less) Remission or diminution of revenue in favour of new settlers on waste lands.

Paṭṭana-seṭṭi, Karn. (S. ಪಟ್ಟಣಶೆಟ್ಟಿ) The chief merchant of a town, the head of the traders, exercising a kind of arbitration in disputes respecting caste or usage: corruptly *Patna-chitty*, which, with another corruption wholly unverifiable, *Patna Bogami*, is said to have formerly denoted a tax on the heads of the right and left-hand castes in a town, in consideration of their being allowed to impose cesses upon the castes: under the early financial arrangements of the Madras Presidency the privilege was withdrawn from the head men, and the imposts on the castes were transferred to the government.—5th Rep. p. 766.

Paṭṭanaswámí, Tam. (பட்டணசுவாமி, from S. स्वामी, a master) A head man among some of the castes, who acts as arbitrator in disputes among themselves or one another.

Paṭṭanwár, H. (پٹّنوار) A division of the Kúrmí caste in the vicinity of Nandaur.

PAṬṬAN, H. (پٹّن) Act of ordering goods from a manufacturer.

Paṭṭaní, H. (پٹّني) Commissioned, manufactured to order.

PAṬṬANI, or PATTANÍ, incorrectly, PUṬṬANY, more usually written PATNI, or PUTNEE, Beng. (পত্তনী, पत्तनी) A tenure by which the occupant holds of a Zamindár a portion of the Zamindárí in perpetuity, with the right of hereditary succession, and of letting or selling the whole or part as long as a stipulated amount of rent is paid to the Zamindár, who retains the power of sale for arrears, and is entitled to a regulated fee or fine upon any transfer: the tenure created by an under-letting in the second degree is termed *Dar-patní* (or lease within lease); and a third under-letting is denominated *Seh-patní* (from the Persian *seh*, three): this description of sub-tenures originated in Burdwan, being created by the Rája or Zamindár: it has been extended and sanctioned by Regulation. The word *Paṭṭani*, or *Patni*, is not found in any dictionary, and is differently explained by those who use it: Mr. Harington, Analysis 3. 519, says it may be rendered 'settled or established,' which is very questionable. In the Sudder Diwání Reports 2. 99, *Puttun* is said to have been incorrectly interpreted 'dependant,' whilst it really signifies 'constituting;' but this is equally doubtful. As the term originated in Burdwan it must be Bengali, but its omission from the dictionaries leaves it uncertain whether it should be written with the cerebral or dental *t*: if with the former, it probably bears a relation to *Paṭṭa*, or *Poṭṭa*, (পাট্টা) a lease; if with the latter, to *Pattana* (পত্তন), colonising: the former seems the more likely.

Paṭṭaní-dár, or *Patni-dár*, Beng. &c. (পত্তনিদার) The holder of an under tenure.

Paṭṭani-ijárá, H. (اجارا, a farm) A farm held as an under tenure of the landholder or proprietor.

Paṭṭani-táluka, or *táluk*, Beng. &c. (P. A. تعلق, a dependency) An estate, or portion of it, underlet in perpetuity by a Zamindár at an advance on the revenue he pays to government; as long as the stipulated amount is paid, the estate is heritable and transferable, in the latter case with the concurrence of the Zamindár, on payment of a regulated fine. In the event of arrears it may be sold by public auction at the *kachcharí* of the collector.

PÁṬṬAN, PÁṬṬANÁR, Tam. (பாட்டன், பாட்டனார்) A grandfather.

Páṭṭi, *Páṭṭiyár*, Tam. (பாட்டி, பாட்டியார்) A grandmother.

Kóppáṭṭan, or *Kódpáṭṭan*, Tam. (கோப்பாட்டன், கோட்பாட்டன்) A forefather, an ancestor.

Paṭṭí, Puṭṭee, corruptly, Puṭṭy, H. &c. (پتّي, S. पट्टी) A part or portion, a division of a village, a division of land into separate portions or strips: in the north-west provinces, an original share in a joint or coparcenary village or estate comprising many villages: it is sometimes defined as the smaller subdivision of a *mahál* or estate, the larger being termed *Thoka*: so in Guzerat it denotes the secondary share or subdivision of a principal *bhág* or share: in Bengal it also implies the part of a market appropriated to one description of dealers: in Kamaon it is the nominal division of a Pargana.

Paṭṭidár, *Puṭṭeedár*, corruptly, *Puṭṭydár*, H. &c. (پتّيدار) The holder of a share in a coparcenary village or estate. Ben. Reg. i. 1795; xxvii. 1803. Act i. 1841.

Paṭṭidárí, *Puṭṭeedaree*, H. &c. (پتّيداري) A tenure of a coparcenary nature, but in which the lands are divided and held in severalty by the different proprietors, each person managing his own lands, and paying his fixed share of the government revenue, through an accredited representative of the whole, being jointly responsible in the event of any one sharer being unable to fulfil his engagements: this is the perfect, or *Mahmil paṭṭidárí*: a modification of this tenure also exists, known as *Námahmil* (نامكمل), imperfect *Paṭṭidarí*, in which part of the land is held in common and part in severalty; the profits from the land in common being first appropriated to the payment of the government revenue and the village expenses; and the surplus being distributed, or the deficit made up by a rate, or *báchh*, on the several holdings: the principle by which the distribution of the several divisions or *Paṭṭís* is regulated is very various, and not always well defined: in some cases it has the character of ancestral or of successive partition amongst joint heirs, in others of usage only: the realisation of the government revenue, although it might be effected from each *Paṭṭidár*, is more usually, as more conveniently, received from one of their number, the *Sadr-málguzár*, or *Lumberdár*, q. v. Act i. 1841.

Paṭṭíwár, H. (پتّيوار) According to shares, assessment, &c.

Paṭṭí, Mar. (पट्टी) A share of a village, as above, but more usually employed to denote a general collection or contribution: it was applied especially to an addition made by a former minister of the Peshwa to the fixed assessment, thence called *the Paṭṭí*, but subsequently it came to signify any occasional or extra impost or cess, the *Abwáb* of the Mohammadans: the number and variety of these *Paṭṭís* under the Maratha administration were infinite and most vexatious: in the *Púna* collectorate alone they exceeded forty: the following are a few of the number.

Ghar-paṭṭí, (from घर, a house) House-tax.

Gosávi-paṭṭí, (from गोसावी, a religious mendicant) Collection for a band of religious mendicants on their visiting a village.

Khusál-paṭṭí, (खुसाल, for S. कुशल, prosperity) Tax on a village by a *Pátíl* or other public officer on an occasion of private or public rejoicing, as a birth of a son or the like.

Kulwár-paṭṭí, Karn. (ಕುಳವಾರಪಟ್ಟಿ) An extra tax on the people in general; a contribution or subscription for any public purpose.

Pásodi-paṭṭí, (from पासोडी, a shawl) A contribution for a new shawl or a turban to the *Pátíl*.

PÁṬṬI, Tam. (பாத்தி) A small bed or area: a small corn-field: a salt-pan: a part, a share.

Páttiyam, Tam. (பாத்தியம்) Affinity, connexion entitling to a share, inheritance: bail, security.

Paṭṭiyan, Tam. (பாட்டியன்) An heir, an administrator: a surety.

PATTIGE, Karn. (ಪತ್ತಿಗೆ) Share, partnership.

Pattigeyárambha, Karn. (ಪತ್ತಿಗೆಯಾರಂಭ, from S. *árambha*, undertaking) A joint farming or trading concern.

PATTINA-RAṆḌU, Mal. (from പത്തു, ten, and രണ്ടു, two) Two out of ten, twenty per cent. interest or profit.

PATTORA, (?) One of the village accounts, an account of receipts and disbursements, made up for six or eight months, formerly kept by the *Patwárí*.

PAṬṬU, H. &c. (پٿّو पट्टू) A kind of woollen cloth.

PAṬṬU, Tel. (పట్టు) Silk.

PAṬṬU, Karn. (ಪಟ್ಟು) A sum received or credited in account.

PATTUKÁḌU, corruptly, PUTTCUT, Tam. (பத்துக்காடு) A fixed assessment or rent on dry land.

PAṬṬUKAṬṬU, Tel. (పట్టుకట్టు), corruptly, PUTKUT, sometimes PATTU-KAT-RÁYAT, when applied to persons. A term formerly in use for the hereditary proprietor or cultivator of land in a village paying a fixed assessment to the government, considered the same as the *Mirásidár*. —5th Rep. 832, 977: lease of land held by an individual cultivator on terms rated on each field severally, the fields being so distributed as to give each occupant a fair proportion of good and bad soil: (the term occurs in this sense as *Pathat* or *Putkut* in some of the settlement reports of the north-western provinces, but its origin and correct spelling are doubtful: as well as the Telugu word, it is probably a corruption of the Tamil *Pattukádu*).

PATTUVAḶE, Karn. (ಪತ್ತುವಳೆ) Bribery, amount of frauds or embezzlement charged to a public functionary.

PATU, Uriya (ପଟୁ) Alluvial deposit left by inundation.

PÁTU, Tel., Karn. (పాటు) Labour, work: cultivation.

(راجپوت, राजपुत, from S. राजा, and *putra* पुत्र, a son), in some dialects, as in Guz., *Rajput*, or *Rujpoot* (રજપુત) A prince, the son of a Rája, the general designation of the races in the north and west of India, who pretend to spring from the ancient dynasties of the sun and moon, forming the *Súryavanṣí* and *Chandravanṣí* tribes, or from a sacred fire kindled on Mount Abu, by the saint *Agastya*, and who are thence termed *Agni-hula*, of the family of fire: from these sources thirty-six primary royal races are supposed to originate. The solar dynasties are, 1. the *Grahilote*, or *Gehlote*, of which the Rana of Udayapur is a member: it is subdivided into twenty-four *Ṣákhás*, or branches, of which the *Sisodhia* is the most distinguished, sometimes giving a title to the whole race; 2. *Rahtore*, said to be descended from *Ráma*, by *Kuṣa*, his second son; but this is sometimes disputed: it has twenty-four branches: the Rája of *Marwar*, or *Jodhpur*, belongs to this tribe; 3. *Kachwáhá*, also said to spring from *Kuṣa*, to which the Rájas of *Jaypur* belong: it comprises twelve *Kothris*, or houses. There is but one race said to spring from the moon, through *Kṛishṇa*, or that of *Yadu* or *Jaḍu*, comprehending eight branches, of which two are well known and powerful, the *Jháreja*, and *Bhattí*, of which the Rájas of *Cutch* and *Jaisalmer* are members. The *Tuár* tribe is of doubtful origin, although boasting of *Vihramáditya* as a member; it is usually considered a branch of the *Yadu* race. The *Agnihula* races are originally four, the *Pramára*, *Parihára*, *Chálukya*, *Chauluhya*, or *Solanki*, and *Chauhán*; the first contains thirty-five *Ṣáhhás*, of which the best known are the *Mori*, supposed to be the same as the *Maurya*, which would include *Chandragupta*, or *Sandrocoptus*, the *Soda*, *Sanhlá*, *Khair*, *Umra*, and *Sumra* (now Mohammadans), *Vehil*, *Maiparwat*, *Balhár*, *Kaba*, *Omata*, *Rehar*, *Dhundha*, *Sortiah*, and *Harir*: all these are in the west of Malwa and the desert of the Indus; 2. the *Parihára* has twelve divisions, but is little known; 3. the *Cháluhya* race was once of great power in the west of India and Guzerat, as still testified by numerous inscriptions, dated in the eleventh, twelfth, and thirteenth centuries: a more ancient branch also was powerful in the *Dahhin*: sixteen branches are specified, of which the *Bhagél* tribe is the best known; 4. the *Chauhán*, or *Cháhumána*, comprised twenty-four branches, of whom the *Háras*, giving a name to the district of *Háráwatí*, and numbering amongst its ranks the Rájas of *Kota* and *Bundi*, is the most eminent. The *Khíchís* of Raghugarh, *Deoras* of Sirohi, *Sonagaras* of Jhalore, and *Pawaichas* of Pawagarh, are also distinguished branches. Besides these, the thirty-six royal races include many whose origin even fiction has not ventured to account for, as the *Chaura*, or *Cháwara*, the *Táh* or *Tahshah*, the *Jit* of the Punjab, and *Ját* of the Jumna and Ganges, who, nevertheless, is never styled a Rájput, the *Hún*, the *Káttí*, the *Bátta*, the *Jhalamahwahana*, from whom *Jhálawár* is named, the *Gohil*, *Sarwaya*, or *Sariaspa*, the *Jetwa*, or *Kamari*, *Dabi*, *Gor*, *Doda*, *Gerhwál*, *Chandela*, *Bundela*, *Bir-gújar*, *Sengar*, *Sihharwál*, *Bais*, *Dahia*, *Johya*, *Mohil*, *Nihumba*, *Rájpati*, *Dahirya*, *Dahima*: the lists of these races, however, differ materially, and some of the tribes pretend also to trace their descent from the solar or lunar dynasties: of those best known almost innumerable subdivisions are to be met with in different parts of India, but especially in the Upper Provinces, extending from Bahar and Benares to the north and west of the Punjab, in Malwa, and in the region to which they give their name, *Rájasthána*, or *Rájputána*, spreading to the Indus and Sindh westward, and southward into Guzerat and Cutch.

Ráṭhor, or Ráṭhaur, Hindi (राठोर, राठौर) The name of one of the principal Rájput tribes, the origin of which is doubtful: they trace their descent from *Kuṣa*, the son of *Ráma*, and should consequently be of the solar line, but they are usually classed with the lunar families: they are found in considerable numbers in Hindustan, and, at the time of the Mohammadan conquest, furnished sovereigns to *Kanoj*: at present the Rája of *Márwár* or *Jodhpur*, and most of his feudatory chiefs, belong to this tribe. (Colonel Tod writes the name *Rahtore*, which is derived, he says, from *raht*, the spine of Indra; but the word is usually written in the native characters as above: the same authority specifies twenty-four *Sákhás*, or branches, of the tribe, which are, however, different clans of *Márwár*, sprung from the Rájas *Chonda*, *Ranmál*, and *Joda*, of whom severally three, twenty-three, and ten, are still extant: the popular nomenclature of the subdivisions of the *Rathors* is probably different in many respects from both).

Ratí, commonly, Ruttee, (رتي, रत्ति, रत्ती), S. (रक्तिका) The seed of the Abrus precatorius, used as the basis of weights for gold, silver, and drugs: the seed varies, but from various trials appears to average about $1\frac{5}{16}$ths of a grain: the artificial weight has been found to average nearly $2\frac{1}{4}$ grains, being one-eighth of a *másha*, rated at 17.708 grains. As the *másha* in use, however, averages but about $15\frac{1}{2}$ grains, the eighth, or one *Ratí*, will weigh rather less than 2 grains, or 1.938. Jervis makes it 1.953. The term is also applied sometimes, as in Midnapur, to an estate or landed property.

RÚPÍYA, commonly, RUPEE, H. (روپيه, from S. रूप्य, *rúpya*, silver) A silver coin, the general denomination of the silver currency of India, and the standard measure of value: the coin was first struck by Sbir Shah, and was adopted by Akhar and his successors: it was of the weight of 175 grains troy, and was considered to be pure, but in the decline of the Mobammadan cmpire every petty chief coined his own rupee, varying in weight and value, though usually bearing the name and titles of tbe reigning emperor: this practicc was observed to the last, and in thc reign of Shah Âálam a great variety of currencies bore his name, and the years of his succession, until 1773, when they were suppressed in thc territories subject to the Company, and a rupee was struck, entitled the Sicca rupee, with the following inscription on it, حامي دين محمد سايه فضل الله سكة زد بر هفت كشور شاه عالم پادشاه, *Hámí din-i-Mohammed, sáya fazl Allah, sikka zad bar haft kishwar Sháh Âálam Pádsháh.* 'The king Shah Âálam, the defender of the faith of Mohammad, the shadow of the grace of God, has struck this coin, to be current througb the sevcn climes. Rev. ضرب مرشدآباد سنه جلوس ميمنت مانوس ۱۹, struck at Murshidabad in tbe 19th year of tbe auspicious accession. The unvarying date, tbe 19th year of the reign, rcmained unaltcred, in order to put a stop to a practice which the money-cbangers bad introduced of levying an arbitrary rate of discount on rupees of previous dates, witbout reference to any actual diminution of weight by wear; in like manner the place of coinage remained always nominally tbe samc, or the mint at Murshidabad, that of the Nawab of Bengal, although the rupees were coined also at Dacca, and finally only at Calcutta, for the same reason, to guard against the deprcciation of the money-changers, according to thc difference of place of coinage. Although the actual medium of exchange, the Company's accounts, wcre for a long time kept in a diffcrent valuation, or that of the *Chalani*, or current rupee, the origin of which is somewbat obscure, although it probably expressed thc state of the currency at the time of its adoption, 100 Sicca rupees, supposed to be of the standard weight and value, heing reckoned as equivalent to 116 current rupees. The Sicca rupee served also as the unit of weight, 80 Sicca weight being equal to one *Sér*, and 40 *Sérs* to one *Man* or *Maund*. Beside the Sicca rupee there were current under the Bengal Presidency two other coins, the Benares and Farakhabad rupee, from tbeir being coined at those cities respectively: the Benares rupee ceased to be struck in 1819. At Madras thc rupee of the Nawabs of the Carnatic, struck originally at Arcot, was the currcncy of the Company, and retained its name although coined at Madras or at Dacca and Calcutta, being current also in Chittagong and Dacca, between which places and the Northern Sarkárs an active traffic subsisted: its value underwent some sligbt modification in 1818. At Bombay the rupee of the Nawabs of Surat became the Company's coinage, and for a while it was coined concurrently with that of the Nawab; but irregularities occurring in the latter, the coinage in 1800 was restricted to Bombay, and tbe value of the coin was fixed, which was slightly modified in 1829. The entire inscription on the Arcot rupce was, on one face سكه مبارك بادشاه غازي عزيز الدين محمد عالمگير, the auspicious coin of the heroic monarch Âzíz-ud-din Mohammad Âálamgir (the father of Shah Âálam), and on the other ضرب اركات سنه ۲۰ جلوس ميمنت مانوس, struck at Arcot in the 20th year of the auspicious accession: that of the Bombay rupee was latterly on one facc, سكه مبارك شاه عالم بادشاه غازي ۱۲۱۵, the auspicious coin of the heroic monarch Shah Âálam (Hij) 1215, on the other, ضرب سورت سنه ۴۶ جلوس ميمنت مانوس; struck at Surat in the 45th year of his fortunate accession: but these coins, as long as they were coined on the native plan, in common with the coins of all native mints, bear but a portion of their lcgends, it being the practice of the native mints in all cases to fabricate tbe die of twice or thrice the diameter of the coin, in striking which, consequently, only such portion of the letters as its surface could contain were impressed upon it: as, also, it was entirely accidental with which part of tbe die the blank coin came into contact, tbe portion of the legend whicb it received varied with every piece. In 1818 the standard of thc Sicca and Farakhabad rupees was altered, but their intrinsic value was unaffected, as they continued to have the same amount of fine silver. In 1824 a slight change of the latter was made, and of the former in 1833; but in 1835 tbe coinage of the Company was entirely remodelled, and a coin, thenceforth termed the Company's rupee, with its proportionate subdivisions, was struck, to take the place of all the former Presidency currencies, being of the same weigbt and fineness throughout, and bearing inscriptions in English, or, on one face, the head and name of the reigning sovereign of Great Britain, and, on the re-

verse, the designation of the coin in English and Persian, with the words East-India Company in English. The weight, intrinsic purity, and value in shillings of the present British currency of these several coins are as follows:

		Weight.	Pure contents.	s.	d.

Saṇskára, S. (संस्कार) Making, perfecting: an essential ceremony of Hindu initiation, held indispensable to constitute the perfect purification of a Hindu: these ceremonies, which are principally oblations to fire, or customary offerings to idols, are restricted to the three first castes, and are quite inappropriate to the mixed castes, but in practice they are, in part at least, observed by all castes above the lowest. The number enjoined by authority is ten, or at most twelve, but in different parts of India others are added, extending them to seventeen: 1. *Garbhádhána*, worship on the first sign of conception, sometimes on a woman's attaining maturity; 2. *Punsavana*, worship to secure the birth of a male child performed at the expiration of the third month of pregnancy, or on signs of vitality in the embryo; *Anavalobhana*, a ceremony performed among the Maraṭhas on the third month: it is much the same as the preceding, but, as the term implies, is intended to obviate miscarriage (*an*, not, *avalobhana*, disappointment); 4. *Símantonnayana*, parting of the hair on the head of a pregnant female in the 4th, 6th, or 8th month of a woman's first pregnancy; 5. *Vishṇubali*, a sacrifice to Vishṇu on the 7th month of pregnancy, apparently peculiar to the Maraṭhas; 6. *Játakarma*, ceremonies at birth, comprising the putting some ghee out of a golden spoon into the mouth of the infant before cutting the navel-string; 7. *Námakaranam*, naming the child on the 10th, 11th, 12th, or 101st day after birth; 8. *Nishkramanam*, taking the child out of the house when three months old, or to see the moon in the third light fortnight; 9. *Súryávilokanam*, taking the child out to see the sun when four months old: this is much the same as the preceding, and both are rarely observed; 10. *Annaprásana*, feeding the child for the first time with rice, usually in the sixth or eighth month; 11. *Karṇavedha*, boring the ears, but this is not always practised; 12. *Chúḍá-* or *Chúlá-karanam*, or simply *Chauḍá*, vernacularly, *Chaura*, or *Chaula*, the ceremony of tonsure, shaving the head all but one lock, which is the *Chúḍá* or crest; it should be performed in the first or third year, and not delayed beyond the fifth, although this is sometimes disregarded; 13. *Upanayana*, investiture with the sacrificial thread, which is worn over the left shoulder and under the right arm, crossing the body to the hip; this is the most important ceremony of the whole, constituting the second or spiritual birth of the three first castes, thence termed *Dwija*, twice-born: for a Brahman it should be performed in the 8th year from conception, and not be delayed after the 16th;

for the Kshatriya in the 11th year, and for the Vaiṣya in the 12th, and is not to be later than the 22d and 24th severally: in practice, however, the Brahman is the only one of the three original castes remaining, and the only one entitled to the characteristic thread, although it is assumed without due warrant by some of the mixed castes; 14. *Sávitri-mahánámya*, the ceremony of investiture accompanied by the repetition of the *Gáyatri* which properly it always should be, but in some places this is considered as a different ceremonial, to be performed four days after the Upanayana; 15. *Samávarttana*, the ceremony performed on the student's completion of his studies and return home; 16. *Viváha*, marriage; 17. *Swargárohana*, ascending to heaven, funeral ceremonies; of these, however, the third, ninth, eleventh, fourteenth, and fifteenth, are either local, or are mere modifications of other ceremonies, leaving them only twelve, and, by excluding the boring of the ears, and the funeral obsequies, which can scarcely be looked upon as purificatory, the number is reduced to the correcter one of ten: women have only the *Sanskára* of marriage. *Súdras* perform most of them except the *Upanayana*, *Sávitri*, and *Samávarttanam*, but with different prayers and observances.

(سير, शेर, সের, from the S. शेटक, *Setaka*) A measure of weight, varying in different parts of India, and for different articles, but generally reckoned in Bengal at eighty *tolas*, or Sicca weight, or as one-fortieth of a *man* or *maund*: as the fortieth of the former Bázár *maund* the standard *Ser* was = avoirdupois weight 2 lb. 0 oz. 13.863 dr. and of the Factory *maund* 1 lb. 13 oz. 13.860 dr. In 1833 a slight change was made in the value of the *man*, thence known as the *Angrezi* or English *maund*, by which the proportionate value of the *Ser* became, in avoirdupois weight, 2 lb. 0 oz. 14.592 dr.: the Tamil *Sér* (சேர்) is reckoned equal to eight *palams*, while a larger or *pakká* *sér* (பக்காசேர்) is equal to 24 *palams*. See *Palam*. On the west of India the Surat *Ser* is said to be equal to avoirdupois weight 1 lb. or 16 oz., and the Bombay *Ser* to 13 oz. only.

Serí, H. &c. (سيري, शेरी) Relating to a *Ser*: a charge or fee of one *Ser* per *man*: an allowance of one *ser* per *maund* in the division of the crop: in Marathí, a perquisite of about two *Sers* per *maund* taken by the *Kamavisdár*, or other government officer, from the grain brought by the cultivators in payment of the public revenue when receivable in kind: also the grain which the officer who supplies the public servants with their allowances deducts as his perquisites from every *maund*.

Adserí, Mar. (अडशेरी) Monthly grain given to a servant for his subsistence: a weight of two and a half *sers*: a measure of capacity, or half a *payali*.

Serína, H. (سيرينه) Payment of a *ser* per *man* by an hereditary cultivator in a village to the proprietary community of the village, or some individual of the community, in acknowledgment of the proprietary right: also a perquisite or deduction of a like proportion from the estimated produce of the lands claimed by the proprietors on settling for the revenue.

SERÍ, pronounced SHERI, corruptly, SHAIREE, SHEYREE, Mar. (शेरी) Arable land originally excluded from the village assessment, either as fallen in consequence of neglect of cultivation or forfeiture into the hands of the government, and managed for its benefit, or such land separated under some pretext by the great officers of the state, and managed for their own advantage alone: when the *Serí* lands were appropriated by the government they were sometimes rented to the Mámlatdárs at a favourable rate: latterly they were made over to the *Pátíls* and assessed along with the other lands of the village, from which they then ceased to differ, except in retaining their original appellations.—E. I. Selections, iv. 652, 695. The same word in Telugu (శేరి) is explained in a similar manner to denote land cultivated by the Ryots on account of the state, paying usually at the rate of half the nett produce of ordinary cultivation, or one-third of that of garden cultivation: *Serí* land was considered to be of two kinds, 1. land lying waste and unclaimed, and 2. land respecting which disputes not admit-

ting of decision had prevailed—Ibid. iv. 740. *Serí* is elsewhere explained to signify the same as *Baṭái*, or the partition of the produce between the state and the cultivator; and again to mean merely ploughed land, or cultivation in general.

Tâayyul, Tayool, corruptly, Tyool, Tyyool, H. (A. تعيُّل, from عيل, to support) Land held in *Jágír* by a member of a royal family, an appanage : it is now applied especially to certain lands held by the king of Delhi, or members of his family in the neighbourhood of Dehli, or to some held by the king of Oudh : it formerly designated lands granted in Jágír burthened with special services, or sometimes paying a quit-rent : (this is stated with respect to, what is no doubt a typographical error, *Tycul*. 5th Rep. 639).

Tâayyul-sháhí, H. (P. شاه, a king) The royal domain ; land in Delhi and the neighbourhood, the occupants of houses on which pay ground-rent to the king.

Taâlluḳ, Taâllukah, or Taâlluḳat, commonly, Táluk, Talook, corruptly, Tualloog, Tuallooga, H. (A. تعلّق, تعلّقة, from علق, to suspend from or depend upon), Táluká, Mar. (तालुका), Tel. (తాలూకా) Connexion, dependence : possession, property : a dependency, a district, a division of a province : an estate, applied to a tract of proprietary land usually smaller than a Zamindárí, although sometimes including several villages, and not unfrequently confounded with a Zamindárí, held, in Bengal at least, at a fixed amount of revenue, hereditary and transferable as long as the revenue is paid : a *Táluḳ* was sometimes granted by the Mogul government at a favourable assessment as a mark of favour, or on condition of clearing and cultivating waste lands : in the Regulations fixing the permanent settlement *Táluḳs* were considered of two kinds ; 1. *Huzúrí* (from حضور, the state), of which the revenue was paid direct to the government or its officers : these were called also independent *Táluḳs*, and the holders were classed with Zamindárs, or proprietary landholders ; and 2. *Mazkúri* (from مذكور, specified), of which the holders paid their revenue through the intervention of a superior, as a Zamindár or other proprietor : these were termed 'dependant *Táluks* ;'

they were hereditary and transferable as long as the revenue was paid, but lapsed to the superior on failure of heirs: they were also termed *Mufassil*, or *Shámili Táluḳs*. In the north-west provinces a *Táluḳ* presents various peculiarities, but it is defined an estate, the profits of which are divided between different proprietors, or classes of proprietors, the one superior, the other inferior; the former being usually an individual who, either by a grant from the sovereign, by favour of local functionaries, or by voluntary acts of the people, has become the intermediate agent for the revenue, collecting it from the people, and paying it to the government after making such deductions to cover his risk and assure his profits as he may be entitled to by the stipulations of the grant, or by local custom: the holder of such a *Táluḳ* exercises legally no right of interference with the proprietary and hereditary rights of the cultivators, except in some cases, where, from peculiar circumstances, the inferior claimants have been absorbed in the person of a single *Táluḳdár*: many modifications of rights, many more or less obscure, are said to exist between the individual *Táluḳdár* and the inferior proprietor. Ben. Reg. i. ii. iii. viii. xliv. 1793; ii. iii. 1803; ix. xii. 1805; xix. 1814; vii. xi. 1822; v. 1831. Act viii. 1805.

Zamín-báb, H. (A. باب, an item) Relating to land.

Zamíndár, *Zumeendár*, vernacularly, *Jamíndár*, *Jamídár*, *Jamidár*, corruptly, *Zemindár*, H. &c. (زمين, land, and دار, who has or possesses, जमीनदार, जमीदार, జమీదారు) An occupant of land, a landholder: the rights of the *Zamíndár* have been the subject of much controversy with reference

to his character as hereditary owner of the land he occupies, or as the responsible collector only of the revenues on behalf of the government. Under the Mohammadan administration the latter was the capacity in which the Zamíndár was ordinarily considered, and the chief authorities never hesitated to exercise the power, when they possessed it, of turning out a Zamíndár and placing another in the Zamindárí, whence the one in possession was termed *Sanadi*, or *Ahkámi*, the Zamíndár by patent or command. Whilst managing the lands and realising the revenue the Zamíndár was allowed a fee or commission of ten per cent. upon the total collections, and a portion of the land was exempted from the revenue assessment to the extent of five per cent. on the collections, under the denomination of *Nánkár*, being intended for the personal support of the Zamíndár and his family: further deductions from the stipulated amount of revenue, termed *Maṭhaut*, were also allowed, to cover various charges borne by the Zamíndár: on the other hand, he was empowered to levy internal duties and customs on articles of trade passing through his district, and to impose petty taxes, or *Abwábs*, on the cultivators, in addition to the portion of the public revenue demandable from them individually: on his relinquishing the management of the Zamíndárí, or being removed from it without cause of grave offence, it was customary to assign him, as *Málikána*, ten per cent. on the *Sadr* collections, or the same rate on the nett collections when held *khás*, or managed by the government officers direct. But although in these respects the Zamíndár appears to be a representative of the state, employed to realise and transfer to the public treasure nine-tenths of the revenue, and to be nominated or removed at pleasure; yet the practice of hereditary succession, and the right to mortgage and sell, partook more of the tenure of ownership, and extensive tracts came to be held by successive generations of the same family, through more or less protracted periods, in some instances apparently from a date anterior to the fiscal regulations of the Mohammadan governments: in the decline of the latter, also, many Zamíndárís which were held originally under a special grant were converted into hereditary proprietaries, and the Zamíndárs, appropriating by fraud or force very extensive districts, assumed the state of chiefs and princes, and were sometimes powerful enough to resist the authority and withhold the revenues of the state. The question of right was, however, set at rest in Bengal, Bahar, and Orissa, in 1793, by the terms of the perpetual settlement, which recognised Zamíndárs and independent Talukdárs as "actual proprietors," enjoying their estates in absolute ownership as long as they paid the government revenue, or nine-tenths of the fixed nett proceeds of the lands, and liable to dispossession in case of failure, by the sale of their lands at public auction. Ben. Reg. viii. 1793; iii. 1794; v. 1795; ii. xxvii. 1803. The same measure was subsequently adopted at Madras, and Zamíndárs were designated as proprietors of land, along with other classes with whose rights and recognition, as was afterwards explained, it was not intended to interfere. Mad. Reg. xxv. 1802; ii. 1806; iv. 1822. In the Upper Provinces, Zamíndárís sometimes occur which are held by an individual in absolute proprietary right, the most common instances of such tenure being where the right has been acquired by purchase, and especially where this has been effected at public sale for arrears of revenue; but the more usual form of Zamíndárí tenure is where the lands are held by a number of coparceners, thence termed Mufassal or village Zamíndárs, who hold and manage the village lands in common: the rents paid by the cultivators, whether those cultivators be the proprietors themselves or tenants holding under them, together with all other profits from the estate, are thrown into a common stock, and, after deduction of the government demand, and other expenses, the balance is divided amongst the proprietors according to a fixed law. Ben. Reg. ii. 1795, &c. From the circumstance of one of the number of such coparceners representing the whole, as responsible for the government revenue, the designation has been given to him especially of Zamíndár, or *Málik-zamíndár*, but he is a Zamíndár only by virtue of the share or shares he holds in the joint proprietary: the designation of *Sadr* or *Pargana-zamíndár*, denotes merely a *Zamíndár*, or *Talukdár*, in the sense of an individual proprietor. In the Maraṭha provinces the term Zamíndár was applied indiscriminately to the local hereditary revenue officers, whether of the districts, as *Desmukh*, *Despande*, and others, or of the villages, as the *Patíl*, *Chaughala*, and *Kulkarani*.

Zamín-dárán, H. (plur. of *Zamíndár*) Feudal tenures of the nature of conditional Jágírs conferred on certain of the frontier Zamíndárs of Bengal by the Mohammadan government.

Zamíndárána, H. (زميندارانه) The pay of a Zamíndár, the allowance made to him when set aside.

Zamíndárí, vernacularly, *Jamíndárí*, corruptly, *Zemindarry*, H. (زميندارى) The office and rights of a Zamíndár: the tenure of a Zamíndárí, whether individual or coparcenary: the tract of land constituting the possessions of a Zamíndár or of coparcenary Zamíndárs: it more usually designates the former.

Zamíndár-hazúr-tahṣíl, H. (A. حضور, the state, and تحصيل, collections) A Zamíndár in the ceded Provinces formerly paying his revenue instalments to the collector of the Zilâ, and charged with the superintendence of the police in his Zamíndárí. Ben. Reg. xxv. 1803.

Zamíndárí-hiṣṣadárí, H. (A. حصّه, a share, P. دارى, having) A Zamíndárí held in shares, described as a village or estate in which the sharers cultivate separately, and raise the government revenue by a *báchh*: the lands are not divided amongst the sharers in proportion to their shares and interests in the village, and no sharer can have his share separated except by decree in a civil suit: the term is regarded, however, as somewhat ambiguous.

Zamíndárí-paṭṭa, H. (پتّه, a lease) A document granted by government in recognition of the possessions of a Zamíndár.

Zamíndárí-sanad, H. (A. سند) Deed or patent granting a Zamíndárí.
